DOODY'S REVIEW! "The audience is by definition American medical students preparing for the examinations, but there is definite benefit for other physician assistant and nurse practitioner students as well. I would add that there is utility for every medical school faculty member to review in designing their teaching goals for the students....For the intended audience, this

is a high value preparation book."--

PreTest Self-Assessment and Review
McGraw Hill Professional

A wide variety of questions pertaining to the etiology, course and therapy of child psychiatric conditions are answered in this concise volume. Central issues related to diagnosis, assessment, sampling and cross-cultural studies are presented in a highly readable fashion. Research on prevalence and patterns of childhood dysfunction and how these are influenced by such factors as age, sex and social class are presented in detail. The authors also provide a detailed description of community surveys and offer a referral pathway to psychiatric care for children.

This completely revamped second edition of *Avian Medicine and Surgery* includes over 260 all-new colour illustrated cases, with questions and answers fully exploring a breadth of diseases and disorders. Avian patients are a routine part of the veterinary case load and are being

seen by many clinicians across the world. This book provides a unique quick reference for clinicians and a useful self-test for students by offering comprehensive, clinically-oriented information that can be quickly accessed, easily understood and applied. With contributions from leading international authorities with diverse fields of expertise, the book covers a wide range of

disciplines, organ systems and species. The cases are presented in a random order, just as they would appear in daily practice, challenging the reader to address real clinical situation and offering, where possible, a comprehensive solution.
