Intelligence Agencies, Technology and Knowledge Production Feb 03 2022 This volume examines intelligence services since 1945 in their role as knowledge producers. Intelligence agencies are producers and providers of arcane information. However, little is known about the social, cultural and material dimensions of their knowledge production, processing and distribution. This volume starts from the assumption that during the Cold War, these core activities of information services underwent decisive changes, of which scientization and computerisation are essential. With a focus on the emerging alliances between intelligence agencies, science and (computer) technology, the chapters empirically explore these transformations and are characterised by innovative combinations of intelligence history with theoretical considerations from the history of science and technology and the history of knowledge. At the same time, the

book challenges the bipolarity of Cold War history in general and of intelligence history in particular in favour of comparative and transnational perspectives. The focus is not only the Soviet Union and the United States, but also Poland, Turkey, the two German states and Brazil. This approach reveals surprising commonalities across systems: time and again, the expansion and use of intelligence knowledge came up against the limits that resulted from intelligence culture itself. The book enriches our global understanding of knowledge of the state and contributes to a historical framework for the past decade of debates about the societal consequences of intelligence data processing. This book will be of much interest to students of intelligence studies, science and technology studies, security studies and International Relations.

Proceedings of the 20th Congress of the International Ergonomics Association (IEA 2018) Dec 21 2020 This book presents the proceedings of the 20th Congress of the International Ergonomics Association (IEA 2018), held on August 26-30, 2018, in Florence, Italy. This volume includes papers addressing Organizational Design and Management.

Latin American Trade Agreements Aug 29 2021 For the first

time, all the most important Latin American economic integration programs are explored in the same volume in English: the Latin American Integration System (ALADI); MERCOSUR; the Andean Community; the G-3 Accord between Colombia, Venezuela, and Mexico; and the Central American Integration System (SICA). Latin American Trade Agreements explains how all of these sub-regional programs operate and where the opportunities are for foreign direct investors and exporters. It provides concrete examples of companies using the integration projects as part of their strategic business planning for Latin America. It also discusses the many opportunities available in transportation infrastructure development and intra-Latin American logistics. The Appendices include English translations of the trade agreements and important rules and regulations. Latin American Trade Agreements not only focuses on the rules for trade in goods and services, but also examines how the sub-regional projects and each member state treat subjects as diverse as environmental protection, intellectual property rights, foreign direct investment, as well as labor and tax laws. This looseleaf is an asset to lawyers, trade specialists, and international strategic planners.

Research Collaboration between Europe and Latin America Apr 24 2021 International collaboration has become increasingly important in carrying out research activities. This book, written by a large group of scholars from Europe and Latin America, maps, analyses and discusses research collaboration between the two continents during the last twenty years. The empirical material underlines the richness and the variety of the links that bind the two continents, well beyond the simplified views of science, either as the brainchild of global networking or as a result of dependence. The book also develops an innovative methodological approach, combining bibliometric analysis, social surveying, in-depth interviews, and a careful analysis of research programmes and policies. While arguing that the asymmetry of relations that once existed in cooperation has turned into a more equal partnership between the two continents, it deciphers some of the reasons behind this more balanced cooperation. It also challenges the view of science as a global self-organising system

through collective action at the level of researchers themselves. On the contrary, the importance of policy, institutions, and previously developed research is highlighted and recognised

An Economic History of Portugal, 1143-2010 Dec 01 2021 This book offers a fascinating exploration of the evolution of the Portuguese economy over the course of eight centuries, from the foundation of the kingdom in 1143, when political boundaries began to take shape in the midst of the Christian Reconquista of the Iberian Peninsula, and the formation of an empire, to the integration of the nation into the European Communities and the Economic and Monetary Union. Through six chapters, the authors provide a vibrant history of Portugal's past with a focus ranging from the medieval economy and the age of globalization, to war and recovery, the Atlantic economy, the rise of liberalism and patterns of convergence. The book provides a unique long-term perspective of change in a southern European country and its empire, which responds to the fundamental broader questions about when, how and why economies expand, stagnate or contract.

Christ Meets Culture Oct 19 2020 How does Christ meet, engage, change, challenge, dialogue, interact with, and bridge cultures? What is the role of the gospel in transforming ethics and culture? These daunting questions guide the present investigation about Evangelical Christianity in Brazil, the largest Catholic country in the world. This book critiques the quantitative and qualitative growth of Evangelical Christianity in Brazil and presents tools for studying the global south and other cultures. Indeed,

sociocultural factors play a significant role in the translation of the gospel and may work as bridges and/or barriers within the cultural and religious milieu of the largest country in Latin American. Particularly, four traits impacts the preaching of the Christian message in Brazil, namely: cordiality, religiosity, the Brazilian way of coping, and collectivism. Through oral history methodology, and literature review, this book evaluates how biblically sound translation happens through the Brazilian Baptist Convention as suggested by key leadership writings, practices, and memoirs. This work features an overview of the history of Brazilian Christianity, including its Animistic background, African-Brazilian religious influences, the present Pentecostal majority, and the challenge of Neopentecostalism, in an era of music, TV, and social media.

***Frontiers in Ecology, Evolution and Complexity Jan 22 2021
Advances in molecular biology, remote sensing, systems biology, bioinformatics, non-linear science, the physics of complex systems and other fields have rendered a great amount of data that remain to be integrated into models and theories that are capable of accounting for the complexity of ecological systems and the evolutionary dynamics of life. It is thus necessary to provide a solid basis to discuss and reflect on these and other challenges both at the local and global scales. This volume aims to delineate an integrative and interdisciplinary view that suggests new avenues in research and teaching, critically discusses the scope of the diverse methods in the study of complex systems, and points at key open questions. Finally, this book will provide students and specialists with a collection of high quality open access essays that will contribute to integrate Ecology, Evolution and Complexity in the context of basic research and in the field of Sustainability Sciences.***

Gypsy Economy Apr 17 2023 Economic arrangements of Romanies are complexly related to their social position. The authors of this volume explore these complexities, including how economic exchanges forge key social relationships of gender and ethnicity, how economic opportunities are constructed and seized, and how economic success and failure are transformed into attributes of social persons. They explore how, despite – or perhaps because of – their unstable and ambiguous position within the market economy, shared today with a growing number of people facing precarity and informalisation, Roma and Gypsy communities continuously re-create more or less viable economic strategies. The ethnographically based chapters share accounts of socially and economically vulnerable populations that face their situation with self-determination and creativity.

The Critique of Coloniality Jun 26 2021 This translation of Rita Segato's seminal book *La crítica de la colonialidad en ocho ensayos* offers an anthropological and critical perspective on the coloniality of power as theorized by the Peruvian thinker Aníbal Quijano. Segato begins with an overview of Quijano's conceptual framework, emphasizing the power and richness of his theory and its relevance to a range of fields. Each of the seven subsequent chapters presents a scenario in which a persistent colonial structure or form of subjectivity can be identified. These essays address urgent issues of gender, sexuality, race and racism, and indigenous forms of life. They set the decolonial perspective to work, and are connected by two central preoccupations: the critical analysis of coloniality and the effort to reimagine

anthropology as "responsive anthropology," a practice at once answerable and useful to the communities previously regarded as the "objects" of ethnographic thought. The Critique of the Coloniality makes important and original contributions to our understanding of colonial and decolonial processes, drawing on the author's experience of feminist and antiracist movements and struggles for indigenous and human rights. This book will appeal to students and scholars working in anthropology, Latin American studies, political theory, feminist and gender studies, indigenous studies, and anticolonial, post-colonial, and decolonial thought.

established practitioners and new researchers. Informed by experienced scholarship and fresh studies, this handbook shares international perspectives on language education from policy and curriculum to teacher training and future directions. Recognition of Foreign Administrative Acts May 06 2022 This book presents an analysis of the concept of the administrative act and its classification as 'foreign', and studies the administrative procedure for adopting administrative acts in a range of countries in and outside Europe. While focusing on the recognition and execution of foreign administrative acts, the book examines the validity, efficacy and enforceability of foreign administrative acts at national level. The book starts with a general analysis of the issue, offering general conclusions about the experiences in different countries. It then analyses the aforementioned themes from the perspective of the domestic law of different European nations and a number of international organisations (European Union, MERCOSUR, and Andean Community). In addition, the book studies the role of the European Union in the progress towards the recognition and execution of foreign administrative acts, where the principle of mutual recognition plays a vital part. Finally, the book analyses the international conventions on the recognition and execution of administrative acts and on the legalisation of public documents.

concepção de pensamento crítico que findam demonstrar a riqueza existente no anarquismo teórico e metodológico em resposta à complexa realidade curricular, razão pela qual convidamos você leitor(a) a nos acompanhar à luz do ecletismo registrado nos estimulantes estudos de cada um dos capítulos.

Football, Gambling, and Money Laundering May 26 2021

Professional football means many things to many people. For players, a means to possible fame and fortune. For fans, a source of local or national pride, and perhaps the chance to score with a few bets. For criminal organizations, a cover for making millions in corrupt enterprises. In the world of gambling this is no different. Football, Gambling, and Money Laundering describes in impressive detail the scope of the problem, the layers of denial that allow sports-related financial crime to flourish, and the steps that are being taken--and that need to be taken--to combat illicit operations in the sports world. Expert analysis explains criminal activity in the context of football, and how sports governing bodies, the media, and others have created a culture that regularly turns a blind eye. International data and instructive legal case examples shed light on the role of the Internet in the spread of gambling and money laundering as well as the strengths and weaknesses of current law enforcement, legislative, and sports-based efforts in fighting corruption. Included in the coverage: • Criminal activity in the sports world • Financial crime and exploitation in football and gambling • Legal wagering and illegal betting, including online • Illegal and disguised payment instruments used by organized crime • International legal cooperation in combating money laundering • National and international proposals for improving the sports and gambling industries to prevent money laundering An authoritative reference to a growing and wide-reaching concern, Football, Gambling, and Money Laundering will find an interested audience among academics, prosecutors, judges, law enforcement officials, and others involved in efforts to curb corruption and money laundering in the world of football.

Language, Education and Neoliberalism Oct 11 2022 This edited volume presents an empirical account of how neoliberal ideas are adopted on the ground by different actors in different educational settings, from bilingual education in the US, to migrant work programmes in Italy, to minority language teaching in Mexico. It examines language and education as objects of neoliberalization

and as powerful tools and sites through which ideological principles underpinning neoliberal societies and economies are (re)produced and maintained (and with that, inequality and exclusion). This book aims to produce a complex understanding of how neoliberal rationalities are articulated within locally anchored and historical regimes of knowledge on language, education and society.

Construction Robots: Volume 3 Mar 16 2023 Learn how Single-Task Construction Robots (STCRs) can improve productivity in the construction industry with this cross-disciplinary text. This third volume in The Cambridge Handbooks in Construction Robotics series discusses the STCRs employed on construction sites since the development of the approach in the 1980s, presents current applications, and highlights upcoming trends in the construction automation and robotics field. Two hundred different types of STCR are presented, from the simplest models comprising simple manipulators and mobile platforms, to those utilizing more sophisticated technologies such as aerial robotics, swarm robotics, exoskeletons, additive manufacturing technologies, self-assembling building structures, and humanoid robotics. Real-world case studies demonstrate the different application scenarios for each approach, and highlight the key implementation and management issues. Direito Constitucional e Administrativo Sem Fronteiras Sep 10 2022 Nos últimos anos, tenho vindo a escrever sobre as modernas questões do Direito Constitucional e Direito Administrativo Sem Fronteiras, em que procuro combinar a tripla vertente da análise do Direito Comparado, do Direito Europeu e do Direito Global, adotando uma versão cosmopolita e multilateral dos fenómenos jurídico-públicos. Em causa está uma tentativa de reconstrução do Direito Constitucional e Administrativo dos nossos dias, em face das transformações decorrentes do Estado Pós-Social. O que

se torna ainda mais importante, no momento de crise atual, em que se confrontam os desafios dos fenômenos jurídicos globais, do futuro a construir, com os riscos das tentações populistas e extremistas, ressurgidos das brumas do passado.

Políticas educativas y justicia social May 14 2020 Lejos de las imágenes y esperanzas de prosperidad con las que se solía proyectar el futuro en educación, todo indica que hemos avanzado en desigualdad y privatización. En este contexto, cobra enorme relevancia preguntarse por las orientaciones actuales de la política educativa, así como por las relaciones teóricas y políticas entre la educación y la justicia social, tanto en el plano global como en el local. Este libro surgió del interés por compartir algunos análisis e investigaciones que se inscriben en esas inquietudes, acercando autores de distintos países. El contenido es diverso, como diversas son las preocupaciones y los interrogantes en cada territorio, pero en conjunto nos brinda un interesante panorama que recorre tópicos y debates que hoy están delineando las agendas de política pública en relación con los sistemas escolares. En estas páginas se analizan las formas de relación entre el Estado y el mercado en el contexto actual, donde los intereses privatizadores han transformado sus modos de influencia y su rango de acción. En segundo lugar, se aborda un tema central de las agendas internacionales y nacionales en el presente siglo: la inclusión, los sentidos que asume y las variadas e incluso contradictorias políticas que se proponen en relación con ella. Finalmente, se incluyen las políticas educativas de ajustes fiscales, eficacia y rendición de cuentas que impulsan reformas educativas de bajo costo y des-responsabilización de los Estados, conduciendo a profundizar las brechas en sociedades cada vez más injustas. Este conjunto de textos comparten una convicción: en los tiempos que corren y en sociedades tan desiguales como las nuestras, es imprescindible colocar a la justicia social como horizonte y al Estado como garante del derecho a la educación.

Estudos de Direito e Segurança Volume II Sep 17 2020 Os Estudos de Direito e Segurança, obra que agora se publica no seu 2o volume, corresponde à sedimentação de um esforço pioneiro em Portugal no cruzamento de saberes entre as Ciências do

Direito e da Segurança, no âmbito dos Cursos de Mestrado que têm sido ministrados há alguns anos pela Faculdade de Direito da Universidade Nova de Lisboa. Mas o aparecimento de novos temas que este livro tão bem ilustra é também elucidativo do dinamismo que subjaz à respectiva reflexão académica e crítica, que deve perdurar para além do comentário mais imediatista ou até politicamente comprometido, quando não mesmo contaminado. Assim se julga poder contribuir para o aprofundamento destas questões em Portugal, numa altura em que todos falam de Segurança, mas em que poucas são as ocasiões em que o discurso surge ancorado no conhecimento científico que tais matérias naturalmente requerem.

Trabalho sem fronteiras? - O papel da regulação Jul 16 2020 Tal como a modernização dissolveu a estrutura feudal do trabalho no séc. XIX e produziu a sociedade industrial, a modernização hoje está a dissolver a sociedade industrial tal como ela foi estruturada até meados do séc. XX. Desde então os processos de adaptação são exigências constantes desencadeados pelo progresso científico, suscitando novos e maiores riscos, a consequente destandardização do trabalho e desafios aos sistemas de emprego e da proteção social. Este foi o contexto da reflexão realizada por um conjunto de autores ao longo de um ano de comemorações do centenário da criação da inspeção do trabalho em Portugal. Essa reflexão estrutura-se em duas linhas de orientação fundamentais. Num primeiro momento procuram-se identificar os traços fundamentais do trabalho de hoje para abranger temas relacionados com o trabalho e relações de dependência económica, tecnologia e organização do trabalho, trabalho e saúde, o tempo de trabalho e tempo de vida; qualificação e trabalho, trabalho e coesão social. Num segundo momento, mais especificamente vocacionado para a regulação do trabalho, são abordados temas relacionados com o trabalho e a efetividade do direito, o trabalho e a representação de interesses, o trabalho e administração do trabalho.

Pedagogia social Jun 07 2022 Eis um livro que versa sobre Pedagogia Social: educação sem fronteiras. Contém reflexões teórico-práticas, a respeito da Pedagogia Social realizada pelo

Projeto de Ensino, Pesquisa e Extensão em Pedagogia Social para o Século XXI (PIPAS-UFF), no período de emergência sanitária, novos aprendizados colaborativos e instituintes, perpassados pela opção do servir ao próximo mais próximo, a partir do movimento de realizar o que podemos de onde estamos e com o que temos. Um movimento que estabelece o cuidado como categoria fundante e a formação de educadores sociais em, no e para contexto de emergências. Trata-se de uma pesquisa oriunda da senda cardíaca, que traz em seu DNA a opção pelos excluídos da nação. É a cartografia de uma pesquisa forjada no cadinho da “sofrência” humana a produzir alternativas de superação com ciência, convivência, conivência, sapiência e paciência. É com a chancela Freireana que escrevo este artigo, ancorada na compreensão que se impõe cotidianamente, da produção de uma ciência forjada pela coragem do binômio lutar-amar.

Arc Schemes And Singularities Apr 12 2020 This title introduces the theory of arc schemes in algebraic geometry and singularity theory, with special emphasis on recent developments around the Nash problem for surfaces. The main challenges are to understand the global and local structure of arc schemes, and how they relate to the nature of the singularities on the variety. Since the arc scheme is an infinite dimensional object, new tools need to be developed to give a precise meaning to the notion of a singular point of the arc scheme. Other related topics are also explored, including motivic integration and dual intersection complexes of resolutions of singularities. Written by leading international experts, it offers a broad overview of different applications of arc schemes in algebraic geometry, singularity theory and representation theory.

Génesse e consolidação da ideia de Europa: vol. IV: Idade Média e Renascimento Aug 17 2020 Reflete esta obra sobre a identidade europeia, assente em matrizes culturais clássicas e judaico-cristãs. Se hoje podemos afirmar que não existem diferenças substanciais de cultura entre os povos do Ocidente, latinos, germanos ou eslavos, ou entre aqueles que, não sendo europeus, herdaram também uma parte significativa da sua cultura (americanos, australianos ou africanos), isso deve-se a um

passado coletivo e a toda uma herança espiritual, intelectual, ético-política e civilizacional do Mundo Antigo que nunca se apagou por completo. As primeiras nações da Europa Moderna formaram-se sob a influência das gloriosas ruínas da Antiga Roma, síntese da civilização greco-romana e do universalismo cristão. Recorde-se, na Idade Média, Boécio, Cassiodoro, Santo Isidoro de Sevilha, de significação quase simbólica, pelo seu papel na transcrição, conservação e reutilização dos escritos clássicos, e pela importância das suas obras, como fonte do conhecimento e factor de transmissão às sucessivas gerações do Ocidente. E entre todos, S. Tomás de Aquino, intérprete fiel da mensagem ético-política aristotélico-ciceroniana e do direito romano, marco na história do pensamento europeu até à modernidade. O Renascimento, época áurea das cortes europeias é também o momento alto da história, do humanismo e da cultura na Península Ibérica, em Portugal: descobríamos e evangelizávamos novos mundos, enriquecíamos a Europa com a primeira globalização e encontro de culturas, à escala mundial, e assistíamos à europeização da cultura. Acompanhámos afoita e conscientemente uma Europa que, no dizer de Joaquim de Carvalho, “sentia Portugal conviva do grande banquete do espírito Europeu”. This work reflects upon the European identity based on Classical and Judaeo-Christian matrices. If today we can claim that there are no substantial cultural differences between the people of the west (Latins, Germanics and Slavs) or amongst those that have inherited a significant part of this culture while not themselves European (Americans, Australians and Africans), this is due to a collective past and to a whole spiritual, ethical-political and civilizational legacy from the Ancient World which was never completely erased. The first nations of modern Europe were formed under the influence of the glorious ruins of Ancient Rome, which was a synthesis of Graeco-Roman civilization and Christian universalism. In the Middle Ages, Boethius, Cassiodorus, Isidore of Seville had an almost symbolic importance due to their role in the transcription, conservation and reuse of Classical writings and with the importance of these works, as a source of knowledge and factor of transmission to successive

generations in the west. Amongst them, Thomas Aquinas, faithful interpreter of the Aristotelian-Ciceronian ethics-politics and of Roman law, stands out as a landmark of European thought. The Renaissance was a golden period for the European courts and a high point in the history of humanism and culture in the Iberian Peninsula and for Portugal: because of course it was the Portuguese and the Spanish that discovered and evangelized new worlds, enriched Europe with the first globalization and encounter of cultures on the world scale and helped in the Europeanization of culture. This work conscientiously accompanies a Europe which, in the words of Joaquim de Carvalho, “felt Portugal participate in the great banquet of the European spirit”.
