Barb Cook and 14 other autistic women describe life from a female autistic perspective, and present empowering, helpful and supportive insights from their personal experience for fellow autistic women. Michelle Garnett's comments validate and expand the experiences described from a clinician's perspective, and provide extensive recommendations. Autistic advocates including Liane Holliday Willey, Anita Lesko, Jeanette Purkis, Artemisia and Samantha Craft offer their personal guidance on significant issues that particularly affect women, as well as those that are more general to autism. Contributors cover issues including growing up, identity, diversity, parenting, independence and self-care amongst many others. With great contributions from exceptional women, this is a truly well-rounded collection of knowledge and sage advice for any woman with autism. *The Origin of Consciousness in the Breakdown of the Bicameral Mind* Bloomsbury Publishing
 Who understands autistic children best? Autistic adults, of course! How to Parent Like an Autistic is a guide written by an autistic mom for parents

Parenting Children with Mental Health Challenges: A Guide to Life with Emotionally Complex Kids offers overwhelmed readers guidance, solidarity, and hope. The author, a “mental-health mom” who’s survived indignity, exhaustion, and the heartbreak of loving a child with multiple mental-health disorders, writes with frankness and occasional humor about the hardest parenting job on earth. Drawing on her own experiences and those of other parents, plus tips from mental health professionals, Vlock suggests ways of parenting smarter, partnering better, and living more fully and less fearfully in the shadow of childhood psychiatric illness. Addressing the many hurdles children and families must face, including life on the home front, school, friendships and relationships, and more, the book shows readers that they’re not alone—and they are stronger than they think. With its combination of easily digestible, to-the-point suggestions, clear action items, and first-person parent/kid stories, its aim is to make mental-health parents feel stronger and better, while actively seeking positive outcomes for their kids and families. With rates of mental health diagnoses among youth on the rise, this invaluable resource will help parents through the trying times with support, understanding, and guidance.

When it comes to parenting a child with a hidden disability, everyone seems to have an opinion. Here, Naomi Simmons writes from experience, offering new solutions for when conventional parenting strategies just don't work. Whether it be autism, ADHD, OCD, a mood or anxiety disorder with or without a diagnosis, if you have a child with any hidden disability, this is the book for you. Naomi Simmons is a parent of children with a range of

hidden disabilities. She provides candid guidance on how best to support children in this situation - dealing with meltdowns, school avoidance, self-harm, anxiety and depression - and shares the experiences of others who really do 'get it'. Addressing common concerns and hurdles, this book helps you respond to your child's needs and challenges while developing their unique strengths and talents.

The complete guide to connecting with adults on the autism spectrum - one of the 2021 Best Books on Autism from ChoosingTherapy.com For a friend, family member, or coworker with autism, communication can be challenging. But Connecting with the Autism Spectrum can help you find common ground with expert tips and helpful insights about talking (and listening) to neurodiverse adults so you can make your interactions more transparent, meaningful, and rewarding for all. Written by Casey Vormer, a self-taught artist and autism advocate, this comprehensive guide is a trusted source for understanding neurodiversity that features a brief introduction to the autism spectrum. It also provides easy communication strategies like active listening and positive encouragement as well as steps to avoid misunderstandings by teaching how to recognize biases and correct them. Additionally, you'll learn why the term "high functioning autism" is a misnomer to define members of this vibrant community. "It's important to look at every autistic person individually and recognize their obstacles—but more importantly, we should acknowledge their skills and avoid labeling them with 'high functioning autism' or 'low functioning autism' altogether," Vormer says. Unlike other autism books, Connecting with the Autism Spectrum delivers: An easy approach—Discover the best ways to communicate with those living with autism. Situational success—Find the right information for various situations and settings, including school, work, and social relationships. A sensitive tone—Get valuable information from a clear, honest point of view that does not seek to "cure" or manipulate people. Learn how to communicate better with those on the autism spectrum with this informative book.

This straightforward guide offers a complete overview of Pathological Demand Avoidance Syndrome (PDA) and gives practical advice for overcoming the difficulties it poses in a wide range of contexts from diagnosis through to adulthood. Starting with an exploration into the background of PDA that answers many of the immediate questions triggered when a child is first diagnosed, the book goes on to look at the impact of the condition on different areas of the child's life and what can be done to help. The authors present useful information on early intervention options and workable strategies for managing PDA positively on a day-to-day basis. They also examine ways to minimize common difficulties that may be encountered at home and school, making life easier for the child, family and peers. The final chapters tackle new problems that can arise when the teenage years hit and how to assist a successful transition from adolescence to adulthood. Illustrative case examples are included throughout, and the book concludes with a list of valuable resources for further information and advice. Full of helpful guidance and support, this user-friendly introductory handbook is essential reading for anyone caring for, or working with, children with PDA.

Autism Breakthrough Jessica Kingsley Publishers

As a boy, Raun Kaufman was diagnosed by multiple experts as severely autistic, with an IQ below 30, and destined to spend his life in an institution. Years later, Raun graduated with a degree in Biomedical Ethics from Brown University and has become a passionate and articulate autism expert and educator with no trace of his former condition. So what happened? Thanks to The Son-Rise Program, a revolutionary method created by his parents, Raun experienced a full recovery from autism. (His story was recounted in the best-selling book *Son-Rise: The Miracle Continues* and in the award-winning NBC television movie *Son-Rise: A Miracle of Love*.) In *Autism Breakthrough*, Raun presents the ground-breaking principles behind the program that helped him and thousands of other families with special children. Autism, he explains, is frequently misunderstood as a behavioral disorder when, in fact, it is a social relational disorder. Raun explains what it feels like to be autistic and shows how and why The Son-Rise Program works. A step-by-step guide with clear, practical strategies that readers can apply immediately—in some cases, parents see changes in their children in as little as one day—Autism Breakthrough makes it possible for these special children to defy their original often-very-limited prognoses. Parents and educators learn how to enable their children to create meaningful, caring relationships, vastly expand their communications, and to participate successfully in the world. An important work of hope, science, and progress, *Autism Breakthrough* presents the powerful ideas and practical applications that have already changed the lives of families all over the world.

'A powerful, moving and inspiring story - it opens up a whole new world of understanding.' Esther Freud 'This is wonderful. I urge you to read it. It is life enhancing and I defy you not to fall in love with Ben!' Natasha Poliszczuk, Books Editor, You Magazine 'An honest and unflinching account of Jessica's journey as the mother of a child born with complex needs. Essential reading... and a source of solace for those who may find themselves on a similar path' Leah Hazard, author of *Hard Pushed: A Midwife's Story* 'Jessica's beautiful words gave me a deeper understanding about embracing disability. I am inspired and will be recommending this book to parents as a testament to following your parenting instincts.' Arabella Carter-Johnson, author of *Iris Grace* 'A courageous, heartrending story of grief, love and ultimately hope.' The Sun, 5 star review *** Jessica Moxham thought she was prepared for the experience of motherhood. Armed with advice from friends and family, parenting books and antenatal classes, she felt ready. After giving birth, she found herself facing a different, more uncertain reality. Her son, Ben, was fighting to stay alive. When Jessica could finally take him home from hospital, the challenges were far from over. In this hopeful memoir, Jessica shares her journey in raising Ben. His disability means he will never be able to move or communicate without assistance. Jessica has to learn how to feed Ben when he can't eat, wrestle with red tape to secure his education and defend his basic rights in the face of discrimination. As Ben begins to thrive, alongside his two younger siblings, Jessica finds that caring for a child with unique needs teaches her about appreciating difference and doing things your own way. This uplifting story is about the power of family love, finding inner strength and, above all, hope.

The era of digital communication provides endless opportunities for the collection and analysis of social data in novel ways. It also presents new and unanticipated challenges, as researchers are often inventing elements of their methodologies on the fly or studying a phenomenon or media platform for the first time. *Research Exposed* offers in-depth, behind-the-scenes accounts of doing empirical social science in this new paradigm. Through firsthand descriptions of innovative research projects, it shares lessons learned from over a dozen scholars' cutting-edge work. These candid accounts describe what can go wrong when pioneering new genres of research and how such difficulties can be overcome, giving both big-picture reflection

and actionable advice. The chapters discuss a variety of methods, ranging from the completely novel to the use of more traditional approaches in the digital context, and cover research questions relevant to a range of disciplines, including sociology, political science, communication, information studies, and anthropology. By focusing attention on the concrete details seldom discussed in final project write-ups or traditional research guides, Research Exposed helps equip junior and senior scholars alike with essential information that is all too often left with no outlet for sharing. It offers important insights into how empirical social science research can be both innovative and rigorous when dealing with the opportunities and challenges presented by digital media.

Teenage Girls Jessica Kingsley Publishers

Don't you wish there was a "magic" formula for activities and games that... - Your loved one on the autism spectrum actually wants to participate in? - Develops their interactive attention span and socialization? There is! Designed around common special interests enjoyed by autistic people, this book includes over 180 activities for families to do together to help strengthen relationships and develop social skills. Kate shows how seven magic

ingredients for optimal game-playing can be applied to a range of themes, from trains and planes to household appliances, the human body to animals and insects, TV and film characters, and what's more, how you can introduce your loved one's favorite topics. She shares "Presto Chango" beliefs - the five mindsets you need to power activities - as well as how to understand the magic of timing and knowing when to start and stop an activity based on your loved one's cues.
