A City Divided traces the development of white Kansas Citians' perceptions of race and examines the ways in which those perceptions shaped both the physical landscape of the city and the manner in which Kansas City was policed and governed. Because of rapid changes in land use and difficulties in suppressing crime and vice in Kansas City, the control of urban spaces became an acute concern, particularly for the white middle class, before race became a problematic issue in Kansas City. As the African American population grew in size and assertiveness, whites increasingly identified blacks with those factors that most deprived a given

space of its middle-class character. Consequently, African Americans came to represent the antithesis of middle-class values, and the white middle class established its identity by excluding blacks from the urban spaces it occupied. By 1930, racial discrimination rested firmly on gender and family values as well as class. Inequitable law enforcement in the ghetto increased criminal activity, both real and perceived, within the African American community. White Kansas Citians maintained this system of racial exclusion and denigration in part by "misdirection," either by denying that exclusion existed or by claiming that segregation was necessary to prevent racial violence. Consequently, African American organizations sought to counter misdirection tactics. The most effective of these efforts followed World War II, when local black activists devised demonstration

strategies that targeted misdirection specifically. At the same time, a new perception emerged among white liberals about the role of race in shaping society. Whites in the local civil rights movement acted upon the belief that integration would produce a better society by transforming human character. Successful in laying the foundation for desegregating public accommodations in Kansas City, black and white activists nonetheless failed to dismantle the systems of spatial exclusion and inequitable law enforcement or to eradicate the racial ideologies that underlay those systems. These racial perceptions continue to shape race relations in Kansas City and elsewhere. This study demystifies these perceptions by exploring their historical context. While there have been many studies of the emergence of ghettos in northern and border cities, and others of race, gender,

segregation, and the origins of white ideologies, *A City Divided* is the first to address these topics in the context of a dynamic, urban society in the Midwest. *The Illuminating Engineer* Simon and Schuster

Globally, discussions about sex work focus on exploitation. The media regularly provides us with stories about teen girls coerced to perform sexual acts for money, frequently beaten and robbed by their pimps or traffickers. While one would have to be hard-pressed to deny that sex workers are victimized, the popular media and our political leaders emphasize sex work as exclusively exploitative. In *Negotiating Sex Work*, Carisa R. Showden and Samantha Majic present a series of essays that depict sex work as an issue far more complex than generally perceived. Positions on sex work are primarily divided between those who consider that selling sexual acts is legitimate work and those who consider it a form of exploitation. Organized into three parts, *Negotiating Sex Work* rejects this either/or framework and offers instead diverse and compelling contributions that aim to reframe these viewpoints. Part I addresses how knowledge about sex work and sex workers is generated. The next section explores how nations and political actors who claim to protect individuals in sex work often further marginalize them. Finally, part III examines sex workers' own political-organizational efforts to combat laws and policies that deem them deviant, sinful, or total victims. A timely and necessary intervention into sex work debates, this volume challenges how policy makers and the broader public regard sex workers' capacity to advocate for their own interests. and Mobility in an Integrating Europe examines intra-European Union migration in the cities of Amsterdam, London and Brussels. Based on sixty in-depth interviews of free moving European citizens, and more than five years of ethnographic and documentary research, it uncovers the rarely studied human dimension of European integration. Examines the mobility, lifestyle and career opportunities created by the borderless society of the European Union, as well as the barriers that still persist. Analyses the new migration trends, challenges to the welfare state, and forms of urban cosmopolitanism linked to processes of European integration. *ICACE 2019* Rutgers University Press Diversity characterizes the people of Oaxaca, Mexico. Within this city of half a million, residents are rising against traditional barriers of race and class, defining new gender roles, and expanding access for the disabled. In this rich ethnography of the city, Michael Higgins and Tanya Coen explore how these activities fit into the ordinary daily lives of the people of Oaxaca. Higgins and Coen focus their attention on groups that are often marginalized—the urban poor, transvestite and female prostitutes, discapacitados (the physically challenged), gays and lesbians, and artists and intellectuals. Blending portraits of and comments by group members with their own ethnographic observations, the authors reveal how such issues as racism, sexism, sexuality, spirituality, and class struggle play out in the people's daily lives and in grassroots political activism. By doing so, they translate the abstract concepts of social action and identity formation into the actual lived experiences of real people.

"the Bright Light Zone" Random House First Published in 2001. Routledge is an imprint of Taylor & Francis, an informa company. *A Thriller* Light Zone CityLight Planning in the Urban Context As Times Square turns 100, New York Times Magazine contributing writer James Traub tells the story of how this mercurial district became one of the most famous and exciting places in the world. The

Devil's Playground is classic and colorful American history, from the first years of the twentieth century through the Runyonesque heyday of nightclubs and theaters in the 1920s and '30s, to the district's decline in the 1960s and its glittering corporate revival in the 1990s. First, Traub gives us the great impresarios, wits, tunesmiths, newspaper columnists, and nocturnal creatures who shaped Times Square over the century since the place first got its name: Oscar Hammerstein, Florenz Ziegfeld, George S. Kaufman, Damon Runyon, Walter Winchell, and "the Queen of the Nightclubs," Texas Guinan; bards like A. J. Liebling, Joe Mitchell, and the Beats, who celebrated the drug dealers and pimps of 42nd Street. He describes Times Square's notorious collapse into pathology and the fierce debates over how best to restore it to life. Traub then goes on to scrutinize today's Times Square as no author has yet done. He writes about the new 42nd Street, the giant Toys "R" Us store with its flashing Ferris wheel, the new world of corporate theater, and the sex shops trying to leave their history behind. More than sixty years ago, Liebling called Times Square "the heart of the world"—not just the center of the world, though this crossroads in Midtown Manhattan was indeed that, but its heart. From the dawn of the twentieth century through the 1950s, Times Square was the whirling dynamo of American popular culture and, increasingly, an urban sanctuary for the eccentric and the untamed. The name itself became emblematic of the tremendous life force of cities everywhere. Today, Times Square is once again an awe-inspiring place, but the dark and strange corners have been filled with blazing light. The most famous street character on Broadway, "the Naked Cowboy," has his own website, and Toys "R" Us calls its flagship store in Times Square "the toy center of the universe." For the giant entertainment corporations that have moved to this safe, clean, and self-consciously gaudy spot, Times Square is still very much the center of the world. But is it still the heart?

The face of the nocturnal metropolis is marked decisively by light, and the number and variety of the light sources is increasing to the point of "light terror." A well-lit urban space can be very inviting, giving residents and visitors a sense of well-being and security. A successful lighting design can also give the city at night an identity of its own and accentuate architectural qualities. In this book, the

author embodies her many years of experience as a practitioner and teacher of lighting design. In preparation, she visited ten European cities — including Paris, Brussels, Berlin, London, Budapest, Vienna, and Amsterdam — with different urban situations. This has enabled her to present different planning and design tasks systematically and to illustrate specific solutions. In addition to articulating basic planning rules for the outdoor lighting of buildings, traffic routes, and squares, she presents and elucidates new artificial lighting systems and outdoor lamps with the help of examples.

While sex work has long been controversial, it has become even more contested over the past decade as laws, policies, and enforcement practices have become more repressive in many nations, partly as a result of the ascendancy of interest groups committed to the total abolition of the sex industry. At the same time, however, several other nations have recently decriminalized prostitution. *Legalizing Prostitution* maps out the current terrain. Using America as a backdrop, Weitzer draws on extensive field research in the Netherlands, Belgium, and Germany to illustrate alternatives to American-style criminalization of sex workers. These cases are then used to develop a roster of “best practices” that can serve as a model for other nations considering legalization. *Legalizing Prostitution* provides a theoretically grounded comparative analysis of political dynamics, policy outcomes, and red-light landscapes in nations where prostitution has been legalized and regulated by the government, presenting a rich and novel

portrait of the multifaceted world of legal sex for sale.

A unique volume, *Inventing Times Square* approaches the subject of twentieth-century American city culture through a multidimensional examination of one quintessential urban space: Times Square. Ranging in time from 1905, when the crossroad was given its present name, through to the current plans for redevelopment, the authors examine Times Square as economic hub, real estate bonanza, entertainment center, advertising medium, architectural experiment, and erotic netherworld. Though the volume centers on Times Square, the essays venture much further into urban history and American social history, revealing in the process how Times Square reflected—even epitomized—America as it became an urban consumer culture.

Increasingly, experts recognize that gender has affected urban planning and the design of the spaces where we live and work. Too often, urban and suburban spaces support stereotypically male activities and planning methodologies reflect a male-dominated society. To document and analyze the connection between gender and planning, the editors of this volume have assembled an interdisciplinary collection of influential essays by leading scholars. Contributors

point to the ubiquitous single-family home, which prevents women from sharing tasks or pooling services. Similarly, they argue that public transportation routes are usually designed for the (male) worker's commute from home to the central city, and do not help the suburban dweller running errands. In addition to these practical considerations, many contributors offer theoretical perspectives on issues such as planning discourse and the construction of concepts of rationality. While the essays call for an awareness of gender in matters of planning, they do not over-simplify the issue by moving toward a single feminist solution. Contributors realize that not all women gravitate toward communal opportunities, that many women now share the supposedly male commute, and that considerations of race and class need to influence planning as well. Among various recommendations, contributors urge urban planners to provide opportunities that facilitate women's needs, such as childcare on the way to work and jobs that are decentralized so that women can be close to their children. Bringing together the most important writings of the last twenty-five years, this book is essential reading for students and scholars of planning theory as well as anyone concerned with gender and diversity.

After tracking down a crazed sniper last year, homicide detective Mike Houston opted to leave Boston for the isolated mountains of Maine. He adjusted nicely to chopping his own firewood, relaxing in his log cabin, and simply enjoying the solitude of the mountains. But then his former partner, Lt. Anne Bouchard, pays him a visit and dangles the words serial killer in front of him. And suddenly he finds himself back in the game beside her—though not “officially.” Desperate for money to get her next fix, Cheryl Guerette, a known prostitute and heroin junkie, was last seen climbing into the car of an unknown John. Bouchard suspects that nameless John is a serial killer she's been hunting—a man known to the BPD as The Fisherman. The suspect has been snatching homeless women and prostitutes off the streets from Portland to Boston, and Bouchard needs Houston if she's going to catch him. Against Houston's better judgment, Bouchard also turns to mob boss Jimmy O'Leary for advice. Not only does O'Leary have a hand in most of the crime that occurs in Boston, but he also knows a few Russian bosses and pimps who are angry that their employees are no longer on the job. With help from the darker side of

Boston, Bouchard and Houston hope to locate The Fisherman before it's too late for Cheryl and his other victims. Skyhorse Publishing, as well as our Arcade, Yucca, and Good Books imprints, are proud to publish a broad range of books for readers interested in fiction—novels, novellas, political and medical thrillers, comedy, satire, historical fiction, romance, erotic and love stories, mystery, classic literature, folklore and mythology, literary classics including Shakespeare, Dumas, Wilde, Cather, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Colour Design: Theories and Applications, Second Edition, provides information on a broad spectrum of colour subjects written by seasoned industry professionals and academics. It is a multidisciplinary book that addresses the use of colour across a range of industries, with a particular focus on textile colouration. Part One deals with the human visual system, colour perception and colour psychology, while Part Two focuses on the practical application of colour in design, including specifically in textiles and fashion. Part Three covers cultural and historical aspects of colour, as well as recent developments, addressing areas such as dyes and pigments, architecture, colour theory, virtual reality games, colour printing, website development, and sustainability. This revised, expanded, and updated edition reflects recent technological developments, and new industry priorities. Bringing together the science of colouration and the more artistic elements of design, this book supports students, academics, and industry professionals in developing a deep knowledge of colour use. It will also be an important reference for those involved in textile dyeing, design and manufacture. Provides a comprehensive review of the issues surrounding the use of color in textiles Discusses the application of color across a wide range of industries, supporting interdisciplinary knowledge and

research Offers a revised, expanded, and updated look that reflects the rise of new technology and industry priorities

The present book is based on the experience of the author. The experience is mainly the result of years of research, of consulting work, and in participation in policy decision making in many fields, most, but not all, related to outdoor lighting. To some degree, the book represents the preference of the author. The selection of the subjects is based on more than 50 years of experience of what is desirable to know for persons engaged in scientific research or practical application in the fields of lighting and vision. The subjects deal with a number of fundamental aspects. The theorists must have them at their fingertips, whereas the practical engineers may assume them as known in their daily work. The selection of subjects is based in part by the questions that came to the author over the years, but even more by the preference of the author himself. In this respect, it is a personal book. Thus, it should be stressed that the book is not a 'handbook' or even a 'textbook'; many subjects that commonly are treated in such books are not included here. Not because they lack importance, but because the author feels that they are adequately treated elsewhere. Some relevant works are mentioned in the References. Over the years, the author has been engaged in giving courses on vision and lighting, lately more in particular on Masterclasses on a post-graduate or post-doctorate level.
