Understanding Normal and Clinical Nutrition Jul 04 2021  
This updated 12th Edition of UNDERSTANDING NORMAL AND CLINICAL NUTRITION presents the fundamentals of nutrition and nutrition therapy along with their practical applications to daily life and clinical settings. Starting with normal nutrition, the authors introduce nutrients and their physiological impacts, as well as nutritional guidelines for good health and disease prevention. Coverage of clinical nutrition includes the latest information on pathophysiology and dietary changes for treating a variety of medical conditions, from obesity and pregnancy to cardiovascular diseases, diabetes, and HIV. Known for a consistent and student-friendly narrative, the book includes systematic "How To" discussions, clinical case studies, review questions, and in-depth "Highlight" sections to help students master key topics, Important Notice: Media content

Secure Coding Rules for Java Aug 17 2022 3+ Hours of Video Instruction Secure Coding Rules for Java: Serialization LiveLessons provides developers with practical guidance for securely implementing Java Serialization. Overview Secure coding expert, Robert C. Seacord trains developers to understand Java serialization and the inherent security risks. Seacord also demonstrates how to securely implement serializable classes and evaluate mitigation strategies and alternative solutions. Java deserialization is an insecure language features that is widely used both directly by applications and indirectly by Java modules and libraries. Deserialization of untrusted streams can result in remote code execution (RCE), denial-of service (DoS), and a range of other exploits. Applications can be vulnerable to these attacks even when they are free from coding defects. Related Titles: Secure Coding Rules in Java: Part 1 LiveLessons (Video) The CERT Oracle Secure Coding Standard for Java (Book) Java Coding Guidelines: 75 Recommendations for Reliable and Secure Programs (Book) About the Instructor Robert C. Seacord is a Technical Director with NCC Group where he works with software developers and software development organizations to eliminate vulnerabilities resulting from coding errors before they are deployed. Previously, Robert led the secure coding initiative in the CERT Division of Carnegie Mellon University's Software Engineering Institute (SEI). Robert is also an adjunct professor in the School of Computer Science and the Information Networking Institute at Carnegie Mellon University. Robert is the author of six books, including The CERT C Coding Standard, Second Edition (Addison-Wesley, 2014), Secure Coding in C and C++, Second Edition (Addison-Wesley, 2013), The CERT Oracle Secure Coding Standard for Java (Addison-Wesley, 2012), and Java Coding Guidelines: 75 Recommendations for Reliable and Secure Programs (Addison-Wesley, 2014). Robert is on the Advisory Board for the Linux Foundation and an expert on the ISO/IEC JTC1/SC22/WG14

international standardization working group for the C programming language. Skill Level Advanced Learning objectives: Understand Java object serialization Understand serialization security risks Understand deserialization vulnerabilities How to securely implement serializable classes Evaluate migration strategies Evaluate alternative solutions Who Should Take This Course Experienced Java developers Course Requirements Understanding of programming and development Expe...

Java Coding Standards Jun 27 2023 "A must-read for all Java developers. . . . Every developer has a responsibility to author code that is free of significant security vulnerabilities. This book provides realistic guidance to help Java developers implement desired functionality with

security, reliability, and maintainability goals in mind.”  
–Mary Ann Davidson, Chief Security Officer, Oracle Corporation Organizations worldwide rely on Java code to perform mission-critical tasks, and therefore that code must be reliable, robust, fast, maintainable, and secure. Java™ Coding Guidelines brings together expert guidelines, recommendations, and code examples to help you meet these demands. Written by the same team that brought you The CERT® Oracle® Secure Coding Standard for Java™, this guide extends that previous work’s expert security advice to address many additional quality attributes. You’ll find 75 guidelines, each presented consistently and intuitively. For each guideline, conformance requirements are specified; for most, noncompliant code examples and compliant solutions are also offered. The authors explain when to apply each guideline and provide references to even more detailed information. Reflecting pioneering research on Java security, Java™ Coding Guidelines offers updated techniques for protecting against both deliberate attacks and other unexpected events. You’ll find best practices for improving code reliability and clarity, and a full chapter exposing common misunderstandings that lead to suboptimal code. With a Foreword by James A. Gosling, Father of the Java Programming Language

The Macrobiotic Way Jun 22 2020 The third edition of the "bible" of the macrobiotic movement. Originally published in 1985, The Macrobiotic Way is a classic in its field. It is the definitive guide to macrobiotics, an approach to diet and lifestyle that promotes both inner peace and harmony with others and the environment through plant-based whole foods. Now updated, it covers not only the central dietary principles, nutrition, and foods but also cooking techniques, essentials for a macrobiotic kitchen, menus and recipes, along with exercise, life philosophy, home and lifestyle, and the role of macrobiotics in natural healing.

*Secure Coding Rules for Java, Part I Aug 25 2020 6+ Hours  
of Video Instruction Overview Java Professional Development  
LiveLessons provides developers with practical guidance for  
developing Java programs that are robust and secure. These  
LiveLessons complement The CERT Oracle Secure Coding  
Standard for Java . Description In this video training,  
Robert provides complementary coverage to the rules in The  
CERT Oracle Secure Coding Standard for Java, demonstrating  
common Java programming errors and their consequences using  
Java 8 and Eclipse. Robert describes language behaviors left  
to the discretion of JVM and compiler implementers and  
guides developers in the proper use of Java's APIs including  
lang, util, Collections, Concurrency Utilities, Logging,  
Management, Reflection, Regular Expressions, Zip, I/O, JMX,  
JNI, Math, Serialization, and JAXP. About the Instructor  
Robert C. Seacord is the secure coding technical manager in  
the CERT Division of Carnegie Mellon's Software Engineering  
Institute (SEI) in Pittsburgh, Pennsylvania. Robert is also  
a professor in the Institute for Software Research and the  
Information Networking Institute at Carnegie Mellon  
University. He is the author of eight books on software  
development including The CERT ® Oracle ® Secure Coding  
Standard for Java TM (Addison- Wesley, 2012) and JavaTM  
Coding Guidelines 75 Recommendations for Reliable and Secure  
Programs (Addison-Wesley, 2013). He has also published more  
than sixty papers on software security, component-based  
software engineering, web-based system design, legacy-system  
modernization, component repositories and search engines,  
and user interface design and development. Skill Level  
Advanced What You Will Learn How to perform common Java  
language programming tasks correctly. How to avoid  
programming errors that are not detected or reported by the  
compiler. How to develop programs that are robust, reliable,  
secure, and fast. Who Should Take This Course Java*

developers who wish to make the transition from a skilled amateur to a software professional capable of developing code that has to work. Commission on No Child Left Behind Summary of Key Recommendations Affecting Students with Learning Disabilities Nov 20 2022 The Commission on No Child Left Behind (the Commission), a bipartisan, independent commission formed to develop recommendations for the upcoming reauthorization of the No Child Left Behind Act, released its report on February 13, 2007. The Commission spent the past year traveling across the country, hearing from students, educators, parents, administrators, state and district officials, experts and policymakers in order to develop its report, which provides 75 recommendations. For more information on the Commission and to access the full report visit the Web site of the Commission on No Child Left Behind. While most of the Commission's recommendations will have some affect on students with disabilities--who currently make up more than 13 percent of public school enrollment--this article provides a summary of the Commission's recommendations that are specific to or will have significant impact on those students. A brief list of additional resources is also included. (Contains 1 exhibit.).

Bisexuality in Education Nov 08 2021 Although many schools and educational systems, from elementary to tertiary level, state that they endorse anti-homophobic policies, pedagogies and programs, there appears to be an absence of education about, and affirmation of, bisexuality and minimal specific attention paid to bi-phobia. Bisexuality appears to be falling into the gap between the binary of heterosexuality and homosexuality that informs anti-homophobic policies, programs, and practices in schools initiatives such as health education, sexuality education, and student welfare. These erasures and exclusions leave bisexual students, family members and educators feeling silenced and invisibilized within school communities. Also absent is attention to intersectionality, or how indigeneity, gender, class, ethnicity, rurality and age interweave with bisexuality. Indeed, as much research has shown, erasure, exclusion, and the absence of intersectionality have been considered major factors in bisexual young people, family members and educators in school communities experiencing worse mental, emotional, sexual and social health than their homosexual or heterosexual counterparts. This book is the first of its kind, providing an international collection of empirical research, theory and critical analysis of existing educational resources relating to bisexuality in education. Each chapter addresses three significant issues in relation to bisexuality and schooling: erasure, exclusion, and the absence of intersectionality. From indigenous to rural schools, from tertiary campuses to elementary schools, from films to picture books as curriculum resources, from educational theory to the health and wellbeing of bisexual students, this book's contributors share their experiences, expertise and ongoing questions. This book was originally published as a special issue of the Journal of Bisexuality.
