**Revisiting the Empowerment Controversy** Feb 18 2023 Mark D. Morrison-Reed, the preeminent scholar of black Unitarian Universalist history, presents this long-awaited chronicle and analysis of the events of the Empowerment Controversy, which rocked Unitarian Universalism in the late sixties and continues to reverberate. It was a time of revolution, of the Civil Rights and Black Power movements. Like the country, the young Unitarian Universalist Association was forced to reckon with demands for change and found itself fractured by conflict about the implications of a commitment to racial justice. Morrison-Reed synthesizes decades of research and extensive interviews to present a nuanced and suspense-filled drama about Unitarian Universalism's great crisis of faith. As he writes, "Perhaps wisdom can be gleaned from the pain and upheaval of those years, a wisdom that will be of use today in a new era." Revisiting the Empowerment Controversy is the last book in a historical arc Morrison-Reed has traced since the publication of *Black Pioneers in a White Denomination*.

*Canada Among Nations 1985* Apr 15 2020 The 1985 edition of *Canada Among Nations* examines the reshaping of Canadian foreign policy that characterized the Mulroney Conservative government's first full year in power. Initially the new government's handling of foreign policy was marred by indecision and internal tension. By the end of 1985, however, Prime Minister Brian Mulroney's ad hoc interventions on foreign affairs had ceased, and the move to a more formal decision-making process accompanied a rise in the influence of External Affairs Minister Joe Clark. This edition of *Canada Among Nations* analyses the Mulroney government's agenda-setting experience from a range of perspectives: international security, the economy, relations with the Third World and the federal policy-making process.

**Caen Controversy** Mar 27 2021 On 6 June 1944 British, American, Canadian and French troops landed in Normandy by air and sea. This was one of the key moments of the Second World War, a long-anticipated invasion which would, ultimately, lead to the defeat of Nazi Germany. By the day's end a lodgment had been effected and Operation OVERLORD was being hailed as a success. In reality the assault had produced mixed results and at certain points along the French coastline the position was still far from certain. The key Allied objectives had also not been captured during the first day of the fighting and this failure would have long-term consequences. Of the priority targets, the city of Caen was a vital logistical hub with its road and rail networks plus it would also act as a critical axis for launching the anticipated follow-on attacks against the German defenders. As a result an entire brigade of British troops was tasked with

attempting its capture but their advance culminated a few miles short. This new book examines this significant element of the wider D-Day operation and provides a narrative account of the operations conducted by 3 British Infantry Division. It examines in some detail the planning, preparation and the landings that were made on the beaches of Sword sector. To do this it considers the previously published material and also draws upon archival sources many of which have been previously overlooked to identify key factors behind the failure to capture the city. Its publication coincides with the 70th anniversary of the Allied liberation of France.

*Power Played* Jun 22 2023 This innovative collection argues that modern sport can be characterized by problematic power relations linked to violence, harm, deviance, and punishment. On the one hand, sport is a mainstay of community building, an expression of solidarity, and a means to mental and social health. On the other, there is the star player who commits sexual violence, the trans athlete whose achievements are dismissed as fraudulent, or the racist nationalism of the impassioned sports fan. *Power Played* illuminates how criminal/judicial discourses and practices reinforce social inequalities and blows the whistle on the harm, violence, and exploitation embedded in sport.

*The State Immunity Controversy in International Law* Jan 05 2022 The author shows through a careful analysis of the law that restrictive immunity does not have vox populi in developing countries, and that it lacks *usus*. He also argues that forum law, i.e. the *lex fori* is a creature of sovereignty and between equals before the law, only what is understood and acknowledged as law among states must be applied in as much as the international legal system is horizontal.

**The Aquaculture Controversy in Canada** Apr 20 2023 The farming of aquatic organisms is one of the most promising but controversial new industries in Canada. The industry has the potential to solve food supply problems, but critics believe it poses unacceptable threats to human health, local communities, and the environment. This book is not about the methods and techniques of aquaculture, but it is an exploration

of the controversy itself. The authors present the controversy as a multi-layered conflict about knowledge, rights, and development. Comprehensive and balanced, this book addresses one of the most contentious public policy and environmental issues facing the world today.

**Twenty-First-Century Immigration to North America** Feb 23 2021 Human migration has reached an unprecedented level, and the numbers are expected to continue growing into the foreseeable future. Host societies and migrants face challenges in ensuring that the benefits of migration accrue to both parties, and that economic and socio-cultural costs are minimized. An insightful comparative examination of the policies and practices that manage and support immigrants, *Twenty-First-Century Immigration to North America* identifies and addresses issues that arose in the early years of the twenty-first century and considers what to expect in the years ahead. The volume begins with an overview of immigration policies and practices in the United States and Canada, then moves to an investigation of the economic and socio-cultural aspects, and concludes with a dialogue on precarious migration. Taking a multidisciplinary approach, the editors include research from the areas of psychology, political science, economics, sociology, and public policy. Underscoring the complicated nature of immigration, this collection aims to foster further discussion and inspire future research in the United States and Canada.

**The Red Man's on the Warpath** Sep 01 2021 During the Second World War, thousands of First Nations people joined in the national crusade to defend freedom and democracy. High rates of Native enlistment and public demonstrations of patriotism encouraged Canadians to re-examine the roles and status of Native people in Canadian society. *The Red Man's on the Warpath* explores how wartime symbolism and imagery propelled the "Indian problem" onto the national agenda, and why assimilation remained the goal of post-war Canadian Indian policy -- even though the war required that it be rationalized in new ways.

*Controversial New Religions* Jul 31 2021 This book complements Lewis's *xford Handbook of New Religious Movements*. The former provides an overview of the state of the field. This volume collects papers on those specific New Religious Movements (NRMs) that have generated the most scholarly attention. With few exceptions, these organizations are also the controversial groups that have attracted the attention of the mass media, often because they have been involved in, or accused of, violent or anti-social activities. Among the movements to be profiled are such groups as the Branch Davidians, Heaven's Gate, Aum Shinrikyo, Solar Temple, Scientology, Falun Gong and many more. The book will function as a reference for scholars, as a text for courses in NRMs, and will also appeal to non-specialists including reporters, law enforcement, public policy makers, and others.

**When the Gods Changed** Oct 02 2021 Peter C. Newman, Canada's most "cussed and discussed" political journalist, on the death spiral of the Liberal Party. The May 2, 2011 federal election turned Canadian governance upside down and inside out. In his newest and possibly most controversial book, bestselling author Peter C. Newman argues that the Harper majority will alter Canada so much that we may have to change the country's name. But the most lasting impact of the Tory win will be the demise of the Liberal Party, which ruled Canada for seven of the last ten decades and literally made the country what it is. Newman chronicles, in bloody detail, the de-construction of the Grits' once unassailable fortress and anatomizes the ways in which the arrogance embedded in the Liberal genetic code slowly poisoned the party's progressive impulses. *When the Gods Changed* is the saga of a political self-immolation unequalled in Canadian history. It took Michael Ignatieff to light the match.

**Report on the Lake Lowering Controversy and a Program of Remedial Measures** Jul 11 2022 **Storms of Controversy** Oct 22 2020 The development of the Avro Arrow was a remarkable Canadian achievement. Its mysterious cancellation in February 1959 prompted questions that have long gone unanswered. What role did the Central Intelligence Agency play in the scrapping of the project? Who in Canada's government was involved in that decision? What, if anything, did Canada get in return? Who ordered the blowtorching of all the prototypes? And did Arrow technology find its way into the American Stealth fighter/bomber program? When *Storms of Controversy* was first published in 1992, its answers to these questions sent a shock wave across the country. Using never-before-released documents, the book exploded the myth that design flaws, cost overruns, or obsolescence had triggered the demise of the Arrow. Now, in this fully revised fourth edition, complete with two new appendices, the bestselling book brings readers up-to-date on the CF-105 Arrow, the most innovative, sophisticated aircraft the world had seen by the end of the 1950s.

**Alberta's Daycare Controversy** Jan 17 2023 Since the late 1950s, disputes over day care programs, policies, and funding have been a recurring feature of political life in the province of Alberta. *Alberta's Day Care Controversy* traces the development of day care policies and programs in Alberta, with particular emphasis on policy decisions and program initiatives that have provoked considerable debate and struggle among citizens. For most of Alberta's first fifty years as a province, day care was treated as a private rather than a public issue. Beginning in the late 1950s, however, debates about day care began to appear regularly in the public record. Langford brings to light the public controversies that arose during the last four decades of the twentieth century and the first decade of the new millennium, placing contemporary issues in historical context and anticipating the elements of future policy struggles

**Identity, Trauma, Sensitive and Controversial Issues in the Teaching of History** May 29 2021

History Education is a politically contested subject. It can be used to both promote xenophobia and to develop critical thinking, multiple perspectives, and tolerance. Accordingly, this book critically examines complex issues and constructivist approaches that make history relevant to students' understanding of the modern world. As such, it has global appeal especially in North and South America, Canada, Europe and Asia. The book's authors address the major challenges that History Education faces in an era of globalisation, digital revolution and international terror, nationalism and sectarian and religious conflict and warfare. Central to this volume are controversial issues, trauma, and questions of personal and national identity from a wide range of international settings and perspectives. The research in this book was undertaken by leading history educators from every continent. Their interdisciplinary research represents an important contribution to the teaching of social sciences, social psychology, civic education programmes, history and history education in schools, colleges and universities. The book offers new approaches to history educators at all levels. In addition, the chapters offer potential as required reading for students to both develop an international perspective and to compare and contrast their own situations with those that the book covers. Section I considers issues related to identity; how can history education promote social coherence in multicultural societies, in societies divided by sectarianism, or countries adapting to regime changes, whether Communist or Fascist, including, for example, South Africa, previously Communist countries of Eastern Europe, and previous dictatorships in South America and Western Europe. It discusses such questions as: How important is it that students learn the content of history through the processes of historical enquiry? What should that content be and who should decide it, educators or politicians? What is the role of textbooks and who should write and select them? Should history be taught as a discrete discipline or as part of a citizenship or social sciences curriculum? Sections II and III explore ways in which memory of sensitive issues related to the past, to war, or to massacres may be addressed. Are there new methodologies or approaches which make this possible? How can students understand situations involving intolerance and injustice?

**Globalization, Sport and Corporate Nationalism** Oct 14 2022 Although New Zealand exists as a small (pop. 4.3 million), peripheral nation in the global economy, it offers a unique site through which to examine the complex, but uneven, interplay between global forces and long-standing national traditions and cultural identities. This book examines the profound impact of globalization on the national sport of rugby and New Zealand's iconic team, the All Blacks. Since 1995, the national sport of rugby has undergone significant change, most notably due to the New Zealand Rugby Union's lucrative and ongoing corporate partnerships with Rupert Murdoch's News Corporation and global sportswear giant Adidas. The authors explore these significant developments and pressures alongside the resulting tensions and contradictions that have emerged as the All Blacks, and other aspects of national heritage and indigenous identity, have been steadily incorporated into a global promotional culture. Following recent research in cultural studies, they highlight the intensive, but contested, commodification of the All Blacks to illuminate the ongoing transformation of rugby in New Zealand by corporate imperatives and the imaginations of marketers, most notably through the production of a complex discourse of corporate nationalism within Adidas's evolving local and global advertising campaigns.
