 Springer
 This book provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research. The fifth 2020 Future

Technologies Conference was organized virtually and received a total of 590 submissions from academic pioneering researchers, scientists, industrial engineers, and students from all over the world. The submitted papers covered a wide range of important topics including but not limited to computing, electronics, artificial intelligence, robotics, security and communicatio

ns and their applications to the real world. After a double-blind peer review process, 210 submissions (including 6 poster papers) have been selected to be included in these proceedings. One of the meaningful and valuable dimensions of this conference is the way it brings together a large group of technology geniuses in one venue to not only present breakthrough research in

future technologies, but also to promote discussions and debate of relevant issues, challenges, opportunities and research findings. The authors hope that readers find the book interesting, exciting and inspiring

This book

constitutes the proceedings of the 10th International Conference on Advanced Data Mining and Applications, ADMA 2014, held in Guilin, China during December 2014. The 48 regular papers and 10 workshop papers presented in this volume were carefully reviewed and selected from 90 submissions. They deal with the following topics: data mining, social network and social media,

recommend systems, database, dimensionality reduction, advance machine learning techniques, classification, big data and applications, clustering methods, machine learning, and data mining and database.

An ontology is a formal description of concepts and relationships that can exist for a community of human and/or

machine agents. The notion of ontologies is crucial for the purpose of enabling knowledge sharing and reuse. The Handbook on Ontologies provides a comprehensive overview of the current status and future perspectives of the field of ontologies considering ontology languages, ontology engineering methods, example ontologies, infrastructures and technologies

for ontologies, and how to bring this all into ontology-based infrastructures and applications that are among the best of their kind. The field of ontologies has tremendously developed and grown in the five years since the first edition of the "Handbook on Ontologies". Therefore, its revision includes 21 completely new chapters as well as a major re-working of 15 chapters transferred to

Clarity with Extensive Explanations of NEET previous years' papers • 100% Exam Readiness with Chapter-wise NEET Trend Analysis (2014-2024) *Encyclopedia of Rhetoric and Composition* Springer Nature This textbook guides students through rhetorical and assignment analysis, the writing process, researching, citing, rhetorical modes, and critical

reading. Using accessible but rigorous readings by professionals throughout the college composition field, the Oregon Writes Writing Textbook aligns directly to the statewide writing outcomes for English Composition courses in Oregon. Created through a grant from Open Oregon in 2015-16, this book collects previously published articles, essays, and

chapters released under Creative Commons licenses into one free textbook available for online access or print-on-demand.

We live in a world of words. The way we interact with our fellow humans is very often based on the language that always surrounds us, whether it be the messages we send, the news we read, or the assignments we complete in classes that give us the education intended to lead us to success. What might be the best way to navigate the complexity of language, especially in a first-year composition course? This book addresses these issues by presenting lessons, examples, and student samples through an approach that is friendly, conversational, and realistic. Created by actual instructors of composition at HCC, this book includes many resources to guide composition students of different skill levels: • In-depth overviews of reading, writing, and revising • Engaging

exercises that anticipate and address the most common errors of writers • Actual student samples that provide the basis of class discussions and analysis With guidance that includes both theory and practice, *Composition and Grammar for HCC* by HCC provides students with the skills they need for their educational goals, their careers, and their lives. [Proceedings of the Ninth International Conference on Soft](#)

[Computing and Pattern Recognition \(SoCPaR 2017\)](#) American Academic Press This book constitutes the proceedings of the 22nd International Conference on Theory and Practice of Digital Libraries, TPDL 2018, held in Porto, Portugal, in September 2018. The 51 full papers, 17 short papers, and 13 poster and tutorial papers presented in this volume were carefully

reviewed and selected from 81 submissions. The general theme of TPDL 2018 was Digital Libraries for Open Knowledge. The papers present a wide range of the following topics: Metadata, Entity Disambiguation, Data Management, Scholarly Communication, Digital Humanities, User Interaction, Resources, Information Extraction, Information Retrieval,
