Excerpt from A Peep Behind the Scenes Yet, in spite of this, and in spite of the rain, a crowd of Sunday idlers lingered about the fair, looking with great interest at the half-covered whirligigs and bicycles, peeping curiously into the deserted shows, and making many schemes for further enjoyment on the morrow, when the fair was once more to be in its glory. Inside the caravans the show-people were crouching over their fires and grumbling at the weather, murmuring at having to pay so much for the ground on which their shows were erected, at a time when they would be likely to make so little profit. A little Old man, with a rosy, good-tempered face, was making his way across the sea of mud which divided the shows from each other. He was evidently no idler in the fair; he had come into it that Sunday afternoon for a definite purpose, and he did not intend to leave it until it was accomplished. After crossing an almost impassable place, he climbed the steps leading to one of the caravans and knocked at the door. "Here is New York City Ballet as it really is- the good, the not so good, and the majestically beautiful. It's a true story, and it's told by someone who can honestly claim that he was there." "As both a historical document and a personal memoir, Behind the Scenes is one of the most intimate and revealing portraits of President Reagan's long pursuit of the presidency... The book analyzes the unique attributes and personal style that were turned to Reagan's advantage. Deaver was a confidant of Nancy and Ronald Reagan for more than twenty years and was a member of the Reagan team during its ascendance. As a member of the Deaver/Baker/Meese troika, Deaver's involvement in key historical events was extensive... Finally, Behind the Scenes tells of one man's battle with his personal demons and the tantalizing and overwhelming seduction of power. His decline, like that of many in Washington, was quick, relentless, and public - a fall that was exacerbated - but not caused - by his secret alcoholism. No history of this era would be complete without the information found in this book, while important as a volume of history, also tells a personal and involving story." -- Amazon.com. An investigation of the work and workers in fossil preparation labs reveals the often unacknowledged creativity and problem-solving on which scientists rely. Those awe-inspiring dinosaur skeletons on display in museums do not spring fully assembled from the earth. Technicians known as preparators have painstakingly removed the fossils from rock, repaired broken bones, and reconstructed missing pieces to create them. These specimens are foundational evidence for paleontologists, and yet the work and workers in fossil preparation labs go largely unacknowledged in publications and specimen records. In this book, Caitlin Wylie investigates the skilled labor of fossil preparators and argues for a new model of science that includes all research work and workers. Drawing on ethnographic observations and interviews, Wylie shows that the everyday work of fossil preparation requires creativity, problem-solving, and craft. She finds that preparators privilege their own skills over technology and that scientists prefer to rely on these trusted technicians rather than new technologies. Wylie examines how fossil preparators decide what fossils, and therefore dinosaurs, look like; how labor relations between interdependent yet hierarchically unequal collaborators influence scientific practice; how some museums display preparators at work behind glass, as if they were another exhibit; and how these workers learn their skills without formal training or scientific credentials. The work of preparing specimens is a crucial component of scientific research, although it leaves few written traces. Wylie argues that the paleontology research community's social structure demonstrates how other sciences might incorporate non-scientists into research work, empowering and educating both scientists and nonscientists.
