Trailers are a fact of life in the horse world. Sooner or later, everyone who owns a horse will have to deal with a horse trailer in order to haul to shows, races, hunts, and perhaps even to veterinary clinics. Up to now, when horse owners wanted information on trailers they had to rely on magazine articles or word-of-mouth recommendations. Not anymore. The Complete Guide to Buying, Maintaining, and Servicing a Horse Trailer is the first and only book for both owners and buyers of horse trailers. Scheve, both respected industry insiders, that the safety and comfort of the horse should always be the primary concern. This authoritative book, with more than 175 illustrations, addresses a number of important topics, including how to: * Determine whether to buy a new or a used trailer. * Ask the right questions of the dealer or owner. * Weigh the options and select the best model for your needs. * Evaluate tow vehicles and hitches. * Master pre-trip preparations. * Care for your current trailer. * Load, drive, and use a trailer safely. * Deal with typical exterior, interior, electrical and mechanical problems. * Assess the work of repairmen if the job is more than you can handle. "Complete" is not just an idle word: this book has an appendix that gives the names and addresses of the major trailer manufacturers to contact for literature. In all, the Scheves have given horse owners everything they need to make an informed purchasing decision that will benefit themselves and their horses. The book is a hand book on how to maintain your car. The author has used a lot of knowledge he acquired through the years as he drove and maintained his cars. Protect your retirement from the next big crash with a New Twist on the Old Investment Strategy. For years, advisors have recommended that investors take a "buy and hold" approach to the market, but people over fifty can't afford to rely on this strategy. *Buy, Hold, & SELL!* uncovers the myth of the "buy and hold" investment philosophy, and explains why it's dangerously incomplete. Written by Ken Moraif, one of Barron's top 100 Financial Advisors in the United States three years in a row and who called the 2008 market crash in November of 2007, this book outlines an alternative strategy that better serves investors who are at retirement age. Written in easy-to-understand language and buoyed by Ken's trademark humor, this guide shoots down the myths that keep investors in risky markets, and arms readers with the knowledge, motivation, and strategies that may help them survive-and even thrive-during the inevitable next bear market. Too many retirees lost a large percentage of their investments during the market collapse of 2008 and spent years trying to regain their footing. During the collapse, many advisors told their clients to stay in the market. Ken did the opposite, advising his clients and listeners of his popular radio show "Money Matters" to get out of the market in November of 2007-before the economic meltdown. With this book, Ken shares his 26 years of experience to help investors prepare for the imminent bear market that could devastate their retirement plans. For those looking to build a sound financial plan for the long run, this book provides expert insight and solid advice with supporting charts, graphs, statistics, and anecdotes. Understand the buy-hold-SELL strategy Learn how to design a sell strategy to protect principal in the next bear market Find clear-cut information regarding retirement finances Discover the benefits of a diversified portfolio This book expands upon old advice to provide the most important part of the equation: a sell strategy designed to protect principal. The goal of *Buy, Hold, & SELL!* is not to make investors rich quick, but to help keep them from becoming poor. Introduces five specific indicators for evaluating the stock market that investors can use to assess financial possibilities in any economic environment

The 20th century has been defined as the American Century, however, the history of the 21st century will be written in Asia. Today, East Asia is home to a third of the world's population and includes some of the world's largest economies. Hence the US has placed more emphasis on the region, to strengthen its economic ties and to show its long term allies that it has not forgotten about them. Disengagement from the Middle East and the rise of China has meant that the US has again turned its focus to the Asia-Pacific and East Asia, a region rife with old, long seated distrust and territorial disputes. The dissertation will focus on how the US is executing its 'Pivot to Asia' focusing on the many security issues which it must deal with, both those involving its allies and those involving its strategic rivals. All while trying to maintain its influence over East Asia in the face

of a rising China. Whilst the US is welcomed by some and unwelcomed by others, the dissertation will try and determine whether the US's renewed interest will contribute to the prosperity of East Asia or whether the US will again be bogged down in a region where it is not welcomed. How do you know which stock is a good one? How do you monitor your investments and when do you know the right time to sell your stock? These are all questions that I struggled with when I first made the leap into investing in individual stocks many years ago. I focused my stock picks on companies with growth potential. With growth-stock

investing, you are focusing on investing in companies that are just starting out. These are companies that haven't yet reached the big leagues. And by the time they reach the big league, you win with typically large increases in the stock price. I made my stock picks. Some early investments paid off, others, not so much. I soon found myself caught up in the market noise. It was overwhelming, watching the ups and down's and listening to so many opinions of what would be the next big stock to take off. The stock market is a large and complex world. There are so many different stakeholders with their own vested interests—who do you listen to? It was then that I took a step back. I went back to basics. I've always had an interest in understanding why some companies are successful and others struggle. So that's where I focused my investment research. What factors went into making a great company? It didn't take me long to discover that it's less about the financials of a company and more about the key factors that a company should possess to have the best chance of winning. I found that if I ignored all the noise and hype surrounding the stock market and just focused in on the key factors that I believe make a successful company, then I made more successful stock picks. By using these factors, and I have 12 of them, I've had stocks that have grown almost 2,000 percent. I documented these factors over time, and once I had it down to where I know it worked consistently, that's when I decided to share it with other DIY investors. In the Growth Stock Investing playbook, I provide: A 7-step playbook which shows you how to find, select, buy and maintain growth stocks, and importantly when to sell to maximize your profits. The 12 key factors that can indicate whether a company is likely to succeed and grow into a successful business, and in turn, create larger investment returns for you. The basics on stock market investing Investing is the ultimate spectator sport. But as with any game, you are playing to win. You can win in the stock-market game. You just need to know how to play the game smart and strategically from beginning to end.
