My Nine Lives Routledge

Rocco Perri came to Canada almost a century ago from Calabria, Italy. Even today his name is well known to historians, police and organized crime—and especially to the people of the city he called home—Hamilton, Ontario. A poor immigrant, Perri along with his common-law wife, Bessie Starkman, built an unequalled crime empire for the time. During the Prohibition years, Perri provided alcohol to a thirsty clientele in Canada and the United States—a business that was very illegal and highly lucrative. Al Capone and Joseph Kennedy were among Perri's customers. The Perris also ran gambling, loan-sharking, extortion and prostitution rackets. **ROCCO PERRI: King of the Bootleggers** is more than the biography of a man and his empire; it is a riveting portrait of a time when corruption was rampant, murder a business necessity, and discrimination against newcomers forced many to turn to crime as a means of survival. This book also solves a half-century-long mystery about the fate of Rocco Perri.

His out-of-hours invitation... Cruelly dumped by her fiancé via text message, Vivienne Swan quits her job as an interior designer and nurses her shattered heart in private. Until an intriguing offer from Jack Stone—a wealthy property developer whose skilled flirtations she's managed to evade—tempts her from her shell. Working side by side with Jack on his latest project gets Vivienne's mind off her ex but on to erotic thoughts about her boss! It might be wildly pleasurable, but an affair with Jack is playing with fire. He's a man used to taking what he wants, and now Vivienne is at his mercy!

This book is the story of a girl who originally came from a highly cultured family of whom she became the sole survivor. Her extreme suffering in concentration camps mutilated her emotionally but in spite of it she managed to lead a highly constructive life but the building of a truly satisfactory personal life was beyond the possible.

Naomi Mitchison, daughter of a distinguished scientist, sister of

geneticist J B S Haldane, was always interested in the sciences, especially genetics. Her novels did not tend to demonstrate this, and she did not publish a Science Fiction novel until almost forty years into her fiction-writing career. Isobel Murray's Introduction here argues that it is by no means 'pure' Science Fiction: the success of the novel depends not only on the extraordinarily variety of life forms its heroine encounters and attempts to communicate with on different worlds: she is also a very credible human, or Terran, with recognisably human emotions and a dramatic emotional life. This novel works effectively for readers who usually eschew the genre and prefer more traditional narratives. Explorers like Mary are an elite class who consider curiosity to be Terrans' supreme gift, and in the novel she more than once takes risks that may destroy her life. Her voice, as she records her adventures and experiments, is individual, attractive and memorable. Isobel Murray is Emeritus Professor of Modern Scottish Literature at the University of Aberdeen.

In *The Mastery of Love*, don Miguel Ruiz illuminates the fear-based beliefs and assumptions that undermine love and lead to suffering and drama in our relationships. Using insightful stories to bring his message to life, Ruiz shows us how to heal our emotional wounds, recover the freedom and joy that are our birthright, and restore the spirit of playfulness that is vital to loving relationships. *The Mastery of Love* includes: \* Why "domestication" and the "image of perfection" lead to self-rejection \* The war of control that slowly destroys most relationships \* Why we hunt for love in others, and how to capture the love inside us \* How to finally accept and forgive ourselves and others "Happiness can only come from inside of you and is the result of your love. When you are aware that no one else can make you happy, and that happiness is the result of your love, this becomes the greatest mastery of the Toltec: the *Mastery of Love*." - don Miguel Ruiz

This unique work offers the reader a poetic depiction of the abyssal Himalayan city of Kathmandu: the mythical sword-shaped sacred city of divine origin set among the shining mountains of the Himalayas; the open-air mandala studded by golden-roofed temples; the cradle and melting pot of millenary civilisation and spiritual tradition; the mesmerising destination for generations of flower children and "dharma bums"; Asia's present-day dirty, derelict and broken mirror... Kathmandu. A visionary katabasis, this book, enriched by a wide selection of artistic B&W photos, leads the reader through the mazes of this remote location, simultaneously a real venue, a sacred land and an inviolate recess of the soul: sharp shadows and piercing shouts mingle with bursts of overwhelming light and tremendous beauty. Kathmandu, *Lessons of Darkness*: the ultimate, vivid portrait of the world that existed prior to the terrible earthquake on April 2015, which turned it into debris and dust...

A brief love affair turns into an overwhelming obsession in a new novel that brings the talents of a superb literary stylist to a work of suspense, with thrilling results. The beautiful younger woman who appeared so unexpectedly, so gloriously, in Michael

Coolidge's life one night—a seemingly chance pick-up at a quiet neighborhood bar—vanished just as suddenly a few days later, leaving him dazed and bewildered. Months later he chances upon Justine on a village street, locked in a violent quarrel with a menacing stranger—a day later, that man is found dead in a seedy motel and Justine has disappeared again, leaving behind only a hasty plea for help. Michael's efforts to locate her, or to find out something more about her elusive past, yield only further mystery, a confusing web of lies, manipulations and false leads. Who is the real Justine? Downtown art world sophisticate, or small town innocent? Victim or predator? Someone he can trust, or someone he should actually fear? This spellbinding psychological thriller confounds the reader at every turn, constantly causing us to revise our assumptions. It's a fascinating study in character and a relentless, ingeniously head-spinning story—all deliciously unresolved until the very last page.

Scientific evidence for the continual presence of consciousness with or without connection to a living organism • Examines findings on the survival of consciousness beyond life, including near-death experiences, after-death communication, and reincarnation • Explains how this correlates precisely with cutting-edge physics theories on superstrings, information fields, and energy matrices • Reveals how consciousness manifests in living beings to continue its evolution Evidence now points to consciousness existing beyond the brain, such as when the brain is temporarily incapacitated, as well as to the survival of consciousness after death. Conventional science prefers to dismiss these findings because they cannot be accommodated by a materialist view of reality. Spirituality and religion embrace the continuity of consciousness and ascribe it to a nonmaterial spirit or soul that is immortal. As such, spirituality/religion and science continually find conflict in their views. But what if there truly is no conflict? Based on a new scientific paradigm in sync with experience-based spirituality, Ervin Laszlo and Anthony Peake explore how consciousness is continually present in the cosmos and can exist without connection to a living organism. They examine the rapidly growing body of scientific evidence supporting the continuity of consciousness, including near-death experiences, after-death communication, reincarnation, and neurosensory information received in altered states. They explain how the persistence of consciousness beyond the demise of the body means that, in essence, we are not mortal--we continue to exist even when our physical existence has come to an end. This correlates precisely with cutting-edge physics, which posits that things in our plane of time and space are not intrinsically real but are manifestations of a hidden dimension where they exist in the form of superstrings, information fields, and energy matrices. With proof that consciousness is basic to the cosmos and

immortal in its deeper, nonmanifest realm, Laszlo and Peake reveal the purpose of consciousness is to manifest in living beings in order to continuously evolve.

*Affective Health and Masculinities in South Africa* explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

AD 439: The Roman Empire is on the brink of collapse. With terrifying speed a Vandal army has swept through the Roman provinces of Spain and North Africa, conquering Carthage and threatening Roman control of the Mediterranean. But a far greater threat lies to the east, a barbarian force born in the harsh steppelands of central Asia, warriors of unparalleled savagery who will sweep all before them in their thirst for conquest - the army of Attila the Hun. For a small group of Roman soldiers and a mysterious British monk, the only defense is to rise above the corruption and weakness of the Roman emperors and hark back to the glory days of the army centuries before, to find strength in history. Led by Flavius, a young tribune, and his trusty centurion Macrobius, they fight a last-ditch battle against the Vandals in North Africa before falling back to Rome, where they regroup and prepare for the onslaught to come. Flavius learns that the British monk who had fled with them from Carthage is more than he seems, and he is drawn into a shady world of intelligence and intrigue under the aegis of Flavius' uncle Aetius, commander-in-chief of the Roman armies in the west, the man who alone has the power to rally Rome and her allies and save the western empire from annihilation. Aetius is desperate to buy time until his army is strong enough to confront the Huns on the field of battle,

and meanwhile will do anything to undermine their strength. Together they devise a plan of astonishing audacity that will take Flavius and Macrobius across the frontier and far up the river Danube to the heart of darkness itself, to the stronghold of the most feared warrior-emperor the world has ever known - and into alliance with the emperor's daughter, a warrior-princess who has sworn vengeance against her father for the death of her mother. In the showdown to come, in the greatest battle the Romans have ever fought, victory will go to those who can hold high the most potent symbol of war ever wrought by man - the sacred sword of Attila.

An illustrated guide to natural relief from chronic inflammation • Explores the use of 18 anti-inflammatory herbs, such as bay laurel, basil, turmeric, and devil's claw, as well as 15 other natural substances, such as propolis and fish oil • Examines which natural remedy is best for many common inflammation-related ailments, such as asthma, bronchitis, tendonitis, arthritis, and eczema • Reveals the important role of omega-3s in defending the body against inflammation From aspirin and ibuprofen to antihistamines and cortisone, anti-inflammatory drugs are now the top-selling pharmaceuticals in the world. But daily use of these powerful drugs comes with a price: side effects, many of which can lead to other chronic conditions and the further use of medications. In this practical guide to natural remedies for inflammation, naturopath Christopher Vasey explores 18 anti-inflammatory herbs, such as bay laurel, basil, turmeric, and devil's claw, as well as 15 other natural substances, such as propolis and fish oil. He explains which conditions each addresses most effectively, proper dosage, and the best methods of ingestion. Vasey explains how, like fever, inflammation is a defensive reaction of the body and also carries out a cleansing process, which natural remedies support but pharmaceuticals can destabilize by contributing more toxins to the internal terrain. He examines 50 of the most common inflammation-related ailments--such as allergies, asthma, conjunctivitis, bronchitis, sinusitis, cystitis, tendinitis, arthritis, eczema, and sciatica--and explains which medicinal plant or food supplement is best suited to safely alleviate unpleasant symptoms while helping the body complete the healing the inflammation was initiated to perform. Revealing the important role of omega-3s in defending the body against inflammation and reducing the damage caused by chronic inflammation, Vasey explores what foods are rich in these key molecules, how much must be eaten to defend the body, and what omega-3 supplements are most suited to your body's needs. The author also examines how to deacidify the body, as acids have an inflammatory effect, as well as how to use hydrotherapy to calm inflammation.
