Fire TV Stick (4K) with Alexa User Guide for Seniors May 22 2020 Fire TV Sticks are USB stick-sized devices that plug into a spare HDMI port on your TV. They stream audio and video content from dozens of different apps over your Wi-Fi connection. While anyone can use one of these devices, being a Prime subscriber allows you to watch added programming. The remote itself hasn't physically changed much since the first Fire TV was introduced, and it lacks the premium feel of the Roku remote or Google's new remote. The new Fire Stick remote does add the ability to control your TV volume, though it lacks the shortcuts to Netflix or other often-used services. Setting the remote up with a TV takes about 30 seconds and it can even control a receiver. The stick comes with a power adapter and the parent company strongly recommends you use this. While you could use the USB ports on your TV to power the device, it means the unit could behave unusually. Ready to explore new features and know your device better?
