The Eleventh Edition is organized around: (1) elements of the basic communication model—communicator, message, medium, and “beyond” human communication; and (2) communication contexts—relationship, group, organization, health, culture, and society. A new chapter discusses four frameworks by which theories can be organized; students can see how theories contribute to and are impacted by larger issues about the nature of inquiry. To provide comprehensive, up-to-date coverage of theories, the authors surveyed articles in communication journals published over the last five years. Each chapter covers an average of 13 theories, half of which are new to this edition. New areas covered include health, social media, and “beyond human communication”—communication between humans and nature, humans and objects, humans and technology, humans and the divine. “From the Source” boxes give students a look at the theorists behind the theories—their inspirations, motivations, and goals. Written in an accessible style, the book is ideal for

upper-division undergraduate classes and as a comprehensive summary of major theories for the graduate level. “This marvelous book, splendidly researched, packed with terrific advice and considerable insider information, is essential reading for any visitor.” — Robert Parker, *The Wine Advocate* Dive into the richness of this remarkable region. Dubbed “the industry bible” by the Los Angeles Times, *All You Need to Know About the Music Business* by veteran music lawyer Donald Passman is the go-to guide for everyone in the music business through ten editions, over thirty years, and over a half a million copies sold. Now with updates explaining why musicians have more power today than ever in history; discussion of the mega-million-dollar sales of artists’ songs and record catalogs; how artist access to streaming media, and particularly TikTok, has completely reshaped the music business; the latest on music created by AI; and a full update of the latest numbers and trends. For the first time in history, music is no longer monetized by selling something—it’s monetized by how many times a listener streams a song. And also, for the first time, artists can get their music to listeners without a record company gatekeeper, creating a new democracy for music. The “industry bible” (Los Angeles Times), now updated, is essential for anyone in the music business—musicians, songwriters, lawyers, agents, promoters, publishers, executives, and managers—and the definitive guide for anyone who wants to be in the business. So, whether you are—or aspire to be—in the music industry, veteran music lawyer Passman’s comprehensive guide is an indispensable tool. He offers timely information about the latest trends, including the reasons why artists have more clout than ever in history, the massive influence of TikTok, the mega million dollar sales of artists’ songs and record catalogs, music in Web3 and the Metaverse, music created by AI, and a full update of the latest numbers and practices.
