It offers a digital handshake between the graphic designer and the data programmer. LiveCycle Designer lets form designers create more compelling and dynamic documents than is possible with Acrobat or Microsoft Word. Forms created with LiveCycle Designer automatically expand to accommodate different amounts of data and report that information back to a database. The new version of LiveCycle Designer (ES4) allows for the first time forms to be deployed in HTML5 format, so they can be used on a wider array of devices (page sizes can adjust to smaller screens) and in a wider range of software systems (no special reader or

It balances coverage of conceptual issues (how to fit tools like Photoshop to the design workflow rather than fitting a workflow to the tools) with practical design exercises tailored to help communicate the overall design direction of the page while respecting the needs of the fluid Web. In addition, the author introduces methods for taking HTML back into Photoshop for further refinement. Dan Rose is one of the best-known advocates of this new way of working in Photoshop. He's observed that only a few people are talking about Photoshop for RWD constructively, yet a majority (63% as of his last informal poll) of web designers are using Photoshop for more than simple asset creation. This transition is a pain point for many designers.
