March 18, 2013. Ghost Productions provided Biomet with an animation showing their ePAK DVR Crosslock Distal Radius plating system.

The ePAK DVR eases the challenge of treating distal radius fractures by using advanced fixation options and streamlined instrumentation. Client Biomet.ePAK DVR Crosslock | Ghost Productions addresses distal radius fractures, and features the advanced DVR® Crosslock implant and instruments. DVR® innovation milestones:

- The first implant system with divergent pegs to capture dorsally displaced fractures from a volar approach.
- A low profile implant designed to mimic the volar aspect of the bone and be used as a reduction template.
