P&P Brantingham's enormous contribution to criminology has paved the way for major theoretical and empirical developments in the understanding

of crime and its respective patterns, prevention, and geometry. In this unique collection of original essays, Andresen and Kinney bring together leading scholars in the field of environmental criminology to honour the work of P&P Brantingham with new research on the geometry of crime, patterns in crime and crime generators and attractors. Chapters include new perspectives on the crime mobility triangle, electronic monitoring, illegal drug markets, the patterns of vehicle theft for export, prolific offender patterns, crime rates in hotels and motels, violent crime and juvenile crime. A final chapter gathers together a collection of letters to P&P Brantingham, from key scholars reflecting on and celebrating their important contribution. This volume provides essential readings for those interested in the field of environmental criminology.

In 1991, Columbia University's one thousand clerical workers launched a successful campaign for justice in their workplace. This diverse union -- two-thirds black and Latina, three-fourths women -- was committed to creating an inclusive movement organization and to fighting for all kinds of justice. How could they address the many race and gender injustices members faced, avoid schism, and maintain the unity needed to win? Sharon Kurtz, an

experienced union activist and former clerical worker herself, was welcomed into the union and pursued these questions. Using this case study and secondary studies of sister clerical unions at Yale and Harvard, she examines the challenges and potential of identity politics in labor movements. With the Columbia strike as a point of departure, Kurtz argues that identity politics are valuable for mobilizing groups, but often exclude members and their experiences of oppression. However, Kurtz believes that identity politics should not be abandoned as a component in building movements, but should be reframed -- as multi-identity politics. In the end she shows an approach to organizing with great potential impact not only for labor unions but for any social movement.

This updated and expanded new edition resumes the theme of the first edition, and the findings reveal that race, ethnicity, gender, class, and several other variables continue to play a significant and consequential role in the legal decision-making process. The book is structured into three sections, each of which corresponds to a different body of work on Latinos. Section One explores the historical dynamics and influence of ethnicity in law enforcement, and focuses on how ethnicity impacts policing field practices, such as traffic stops, use of force, and the subsequent actions that police departments have employed to alleviate these problems. A detailed examination of critical issues facing Latino defendants seeks to better understand the law enforcement process. The history of immigration laws as it pertains to Mexicans and Latinos explains how Mexicans have been excluded from the United States through anti-immigrant legislation. Latino officers must cope with structural and political issues, the community, and media, as these practices and experiences within the American police system are explored. Section Two focuses on the repressive practices against Mexicans that resulted in executions, vigilantism, and mass expulsions. The topic of Latinos and the Fourth Amendment reveals that the constitutional right of people to be protected against unreasonable searches and seizures has been eviscerated for Latinos, and particularly for Mexicans. Possible remedies to existing shortcomings of the court system when processing indigent defendants are presented. Section Three studies the issue of Hispanics and the penal system. The ethnic realities of life behind bars, probation and parole, the legacy of capital punishment, and life after prison are discussed. Section Four addresses the globalization of Latinos, social control, and the future of Latinos in the U.S. Criminal justice system. Lastly, the race and ethnic experience through the lens of science, law, and the American imagination, are explored, concluding with policy recommendations for social and criminal justice reform, and ultimately humanizing differences. Written for professionals and students of law enforcement, this book will promote the understanding of the historical legacy of brutality, manipulation, oppression, marginalization, prejudice, discrimination, power and control, and white America's continued fear about racial and ethnic minorities.

For twenty years, *Teaching for Diversity and Social Justice* has been the definitive sourcebook of theoretical foundations, pedagogical and design frameworks, and curricular models for social justice teaching practice. Thoroughly revised and updated, this third edition continues in the tradition of its predecessors to cover the most relevant issues and controversies in social justice education in a practical, hands-on format. Filled with ready-to-apply activities and discussion questions, this book provides teachers and facilitators with an accessible pedagogical approach to issues of oppression in classrooms. The revised edition also focuses on providing students the tools needed to apply their learning about these issues. Features new to this edition include: A new bridging chapter focusing on the core concepts that need to be included in all SJE practice and illustrating ways of "getting started" teaching foundational core concepts and processes. A new chapter addressing the possibilities for adapting social justice education to online and blended courses. Expanded overview sections that highlight the historical contexts and legacies of oppression, opportunities for action and change, and the intersections among forms of oppression. Added coverage of key topics for teaching social justice issues, such as establishing a positive classroom climate, institutional and social manifestations of oppression, the global implications of contemporary SJE work, and action steps for addressing injustice. New and revised material for each of the core chapters in the book complemented by fully-developed online teaching designs, including over 150 downloadables, activities, and handouts on the book's Companion Website (www.routledge.com/textbooks/_author/teachingfordiversity). A classic for teachers across disciplines, *Teaching for Diversity and Social Justice* presents a thoughtful, well-constructed, and inclusive foundation for engaging students in the complex and often daunting problems of discrimination and inequality in American society.

Understanding reentry experiences after incarceration Prison in the United States often has a revolving door, with droves of formerly incarcerated people ultimately finding themselves behind bars again. In *Beyond Recidivism*, Andrea Leverentz, Elsa Y. Chen, and Johnna Christian bring together a leading group of interdisciplinary scholars to examine this phenomenon using several approaches to research on recently released prisoners returning to their lives. They focus on the social context of reentry and look at the stories returning prisoners tell, including such key issues as when they choose to reveal (or not) their criminal histories. Drawing on contemporary studies, contributors examine the best ideas that have emerged over the last decade to understanding the challenges prisoners face upon reentering society. Together, they present a complete picture of prisoner reentry, including real-world recommendations for policies to ensure the well-being of returning prisoners, regardless of their past mistakes.

A Comparative Account Temple University Press

""The focus of this book is the potentially radical and fundamental changes that are taking place within criminal justice in Britain and in France and the ways that these are driven by wider domestic, European or international concerns. This metamorphosis away from established values and practices is eroding what were once regarded as core rights and freedoms in the name of efficiency, security and justice to victims. Beginning with a comparative analysis of adversarial and inquisitorial procedural values and traditions, and an examination of broad trends in domestic and European criminal justice, the book then discusses how the roles of prosecution and defence have been re-shaped in different ways in both jurisdictions - both in the text of the law and in their practices. The final section considers how systems within different procedural traditions adapt to address, or provide a

remedy for, systemic flaws that produce wrongful convictions and in particular, the role of the defence in these procedures. By adopting a comparative approach with France, the study explores the nature and reach of these trends, the ways that they challenge and disrupt criminal processes and values and the contrasting responses that they provoke. It reveals how criminal justice traditions continue to be shaped in different ways by broader policy and political concerns; how different systems adapt, change and distort when faced with (sometimes conflicting) pressures domestically and externally; and how different procedural values may serve to structure or limit reform, and so work to facilitate or resist change. ETHNICITY AND CRIMINAL JUSTICE IN THE ERA OF MASS INCARCERATION: A Critical Reader on the Latino Experience is designed as a Latino reader in criminal justice, covering a much broader spectrum of the Latino experience in criminal justice and society, while giving readers a broad overview of the Latino experience in a single book. Considering the shifting trends in demographics and the current state of the criminal justice system, along with the current political "climate," this book is timely and of critical significance for the academic, political, and social arena. The authors report sound evidence that testifies to a historical legacy of violence, brutality, manipulation, oppression, marginalization, prejudice, discrimination, power, and control, and to white America's continued fear about ethnic and racial minorities, a movement that continues in the twenty-first century—as we have been witnessing during the 2015-2016 presidential race, highly charged with anti-immigrant and anti-Mexican political rhetoric. A central objective of this book is to demystify and expose the ways in which ideas of ethnicity, race, gender, and class uphold the functioning and "legitimacy" of the criminal justice system. In this mission, rather than attempting to develop a single explanation for the Latino experience in policing, the courts, and the penal system, this book presents a variety of studies and perspectives that illustrate alternative ways of interpreting crime, punishment, safety, equality, and justice. The findings reveal that race, ethnicity, gender, class, and several other variables continue to play a significant role in the legal decision-making process. With the social control (from police brutality to immigration) discourse reaching unprecedented levels, the book will have broad appeal for students, police officers, advocates/activists, attorneys, the media, and the general public.

Europe is a multi-ethnic society experiencing a rise of anti-immigration, racist, xenophobic discourses, and right-wing political rhetoric and movements proposing legislation to further solidify structural inequality and institutionalized systems of oppression that fuel educational inequities. *Social Justice Education in European Multi-ethnic Schools* brings together researchers in the fields of sociology and education to examine debates in multicultural education. Drawing on critical theory, the book takes an in-depth look at how these challenges are being addressed (or not addressed) in educational contexts and in the proposed framework of intercultural education adopted as a conceptual and educational framework by the European Union over the last two decades. The book begins with an analysis of the sociological models and theories of migration and their connection to multiculturalism and interculturalism. It engages in the current debate between multiculturalism and interculturalism, bringing to light the "political rhetoric" that fueled narratives about the "failures" of multiculturalism, which ushered in the intercultural framework. It puts forth a critical analysis of interculturalism, linking it to neoliberalism, and policies of civic integration and the concept of governmentality. Advocating for a transformative framework informed in social justice education that aims to promote more equity in schools, it critically analyzes and discusses intercultural education, the pedagogical extension of interculturalism, as per the European documents highlighting its goals, pedagogies, tensions, and challenges. *Social Justice Education in European Multi-ethnic Schools* will be of great interest to academics, researchers, and scholars in the fields of intercultural, multicultural, and transformative education.

This updated and expanded new edition continues its unique approach and engrossing exploration of the elements of residential burglary. Presented in five parts, the first is concerned with what is on a burglar's mind when he or she considers whether to commit a burglary and which house to choose. The second part is concerned with time and the opportunities and limits it places on both burglar and victim, while the third section probes how burglaries are fit into space and the importance of perception of space in the burglary process. The fourth section describes how burglars select a home to burglarize and uses Greenwich, Connecticut as a model to contrast target and nontarget homes. The fifth part reviews some of the "nuts and bolts" techniques and reasons for their use as described by burglars and addresses elements about housing architecture, the burglary process, and offers suggestions for controlling the problem of burglary. It concludes with a discussion of changes in our lifestyles and communities and how these changes will play out in future patterns of residential burglary. The authors draw on in-depth interviews with admitted burglars, and the inclusion of the ideas and actual words of the burglars brings the material to life. The text continues to offer the most unique overview of residential burglary. It combines ethnographic research with study of official records and combines the strengths of both approaches.

This present book examines some of the key features of the interplay between legal history, authoritarian rule and political transitions in Brazil and other countries from the end of 20th Century until today. This book casts light on these aspects of the role of law and legal actors/institutions. In the context of transition from authoritarian rule to democratic state, Brazil has produced a significant literature on the challenges and shortcomings of the transition, but little attention has been given to the role of law and legal actors/institutions. Different approaches focus on the legal mechanisms, discourses and practices used by the military regime and by the players involved in the political transition process in Brazil. A comparative perspective that takes into account different political transitions - and their legal consequences - in Europe and Latin America complements the analysis. Part 1 (4 essays) discusses some of the central issues of political transition and legal history in contemporary Brazil, focusing on the time of the transition (and its effects on transitional justice) with different perspectives, from racial and gender issues to constitutional reform and police

repression. Part 2 (3 essays) brings the comparative studies on South American experiences. Part 3 (4 essays) analyses different cases of transition to democracy in Chile, Portugal, Spain and Italy. Part 4 (3 essays) proposes a historiographical and methodological approach, considering the politics of time involved in the interplay between political transitions and legal history.

This book breaks new ground in ensuring access to the criminal justice system for one of the most vulnerable groups in the disability sphere: those individuals who have little or no functional speech. Their voices have been silent for too long. The book provides an international perspective on violence against children and adults with disabilities. It focusses on promising practices and approaches to reduce the risks and occurrence of violence, intervention, access to justice, increase awareness, knowledge and understanding of the violence, rape and sexual abuse against people with disabilities, with an emphasis on people who have little or no functional speech. Each chapter, written by an expert on disability and/or law and peer reviewed, contains extensive information, references, resources, manuals for practice, stories and reports of people with disabilities themselves confronting the violence they experienced. They also provide whatever data and statistics there are about the prevalence, the perpetrators, and access to justice. The UN Convention on the Rights of Persons with Disabilities (CRPD) has been ratified in over 135 countries to date. Three articles from the CRPD that apply directly to the topic of violence against people with disabilities and their access to the criminal justice system are focal throughout the book.

How States in the U.S. Push Mothers Out of Employment Routledge

When the Baby Boom generation was in college, the last miscegenation laws were declared unconstitutional, but interracial romances retained an

aura of taboo. Since 1960 the number of mixed race marriages has doubled every decade. Today, the trend toward intermarriage continues, and the growing presence of interracial couples in the media, on college campuses, in the shopping malls and other public places draws little notice. Love's Revolution traces the social changes that account for the growth of intermarriage as well as the lingering prejudices and false beliefs that oppress racially mixed families. For this book author Maria P.P. Root, a clinical psychologist, interviewed some 200 people from a wide spectrum of racial and ethnic backgrounds. Speaking out about their views and experiences, these partners, family members, and children of mixed race marriages confirm that the barriers are gradually eroding; but they also testify to the heartache caused by family opposition and disapproving strangers. Root traces race prejudice to the various institutions that were structured to maintain white privilege, but the heart of the book is her analysis of what happens when people of different races decide to marry. Developing an analogy between families and types of businesses, she shows how both positive and negative reactions to such marriages are largely a matter of shared concepts of family rather than individual feelings about race. She probes into the identity issues that multiracial children confront and draws on her clinical experience to offer child-rearing recommendations for multiracial families. Root's "Bill of Rights for Racially Mixed People" is a document that at once empowers multiracial people and educates those who ominously ask, "What about the children?" Love's Revolution paints an optimistic but not idealized picture of contemporary relationships. The "Ten Truths about Interracial Marriage" that close the book acknowledge that mixed race couples experience the same stresses as everyone else in addition to those arising from other people's prejudice or curiosity. Their divorce rates are only slightly higher than those of single race couples, which suggests that their success or failure at marriage is not necessarily a racial issue. And that is a revolutionary idea! Author note: Maria P. P. Root, Ph.D., is a clinical psychologist and past President of the Washington State Psychological Association.
