Poland's Constitutional Breakdown An Emergency in Slow Motion Slow Emergencies conveys an irresistible impulse to create, and illustrates the emotional turmoil that ensues for Lin and her family. Nancy Huston, award-winning author of *The Mark of the Angel*, writes brilliantly here about the passage of time, the body's vulnerability, and the solitude of creative endeavor. What results is a deeply felt novel that offers a disquieting but profoundly moving meditation on just what it means to be an artist. EndFragment

Traveling with Sugar reframes the rising diabetes epidemic as part of a five-hundred-year-old global history of sweetness and power. Amid eerie injuries, changing bodies, amputated limbs, and untimely deaths, many people across the Caribbean and Central America simply call the affliction "sugar"—or, as some say in Belize, "traveling with sugar." A decade in the making, this book unfolds as a series of crónicas—a word meaning both slow-moving story and slow-moving disease. It profiles the careful work of those "still fighting it" as they grapple with unequal material infrastructures and unsettling dilemmas. Facing a new incarnation of blood sugar, these individuals speak back to science and policy misrecognitions that have prematurely cast

their lost limbs and deaths as normal. Their families' arts of maintenance and repair illuminate ongoing struggles to survive and remake larger systems of food, land, technology, and medicine.

'Walking Away From Explosions in Slow Motion' arises as you turn your back on the catastrophe of air and light blossoming in your wake, pressing forward as best you can. Among the shrapnel: aubades, Pluto, Bowie, strange dreams, reading comics by flashlight, democracy in ruins, masks, American twilights & resistance, (nevertheless) resistance.

A single phone call changes Anthony's life forever. Something about Diane's voice is different-distant. Instinctively, he realizes that his wife is in trouble. Something has gone horribly wrong, but what? He retraces her route to a nearby restaurant and witnesses the aftermath of a grisly traffic accident. He soon discovers that it's Diane under the bloody sheet. The trauma of her death triggers his first out-of-body experience and communication with her. It continues to haunt him. He wants to believe the encounter is genuine, but is it? He fears the psychological impact has put him over the edge. Shock and grief take over Anthony's life, setting-off paranormal episodes and hallucinations. He is suddenly thrust into timeless worlds that exist just beyond the five senses, yet seem to be an extension of physical reality and two simple truths hidden in plain sight ... so the journey begins. Little does he know where it will take him and how much is at stake

"A spellbinding portrait" of the tumultuous life and artistic career of one of the most creative photographers of the 1960s (New York magazine). Diane Arbus became famous for her intimate and unconventional portraits of twins, dwarfs, sideshow performers, eccentrics, and everyday "freaks." Condemned by some for voyeurism, praised by others for compassion, she was nonetheless a transformative figure in twentieth-century photography and hailed by all for her undeniable genius. Her life was cut short when she committed suicide in 1971 at the peak of her career. In the first complete biography of Arbus, author Patricia Bosworth traces the arc of Arbus's remarkable life: her sheltered upper-class childhood and passionate, all-consuming marriage to Allan Arbus; her roles as wife and devoted mother; and her evolution from fashion photographer to critically acclaimed artist—one who forever altered the boundaries of photography.

In the credulous twaddle of an essay on the Lost Arts one may generally find the telescope ascribed to far antiquity. In place of evidence there is vague allusion of classical times or wild flights of fancy like one which argued from the Scriptural statement that Satan took up Christ into a high mountain and showed him all the kingdoms of the earth, that the Devil had a telescope—bad optics and worse theology. In point of fact there is not any indication that either in classical times, or in the black thousand years of hopeless ignorance that followed the fall of Roman civilization,

was there any knowledge of optical instruments worth mentioning. The peoples that tended their flocks by night in the East alone kept alive the knowledge of astronomy, and very gradually, with the revival of learning, came the spirit of experiment that led to the invention of aids to man's natural powers. The lineage of the telescope runs unmistakably back to spectacles, and these have an honorable history extending over more than six centuries to the early and fruitful days of the Renaissance. That their origin was in Italy near the end of the thirteenth century admits of little doubt. A Florentine manuscript letter of 1289 refers to "Those glasses they call spectacles, lately invented, to the great advantage of poor old men when their sight grows weak," and in 1305 Giordano da Rivalto refers to them as dating back about twenty years. Finally, in the church of Santa Maria Maggiore in Florence lay buried Salvino d'Amato degli Armati, (obit 1317) under an epitaph, now disappeared, ascribing to him the invention of spectacles. W. B. Carpenter, F. R. S., states that the inventor tried to keep the valuable secret to himself, but it was discovered and published before his death. At all events the discovery moved swiftly. By the early fourteenth century it had spread to the Low Countries where it was destined to lead to great results, and presently was common knowledge over all civilized Europe. It was three hundred years, however, between spectacles and the combination of spectacle lenses into a telescope, a lapse of time which to some investigators has seemed altogether mysterious. The ophthalmological facts lead to a simple explanation. The first spectacles were for the relief of presbyopia, the common and lamentable affection of advancing years, and for this purpose convex lenses of very moderate power sufficed, nor was material variation in power necessary. Glasses having a uniform focus of a foot and a half or thereabouts would serve every practical purpose, but would be no material for telescopes.

We are now becoming numbed by the outrageous events taking place within the political arena of our country. Throughout our nation, the division between factions continues to hold firm. The issue of how movement toward reconciliation can occur has become ever more pressing. Nothing short of our democracy is at stake. This book looks to the writings of the nineteenth-century Danish religious philosopher Søren Kierkegaard as a resource for thinking in fresh ways about how the divine power of creative transformation is at work in the world. Through divinity's empowering of our practices in relating to others, democracy can be resurrected to a new, healthy life. Six important themes from Kierkegaard's thought are used to do a comparative examination of Donald Trump together with his world and Kierkegaard and his world. The story of this standoff—between one of the world's most famous and well-publicized figures and one of the world's greatest thinkers—constitutes a compelling investigation and presents quite a contrast. Uncovered in the storytelling process of Kierkegaard trumping Trump are the "Sweet 16": sixteen ways in which resurrection can be practiced in people's lives and help to restore our democracy to a fuller and more vibrant version of itself.

Offers a road map back to your center, where you will find your Authentic Self. It is from that center, Merritt Jones shows, that you can live the life you were born for, rather than the tug-of-war so many people get caught up in, trying to be all things to all people, trying to be anyone but who they truly are.

Click this link to read a review of How Faith Works. This book is autobiographical in concept, as the author has had many

experiences in life, in addition to his bouts with cancer and his subsequent survival. As the author brings his story to you in this book, his attempt is to present things in a sequence that explain them in the order of importance in his life. The author's life was riddled with ups and downs from inception, because of the absence of his father and mother, but the best thing that happens to him is that he was raised by his loving and caring grandmother, Mandy. Although many of the situations and experiences he faced existed in his life in Alabama in 1930s, they still exist in African American families and their communities today. As a result, Matt has a keen sense of the value of education, which he learned from his grandmother Mandy and other life experiences during the time he lived in Alabama. Matt's years as a child growing up in rural Alabama during 1930s-50s, at best was turbulent times for young African American boys, yet he rode horses with his "white friend", "J", a White kid that lived nearby at the time. Because of Matt's faith, taught to him by his grandmother Mandy, he was not afraid to take chances and try new things. At age 19 Matt went to work in Pensacola, Florida. Later that same year, he bought a 1939, pretty green Chevy. Matt was never deterred by life decisions, and still believes it is his faith that has brought him through many ordeals in his life. He has stepped out on "faith", and prevailed in turning what would have toppled the average big city kid; but not Matt, he turns negatives into positives, and perseveres as he gets up again, and again.

Using a holistic approach, this new guidebook is geared toward mental health professionals working with women who have been victims of sexual abuse, and the survivors themselves. It provides background necessary for understanding child abuse, and presents a four-stage theoretical model for therapeutic intervention. Information is given that will enable the therapist to accurately diagnose the occurrence of childhood sexual abuse and conceptualize the effects of family, stage of development, and spirituality on the victim. Ego splitting is examined in detail. Also included are comprehensive case studies on the topic. In addition, this book serves as a bridge between the popular and professional literature on treatment of sexual abuse survivors. By using fairy tales and mainstream literature - including Peter Pan, The Wizard of Oz, Alice in Wonderland, The Velveteen Rabbit, and current pop works such as Stephen King's *It* - the authors show how numerous metaphors for abuse are presented in our everyday life. Woven throughout the volume is a historical and sociocultural perspective of the treatment of women and children - and how society has ignored such abuse. Coupled with the four-step process, this supplies the practitioner with a comprehensive overview, numerous invaluable treatment techniques, and an opportunity to gain an empathic understanding of the victim's life and experiences. Essential reading for professionals and students of counseling, psychology, social work, and other helping professions, the format also makes it highly accessible to laypersons - both clients and other concerned individuals.

Your Redefining Moments AuthorHouse

In 1972, I felt impressed of the Lord to write a book about my life and ministry. He even gave me the title, *With God As My Partner*. I voiced my objection in prayer by "reminding" Him that I had only been preaching for three years and pastoring for one. I had no experience in writing, but all I heard in return was, "Not now." I went through life with many "experiences" (both good and bad) piling up through the years. About four years ago, my wife said, "Ron, why don't you write a book about your life and ministry?" I didn't have any good answer for her; and since she is my best friend, my closest confidant, and my dearest prayer partner, I gave it some serious thought. In the following year, I came in

contact with three or four others who asked me the same thing. In view of this, I went to the Lord in sincere prayer, and He said, "Now is the time." The book is not really in any chronological order but goes back and forth at times as I remember things. Again, the only way I could remember times, people, and names is *With God As My Partner*. I was not striving to produce any item of "literary art," but something that could be shared with others what God has shared with me through the years. It has been an interesting journey, and I look forward to continuing it. When I gave the book its title, it was with a sense of humility, and not arrogance. I am well aware of the fact that the only way I (or anyone else) can "partner" with God is by His grace, realizing that it is all for His glory.

Elliott Smith was one of the most gifted songwriters of the nineties, adored by worshipful fans for his subtly melancholic words and melodies. The sadness had its sources in the life. There was trauma from an early age, years of drug abuse and a chronic sense of disconnection that sometimes seemed almost self-engineered. Smith died violently in Los Angeles in 2003, under what some believe to be questionable circumstances, of a single fatal stab wound to the chest. By this time fame had found him, and record buyers who shared the listening experience felt he spoke directly to them from beyond: lonely, lovelorn, frustrated, fighting until he could fight no more. And yet, although his achingly intimate lyrics carried the weight of truth, Smith remained unknowable. In *Torment Saint*, William Todd Schultz gives us the first proper biography of the rock star, a decade after his death, imbued with affection, authority, sensitivity and long-awaited clarity. *Torment Saint* draws on Schultz's careful, deeply knowledgeable readings and insights, as well as on more than 150 hours of interviews with close friends, lovers, bandmates, peers, managers, label owners, and recording engineers and producers. This book unravels the remaining mysteries of Smith's life and his shocking, too-early end. It will be an indispensable examination of his life and legacy, both for Smith's legions of fans as well as readers still discovering his songbook.

Pat says though the vision of one person can change the world, no one can carry out a vision alone. Extreme dreams depend on teams, and lack of teamwork is often how big dreams go unrealized. Using examples and anecdotes from history and contemporary life, Pat shows how the greatest world-changing events came to be as the result of the passion of single individuals. In each case, a team was assembled with people equipped in the various areas needed to bring the vision to pass.
