11 Years CLAT & AILET (2008-18) Topic-wise Solved Papers 2nd Edition John Benjamins Publishing

Includes various departmental reports and reports of commissions. Cf. Gregory. Serial publications of foreign governments, 1815-1931.

CALL communities and culture - short papers from EUROCALL 2016 The Major Varieties of English Varieties of English The 23rd EUROCALL conference was organised by the Cyprus University of Technology Language Centre. The theme of the conference was "CALL

communities and Culture". Between the 24th and 27th August 2016, over 135 presentations were delivered and 27 posters were presented; 84 of these presentations appear in this volume of selected peer-reviewed short papers.

Corpus-based Studies in English Rodopi The book consists of topic-wise questions from the past 11 years' (2008 to 2018) question papers divided into 5 sections - English Including Comprehension, Elementary Mathematics, Logical Reasoning, General Knowledge & Legal Aptitude. The coverage of the papers includes CLAT, NLU and AILET from 2008 to 2018 as they actually reflect the pattern of the Law exams. In all there are 22 Question papers from 2008 to 2018 which have been provided topic-wise along with detailed solutions. Practicing these questions, aspirants will come to know about the pattern and toughness of the questions asked in the examination. In the end, this book will make the aspirants competent enough to crack the uncertainty of success in the Entrance Examination. The strength of the book

lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students.

British Farmer's Magazine Walter de Gruyter GmbH & Co KG

This volume is one of the first detailed expositions of the history of different varieties of English. It explores language variation and varieties of English from an historical perspective, covering theoretical topics such as diffusion and supraregionalization as well as concrete descriptions of the internal and external historical developments of more than a dozen varieties of English.

Latin Notes Oswaal Books and Learning Private Limited

Nature Rodopi

This volume brings together current research by international scholars on the varieties of English spoken in Ireland. The papers apply contemporary theoretical and methodological approaches and frameworks to a range of topics. A number of papers explore the distribution of linguistic features in Irish English, including the evolution of linguistic structures in Irish English and linguistic change in progress, employing broadly quantitative sociolinguistic approaches. Pragmatic features of Irish English are explored through corpus linguistics-based analysis. The construction of linguistic corpora using written and recorded material form the focus of other papers, extending and analyzing the growing range of corpus material available to researchers of varieties of English, including diaspora varieties. Issues of language and identity in contemporary Ireland are explored in several contributions using both qualitative and quantitative methods. The volume will be of interest to linguists generally, and to scholars with an interest in varieties of English.

Hearings Research-publishing.net

These papers are a selection from papers presented at the 4th International Conference on English Historical Linguistics (Amsterdam, 1985). Most studies deal with some aspect of an earlier stage of English, though present day varieties of English are also under investigation. Many of the papers show that there is a growing interest in the question why a certain change has taken place. Furthermore, the volume contains a considerable number of papers on historical syntax.

New Perspectives on Irish English Disha Publications

Corpus-based Studies in English contains selected papers from the seventeenth International Conference on English Language Research on Computerized Corpora (ICAME 17). The topics include parsing and annotation of corpora, discourse studies, lexicography, translation studies, parallel corpora, language variation and change, national varieties, methodology and English language teaching. The papers on parsing and annotation include discussions of the treatment of irregular forms, semantic/pragmatic labels in air traffic control, a comparison of tagging systems and a presentation of T-tag lexicon construction. The papers on discourse and lexicography include a study of like as a discourse marker, thesaural relations and the lexicalisation of NPs. In translation studies one paper discusses explicitness as a universal feature of translation and the paper on parallel corpora contrasts English and Norwegian. Many papers deal with variation and change; here we find a discussions of dialogue vs. non-dialogue in modern English fiction and an account of verbal disputes in adolescent English; the historical studies deal with e.g. text

type evolution, multi-verb words, normalization in Middle English prose and modalities in Early Modern English. The methodology papers discuss the use in corpus analysis of inferential statistics, probabilistic approaches to anaphora resolution and multi-method approaches to data. The ELT paper compares the use of the progressive in native and non-native compositions.

The Major Varieties of English Rodopi

As its title suggests, this book is a selection of papers that use English corpora to study language variation along three dimensions - time, place and genre. In broad terms, the book aims to bridge the gap between corpus linguistics and sociolinguistics and to increase our knowledge of the characteristics of English language. It includes eleven papers which address a variety of research questions but with the commonality of a corpus-based methodology. Some of the contributions deal with language variation in time, either by looking into historical corpora of English or by adopting the method known as diachronic comparable corpus linguistics, thus illustrating how corpora can be used to illuminate either historical or recent developments of English. Other studies investigate variation in space by comparing different varieties of English, including some of the "New Englishes" such as the South Asian varieties of English. Finally, some of the papers deal with variation in genre, by looking into the use of

language for specific purposes through the inspection of medical articles, social reports and academic writing.

Pragmatics

This book examines the special nature of English both as a global and a local language, focusing on some of the ongoing changes and on the emerging new structural and discoursal characteristics of varieties of English. Although it is widely recognised that processes of language change and contact bear affinities, for example, to processes observable in second-language acquisition and lingua franca use, the research into these fields has so far not been sufficiently brought into contact with each other. The articles in this volume set out to combine all these perspectives in ways that give us a better understanding of the changing nature of English in the modern world.
