 Electronic voting (also known as e-voting) is voting that uses electronic means to either aid or take care of casting and counting votes.. Depending on the particular implementation, e-voting may use standalone electronic voting machines (also called EVM) or computers connected to the Internet. It may encompass a range of Internet services, from basic transmission of tabulated results to full ...
 Electronic voting - Wikipedia
 In a sternly worded three-page letter, Secretary of State Pedro Cortes informs vendor Advanced Voting Solutions (AVS) that it's out. "Because AVS will be unable to proceed through federal certification in a timely fashion, enabling the machines to be ready for the Primary Election in April 2008, the Commonwealth must decertify the use of the AVS electronic voting system in Pennsylvania."
 Lehigh Valley Ramblings: Pa DOS Decertifies Electronic ...
 Shorthand for electronic voting, e-Voting is a less clear term as it can include voting on electronic machines in polling booths. I use the term 'machine voting' to refer to the voting practise of voting on machines in polling booths on election day that is common in many jurisdictions in the United States. 7. New Zealand Parliament. (n.d.).

 Reliability of pricey new voting machines questioned
 In this regard, online voting is seen as a solution that could potentially help to reverse the declining turnout in legislative elections, particularly among younger voters. For instance, turnout for European Parliament elections has decreased each cycle, from a high of 61.99 per cent of the electorate in 1979 to

42.61 per cent in 2014.
