The Rover K-Series Engine The Crowood Press

Launched in 1945 and commissioned two years later, submarine HMS Alliance was built for service with the Royal Navy in the Far East. Alliance had a long and distinguished career of more than 28 years that took her all over the world. Today, Alliance is the centrepiece at the Royal Navy Submarine Museum, Gosport, where the submarine experience is brought to life by tours around the boat. Former submariner and historian Peter Goodwin gives Alliance the Haynes Manual treatment, examining in detail her construction and restoration, and describing what it was like to live, work and go to war in a submarine.

Getting a Rover K-Series engine properly up and running can be a difficult task, but ultimately the result is always worthwhile. Illustrated with over 300 photographs, *Rover K-Series Engine - Maintenance, Repair and Modification* is a practical guide to keeping these unique engines in fine working order. The most well-known issue with the K-Series is the head gasket, and this book demonstrates how to identify common faults, before giving practical advice on how best to solve them. Step-by-step guidance on all aspects of long-term engine maintenance is provided, in addition to the improvements required to prevent further problems. A K-Series engine is then stripped down to examine its clever and interesting structure, and is rebuilt with improvements. Authors of over twenty automotive books and countless articles in assorted motoring magazines, Iain Ayre and Rob Hawkins have combined their knowledge to bring you this book on the Rover K-Series engine, which is fully illustrated with 356 colour photographs.
