[Python Brain Teasers](#) Jan 17 2023 We geeks love puzzles and solving them. The Python programming language is a simple one, but like all other languages it has quirks. This book uses those quirks as teaching opportunities via 30 simple Python programs that challenge your understanding of Python. The teasers will help you avoid mistakes, see gaps in your knowledge, and become better at what you do. Use these teasers to impress your co-workers or just to pass the time in those boring meetings. Teasers are fun! At the beginning of each chapter I'll show you a short Python program and will ask you to guess the output. The possible answers can be: Syntax errorExceptionHangSome output (e.g. `[1 2 3]`) Here's how to approach the puzzles. Read through the code. Before moving on to the answer and the explanation, go ahead and guess the output. After guessing the output, run the code and see the output yourself. Finally proceed to read the solution and the explanation. The puzzles are short enough to solve on a coffee break, so carry them with you, have fun, and share them with co-workers. People who make mistakes during the learning process learn better than people who don't. If you use this approach at work when fixing bugs, you'll find you enjoy bug hunting more and become a better developer after each bug you fix. Many of these puzzles are from the author's lessons learned (and others) of shipping bugs to production. He often uses the puzzles as quizzes during conferences and meetups, and they tend to create a buzz of excitement. What You Need: You need to know Python at some level and have experience programming with it.NOTE: The book uses Python version 3.8.2 to run the code; the output `_could_` change in future versions.You will need a working Python environment, you can download it from "python.org":<https://www.python.org/downloads/>.You will probably want a good IDE for python, two of the most popular ones are "Visual Studio Code":<https://code.visualstudio.com/> and "PyCharm":<https://www.jetbrains.com/pycharm/>.

[The Corpse with the Silver Tongue](#) Jun 29 2021 In the south of France where hatred simmers in the heat, a man seemingly admired, and certainly feared, drops dead at a dinner party. All of the guests fall under suspicion, including Welsh-Canadian professor Cait Morgan. A criminologist who specializes in profiling victims, Cait sets out to solve the murder—and clear her name. Add to this the disappearance of an ancient Celtic gold collar said to be cursed and there you have the ingredients for a Nicoise salad of death, secrets, and lies. Will Cait find the killer before she too falls victim to a murderer driven by a surprising and disturbing motive? The Corpse with the Silver Tongue is the first in the Cait Morgan mystery series, a classic whodunit series featuring the eccentric Professor Cait Morgan.

[The Best Book On Getting An IBanking Internship](#) Nov 15 2022 WANT TO LAND AN INTERNSHIP AT JP MORGAN? Our internship expert, Erin, has fought for her spot at top bulge bracket banks and boutique firms. She knows how stressful it can be to face case study questions at interviews, and she wants to help you stand out from the thousands of other applicants to earn your position at JP Morgan. Erin guides you step-by-step from interview preparation to conquering the 90-hour work week. You're a business major with dreams of a fast-paced, high-intensity career on Wall Street. You know that internships and work experience are the key to landing jobs after college, and you'll need every possible advantage to outshine other qualified students competing for the same summer internship. However, many other guides substitute fluff for practical advice, and you want to hear the strategies for success from a real intern. Erin's tips will give you an unfair advantage over your toughest competitors as you network at info sessions, nail your interview questions, and rise to the top of your internship class. WHAT YOU'LL GET FROM OUR INSIDER'S GUIDE: \* An interview handbook with 200+ advanced interview practice questions and 5 tips to stand out from the competition \* A comprehensive style guide for writing the 4 types of cover letters and highlighting your deliverables rather than responsibilities on your resume Insider scoop on what bankers look for in successful intern applicants \* A survival guide for banking life: building your own social empire, dressing for success, & conquering fatigue MEET ERIN PARKER Erin is an economics student at Stanford University. She has had three investment banking internships spanning UBS (private wealth management), FT Partners (financial technology coverage), and J.P. Morgan in New York (syndicated and leveraged finance). She is co-president of Blyth Fund, a six-figure student investing group, and is on the board of Stanford Finance. Erin is also the Finance Director of Gumball Capital, a student-run startup whose mission is poverty alleviation. WHAT READERS ARE SAYING: "I wish that this book had existed when I was applying for positions back in college. I was a economics major with almost no real job experience, and it must have shown in my interviews. I got lucky because UBS was willing to take a chance on me as a summer intern, which led me to get where I am now. If I could do it again, though, I would take the much easier route and read this book. It would have prepared me for the parts of the job I never imagined." - First Year Analyst At Citigroup "Applying for my summer internship was a rough experience- I was afraid that I would never get the chance to show my skill in investment research to big companies because I would be rejected before I ever made it to the internship stage. Fortunately for me, this book helped me prepare and build my interview skills to the point where I felt that I had not just a fair shot at the job but an unfair advantage over the other candidates. It's a must read." - Current Intern At Goldman Sachs

[Mind-Boggling One-Minute Mysteries and Brain Teasers](#) Oct 14 2022 More than 100,000 copies of One-Minute Mysteries and Brain Teasers and Return of the One-Minute Mysteries and Brain Teasers have been sold (combined), and now Sandy Silverthorne and John Warner offer an all-new collection of family-friendly lateral thinking puzzles. Each page includes an unusual scenario that ends with a question for readers to answer as well as a delightful cartoon that depicts a laughably incorrect assumption. To find the one satisfying answer for each puzzle, readers must throw out all preconceived notions and be open-minded, flexible, and creative. Increasingly revealing clues for each puzzle are included in the back of the book, as are the solutions. These riddles are challenging enough for adults yet appropriate for detectives of all ages. Individual readers, families, and groups can enjoy hours of fun solving them and learning to think outside the box.

[Algorithmic Puzzles](#) Jul 19 2020 Algorithmic puzzles are puzzles involving well-defined procedures for solving problems. This book will provide an enjoyable and accessible introduction to algorithmic puzzles that will develop the reader's algorithmic thinking. The first part of this book is a tutorial on algorithm design strategies and analysis techniques. Algorithm design strategies — exhaustive search, backtracking, divide-and-conquer and a few others — are general approaches to designing step-by-step instructions for solving problems. Analysis techniques are methods for investigating such procedures to answer questions about the ultimate result of the procedure or how many steps are executed before the procedure stops. The discussion is an elementary level, with puzzle examples, and requires neither programming nor mathematics beyond a secondary school level. Thus, the tutorial provides a gentle and entertaining introduction to main ideas in high-level algorithmic problem solving. The second and main part of the book contains 150 puzzles, from centuries-old classics to newcomers often asked during job interviews at computing, engineering, and financial companies. The puzzles are divided into three groups by their difficulty levels. The first fifty puzzles in the Easier Puzzles section require only middle school mathematics. The sixty puzzle of average difficulty and forty harder puzzles require just high school mathematics plus a few topics such as binary numbers and simple recurrences, which are reviewed in the tutorial. All the puzzles are provided with hints, detailed solutions, and brief comments. The comments deal with the puzzle origins and design or analysis techniques used in the solution. The book should be of interest to puzzle lovers, students and teachers of algorithm courses, and persons expecting to be given puzzles during job interviews.

[Quant Job Interview Questions and Answers](#) Sep 20 2020 The quant job market has never been tougher. Extensive preparation is essential. Expanding on the successful first edition, this second edition has been updated to reflect the latest questions asked. It now provides over 300 interview questions taken from actual interviews in the City and Wall Street. Each question comes with a full detailed solution, discussion of what the interviewer is seeking and possible follow-up questions. Topics covered include option pricing, probability, mathematics, numerical algorithms and C++, as well as a discussion of the interview process and the non-technical interview. All three authors have worked as quants and they have done many interviews from both sides of the desk. Mark Joshi has written many papers and books including the very successful introductory textbook, "The Concepts and Practice of

Mathematical Finance."

**Mind Puzzle for Adults** May 29 2021 Yajilin (also known as "Arrow Ring", "Straight and Arrow") is a type of logic puzzle published by Nikoli. The goal is to draw a single continuous non-intersecting loop that connects the centres of the grid cells. The loop may not pass through any cells which contain arrows. The loop may only travel horizontally or vertically, and never diagonally. Any cell that does not have an arrow and which is not part of the loop must be shaded in black. Black cells do not touch each other orthogonally (they do not share a side). A cell containing a number and an arrow represents how many black cells are in the row or column pointed at by the arrow. There may be black cells that are not accounted for by the cells with arrows and numbers. brain teaser puzzles - brain teaser games - brain teasers for adults - brain puzzle games - number puzzles - fun for the brain - puzzle games for adults - brain busters - math brain teasers - brain teasers riddles - mind puzzle games - brain teasers riddles with answers - logic brain teasers - brain teasers and answers - riddles and brain teasers - mind teaser games

**Guesstimation** Mar 07 2022 Guesstimation is a book that unlocks the power of approximation--it's popular mathematics rounded to the nearest power of ten! The ability to estimate is an important skill in daily life. More and more leading businesses today use estimation questions in interviews to test applicants' abilities to think on their feet. Guesstimation enables anyone with basic math and science skills to estimate virtually anything--quickly--using plausible assumptions and elementary arithmetic. Lawrence Weinstein and John Adam present an eclectic array of estimation problems that range from devilishly simple to quite sophisticated and from serious real-world concerns to downright silly ones. How long would it take a running faucet to fill the inverted dome of the Capitol? What is the total length of all the pickles consumed in the US in one year? What are the relative merits of internal-combustion and electric cars, of coal and nuclear energy? The problems are marvelously diverse, yet the skills to solve them are the same. The authors show how easy it is to derive useful ballpark estimates by breaking complex problems into simpler, more manageable ones--and how there can be many paths to the right answer. The book is written in a question-and-answer format with lots of hints along the way. It includes a handy appendix summarizing the few formulas and basic science concepts needed, and its small size and French-fold design make it conveniently portable. Illustrated with humorous pen-and-ink sketches, Guesstimation will delight popular-math enthusiasts and is ideal for the classroom.

*Effective Apology* May 09 2022 There's nothing easy about apology. The news is filled with examples of leaders apologizing, needing to apologize, or failing miserably at the attempt. And certainly we all have occasion to apologize ourselves—maybe more often than we realize. But we don't need more apologies, says John Kador—we need better ones. Too many people just go through the motions, missing out on the power of apology to restore strained relationships, create possibilities for growth, and generate better outcomes for all. *Effective Apology* challenges you to think about the fundamental value and importance of apology as it delivers detailed advice for making an apology that truly heals and renews. Kador explores the Five Rs of apology: Recognize the wrong and the person harmed; accept moral Responsibility for your actions; express Remorse; provide meaningful Restitution; and offer assurance that the offense will not be Repeated. Making apology work in the real world—when and how to apologize, in what medium, and how to make it stick—is made clear through over seventy examples of good and bad apologies drawn from the news, popular culture, and the experiences of Kador, his clients, and his friends. The willingness to apologize signals strength, character, and integrity. Effective leadership is impossible without effective apology. John Kador shows how to craft and deliver a confident apology that will defuse resentment, reduce litigation, create goodwill, and transform a relationship ruptured by mistrust and disappointment into something stronger and more durable than it ever was before.

**The Monty Hall Problem** Feb 18 2023 Mathematicians call it the Monty Hall Problem, and it is one of the most interesting mathematical brain teasers of recent times. Imagine that you face three doors, behind one of which is a prize. You choose one but do not open it. The host—call him Monty Hall—opens a different door, always choosing one he knows to be empty. Left with two doors, will you do better by sticking with your first choice, or by switching to the other remaining door? In this light-hearted yet ultimately serious book, Jason Rosenhouse explores the history of this fascinating puzzle. Using a minimum of mathematics (and none at all for much of the book), he shows how the problem has fascinated philosophers, psychologists, and many others, and examines the many variations that have appeared over the years. As Rosenhouse demonstrates, the Monty Hall Problem illuminates fundamental mathematical issues and has abiding philosophical implications. Perhaps most important, he writes, the problem opens a window on our cognitive difficulties in reasoning about uncertainty.

**Heard on the Street** Jan 05 2022 [Note: eBook version of latest edition now available; see Amazon author page for details.] THIS IS A MUST READ! It is the first and the original book of quantitative questions from finance job interviews. Painstakingly revised over 25 years and 20 editions, *Heard on The Street* has been shaped by feedback from many hundreds of readers. With well over 60,000 copies in print, its readership is unmatched by any competing book. The revised 20th edition contains over 225 quantitative questions collected from actual job interviews in investment banking, investment management, and options trading. The interviewers use the same questions year-after-year, and here they are with detailed solutions! This edition also includes over 225 non-quantitative actual interview questions, giving a total of more than 450 actual finance job interview questions. There is also a recently revised section on interview technique based on Dr. Crack's experiences interviewing candidates and also based on feedback from interviewers worldwide. The quant questions cover pure quant/logic, financial economics, derivatives, and statistics. They come from all types of interviews (corporate finance, sales and trading, quant research, etc.), and from all levels of interviews (undergraduate, MS, MBA, PhD). The first seven editions of *Heard on the Street* contained an appendix on option pricing. That appendix was carved out as a standalone book many years ago and it is now available in its revised fourth edition: "Basic Black-Scholes" (ISBN: 978-0-9941386-8-2). Dr. Crack did PhD coursework at MIT and Harvard, and graduated with a PhD from MIT. He has won many teaching awards, and has publications in the top academic, practitioner, and teaching journals in finance. He has degrees/diplomas in Mathematics/Statistics, Finance, Financial Economics and Accounting/Finance. Dr. Crack taught at the university level for over 25 years including four years as a front line teaching assistant for MBA students at MIT, and four years teaching undergraduates, MBAs, and PhDs at Indiana University. He has worked as an independent consultant to the New York Stock Exchange and to a foreign government body investigating wrong doing in the financial markets. His most recent practitioner job was as the head of a quantitative active equity research team at what was the world's largest institutional money manager.

**How to Ace the Brainteaser Interview** Aug 24 2023 The inside track on how to beat the "logic puzzle" job interview As if job interviews weren't nerve-wracking enough, many companies, in their pursuit of the brightest and best, have begun beleaguering applicants with tests of logic, creativity, and analytical abilities. Many firms have replaced traditional interview questions such as "Tell us about yourself" or "What's your biggest weakness?" with mind-benders such as: Why are beer cans tapered at both ends? How many piano tuners are there in the world? How many Ping-Pong balls can you stuff into a Boeing 747? How would you design a bathroom for the CEO of the company? If you could remove any one of the 50 U.S. states, which one would it be? In *How to Ace the Brain Teaser Interview*, bestselling careers author John Kador gives readers the inside track on this new interview technique. He provides 75 puzzles actually used by HR departments across the nation, and he offers tips on how to solve them and present the solutions so as to make the best possible impression.
