English in Mind Level 3A Combo with DVD-ROM

Disha Publications
The English in Mind Combos offer flexibility in a contemporary English course for teenagers. Each Combo contains eight Student's Book units with the corresponding Workbook material grouped into two modules, and offers

approximately 40 to 45 hours of classwork. Clear learning objectives at the beginning of each module, plus 'Check your Progress' sections at the end, help students and teachers plan learning more effectively. There are free Audio CDs/CD-ROMs combining an interactive CD-ROM and audio material. The English in Mind Combos can be used with mixed-ability classes.

Combo Starter A is for complete beginners. Combos 1A and 1B are for elementary students; 1A contains a 16-page starter section to review key language. Combos Levels 2A, 2B, 3A and 3B take students from pre-intermediate to intermediate level.

The English

Connection Workbook 7
 Klik Modern Mandarin Chinese Grammar provides an innovative reference guide to Mandarin Chinese, combining traditional and function-based grammar in a single volume.
 The Grammar is divided into two parts. Part A covers traditional grammatical categories such as phrase order, nouns, verbs and specifiers. Part B is carefully

organized around language functions and notions such as:
 Communication strategies
 Making comparisons
 Giving and seeking information
 Expressing apologies, regrets and sympathies
 The two parts of the Grammar are closely linked by extensive cross-references, providing a grammatical and functional perspective on many patterns. All grammar points and

functions are richly illustrated with examples, with a strong focus on contemporary usage. Main features of the grammar include: Examples given in simplified characters, traditional characters and romanization (pinyin) Clear explanations and accessible descriptions Particular attention to areas of particular difficulty for learners of Mandarin Chinese

Implementing feedback from users of the first edition of the Grammar, this second edition has been revised throughout to offer expanded explanations, examples, cross-referencing, and indexing and brand new chapters on aspect, resultative verbs, directional verbs and "ba" sentences. This is the ideal reference grammar for learners of Mandarin Chinese at all

levels, from elementary to advanced. No prior knowledge of grammatical terminology is assumed and a glossary of grammatical terms is provided. This Grammar is accompanied by the Modern Mandarin Chinese Grammar Workbook (978-0-415-83488-9; available for separate purchase) which features related exercises and activities.

Student's

Book Oxford University Press
 This book deals with the development of modality from a crosslinguistic perspective and is closely related to two earlier volumes on the development of verb and nominal inflection in first language acquisition (SOLA 21 and 30) both methodologically and theoretically. Each of the fourteen contributions studies the early

development of the form and function of expressions of deontic and dynamic agent-oriented modality or epistemic and evidential propositional modality in one of fourteen languages belonging to different morphological types and language families (seven Indo-European and seven non-Indo-European). The analyses are mainly based on longitudinal observations of children in

their 2nd and 3rd years of life in conversational interaction with their caregivers, mostly the mothers. Main issues addressed are the development of directives and modulations of information in terms of certainty and evidentiality, also taking into account children's developing social-pragmatic and cognitive skills. One of the main findings is that agent-oriented and

<p>propositional modality may develop in parallel depending on the typological characteristics of the language acquired. The decisive factor is whether notions of propositional modality are grammaticized and obligatorily expressed in the language. The findings are interpreted within non-nativist theoretical frameworks (Usage-based theories, Natural Morphology). <u>American</u></p>	<p><u>English in Mind Level 3 Student's Book with DVD-ROM</u> Cambridge Scholars Publishing This book is a timely go-to resource for any professionals wishing to communicate with the growing number of readers whose first language is not English. poorly understood. This analysis provides a systematic explanation for the way in which discourse participants (speaker and hearer) are construed in Spanish through a corpus-driven analysis of informal conversation, TV-debates and parliamentary debates. It deals not only with person deixis, but with the full range of possibilities speakers choose from when profiling

their self or their relationship with the interlocutor. This analysis also offers new insights into the operationalization of the concepts of subjectivity and intersubjectivity as tools for the analysis of person reference and genre comparison. The comparative and corpus-driven approach offers methodological tools for genre analysis that can be transposed to

other languages and/or genres. The detailed description of three socially highly relevant discourse types from a cognitive-functional perspective makes this book a useful resource not only for pragmatists but also for researchers in political and media discourse.

The class of modals is in
--	--	--

<p>many languages both syntactically and semantically highly irregular and unpredictable: modals frequently have idiosyncratic conjugational patterns and are subject to highly specialized syntactic rules. One of the main characteristic of modal verbs is their relatively imprecise and indeterminate meaning, their ambiguity: the same modal can be deontic (i.e. based on</p>	<p>rules and regulations), but it may also involve processes, sets of knowledge or belief systems, and thus get an epistemic interpretation. In order to define the class of modals or to provide a set of environments in which a modal may be correctly or appropriately used, one must refer to many levels of language: the purely syntactic environment, as well as the logical</p>	<p>structure, the context of the utterance, the assumptions that are shared by the speaker and the addressee, the social situation assumed by the participants in the discourse, the impression the speaker wants to make on the addressee, and so on. There is also the question of the appropriate context environments, that is, the semantic-pragmatic issue. Therefore, a</p>
---	--	--

complete analysis of a particular modal can only be achieved by looking both	at its syntactic features and at its semantic structure; in other words, the syntax of	a modal verb is based on its semantics, and these two dimensions are inseparable.
