Body Image: Understanding Body Dissatisfaction in Men, Women and Children presents a review of what is presently known and the results of some new research on body image. It compares the effects of gender, sexuality, social class, age and ethnicity on satisfaction with the way we look and suggests how these differences arise. Why, for instance, are heterosexual men much happier with their body images than women or gay men? Sarah Grogan discusses the effect of media presentation of the ideal body and other cultural influences. Surprisingly, despite the almost exclusive media preference for very young female bodies, she finds that older women are not less satisfied with their bodies than younger women. Written for readers from a variety of disciplines, this clear and eclectic book will make the ideal text for students from psychology, sociology, gender and media studies.

INTERNATIONAL CONFERENCE ON Management of Globalized Business: Emerging Perspectives CRC Press

Problem-based learning is a powerful classroom process, which uses real world problems to motivate students to identify and apply research concepts and information, work collaboratively and communicate effectively. It is a strategy that promotes life-long habits of learning.

The University of Delaware is recognised internationally as a centre of excellence in the use and development of PBL. This book presents the cumulative knowledge and practical experience acquired over nearly a decade of integrating PBL in courses in a wide range of disciplines.

This "how to" book for college and university faculty. It focuses on the practical questions which anyone wishing to embark on PBL will want to know: "Where do I start?" "How do you find problems?" "What do I need to know about managing groups?" "How do you grade in a PBL course?"

The book opens by outlining how the PBL program was developed at the University of Delaware--covering such issues as faculty mentoring and institutional support--to offer a model for implementation for other institutions.

The authors then address the practical questions involved in course transformation and planning for effective problem-based instruction, including writing problems, using the Internet, strategies for using groups, the use of peer tutors and assessment. They conclude with case studies from a variety of disciplines, including biochemistry, pre-law, physics, nursing, chemistry, political science and teacher education

This introduction for faculty, department chairs and faculty developers will assist them to successfully harness this powerful process to improve learning outcomes.

Representation and Management of Narrative Information McGraw-Hill Education (UK)

This book explores the concept and facilitation of critical reflection and its implications for professional practice. It draws on the author's own extensive experience to demonstrate how reflective processes involving metaphor and imagery, as well as critique, can be used not only to understand and articulate key values underpinning professional practice and to generate new theoretical models, but to explore one's own worldview, including the ultimate question: 'Who am I?'. The author incorporates practical examples of reflection-through-writing and other reflective techniques which illustrate how ideas about critical reflection, transformative learning, authenticity and spirituality are intricately entwined within theories and practices of adult learning and professional development. The book highlights the importance of understanding the relationship between personal worldviews, values and professional practice. It draws on the concepts of vocation and professional psychological wellbeing to consider what it means to act authentically as a professional within an audit culture. The book will be invaluable for practitioners, academics and students interested in critical reflection, educational inquiry, autoethnography and the use of the self in and as research, the nature and use of metaphor, and the development of worldviews.

Universal Principles of Design is the first comprehensive, cross-disciplinary encyclopedia of design.

Ensuring Animal Health and Other Services for Efficient and Inclusive Livestock Value Chains in LMICs Springer Nature

The Handbook of Natural Language Processing, Second Edition presents practical tools and techniques for implementing natural language processing in computer systems. Along with removing outdated material, this edition updates every chapter and expands the content to include emerging areas, such as sentiment analysis. New to the Second Edition Greater Universal Principles of Design, Revised and Updated INTERNATIONAL CONFERENCE ON Management of Globalized Business: Emerging Perspectives

The three basic questions of EBS are (1) What bio-social, psychological, and cultural characteristics of human beings influence which characteristics of the built environment?; (2) What effects do which aspects of which environments have on which groups of people, under what circumstances, and when, why, and how?; and (3) Given this two-way interaction between people and environments, there must be mechanisms that link them. What are these mechanisms? Focusing on answers to these and other questions, "Culture, Architecture, and Design" discusses the relationship between culture, the built environment, and design by showing that the purpose of design is to create environments that suit users and is, therefore, user-oriented. Design must also be based on knowledge of how people and environments interact. Thus, design needs to respond to culture. In discussing (1) the nature and role of Environment-Behavior Studies (EBS); (2) the types of environments; (3) the importance of culture; (4) preference, choice, and design; (5) the nature of culture; (6) the scale of culture; and (7) how to make culture usable, Amos Rapoport states that

there needs to be a change from designing for one's own culture to understanding and designing for users' cultures and basing design on research in EBS, anthropology, and other relevant fields. Such changes should transform architecture and design so that it, in fact, does what it claims to do and is supposed to do? create better (i.e., more supportive) environments?

Body Image Manchester University Press

This book presents the latest knowledge on the still under-researched field of academic tourism, which over the past decade has gained in importance at local and national economic levels as a result of increasing international mobility of students and academic staff in higher education. A wide range of themes are explored from various perspectives, with the focus on Europe. Particular attention is paid to academic tourism demand, expenditure, and economic impact; the relationships between academic tourism and local and regional development, sustainable development, and environmental sustainability; and the importance of academic tourism for the internationalization of higher education and international cooperation and development. Further topics to be considered include the significance of academic tourism for the dynamics of tourism destinations and insights from experimental tourism research. In addition to theoretical chapters and state of the art reviews, readers will find insightful empirical and case studies. The book will be of interest to academics, researchers, students, and practitioners, including policy makers.

Annual Index/abstracts of SAE Technical Papers Elsevier

The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists and motorcyclists in particular those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

The Power of Problem-based Learning John Wiley & Sons

"...the most useful, practical book I have seen on the management of turfgrass insect pests...mandatory reading for turfgrass managers in golf, lawns, and sports..." --Dr. James B. Beard, International Sports Turf Institute, Inc. Written in clear, everyday language, *Destructive Turfgrass Insects* covers the biology, diagnosis, and control of virtually all the insects and mites that attack warm- and cool-season turfgrasses. No other source gives you as many practical and comprehensive management guidelines for use on golf courses, lawns, and sports fields.

The Cinema of Terrence Malick Harvard University Press

What's a customer worth? The company that can answer this question precisely is the company with an edge in the customer-based, technology - and information - intensive economy of today. But how can an asset as intangible as customer value be measured? This book provides a solution: a fully developed, highly practical new marketing system for measuring and managing customer value as a financial asset - a system uniquely suited to today's rapidly changing, increasingly digital marketplace. Along with strategic and tactical guidance, *Customer Equity* provides precise metrics for evaluating a business more effectively and improving performance - the "activity-based management" of a company's marketplace. The authors present a new framework for structuring

go-to-market activities that links those activities to useful metrics and allows better-informed marketing decisions.

Elegant ideas deserve elegant expression. *Sword* dispels the myth that you can't get published without writing wordy, impersonal prose. For scholars frustrated with disciplinary conventions or eager to write for a larger audience, here are imaginative, practical, witty pointers that show how to make articles and books enjoyable to read—and to write.

National Academies Press

This book constitutes the proceedings of the 23rd International Conference on Business Information Systems, BIS 2020, which was planned to take place in Colorado Springs, CO, USA. Due to the COVID-19 pandemic, the conference was held fully online during June 8-10, 2020. This year's theme was "Data Science and Security in Business Information Systems". The 30 contributions presented in this volume were carefully reviewed and selected from 86 submissions. The book also contains two contributions from BIS 2019. The papers were organized in the following topical sections: Data Security, Big Data and Data Science, Artificial Intelligence, ICT Project Management, Applications, Social Media, Smart Infrastructures.

Individual Learners Routledge

The systematic description of the knowledge accumulated on the physical oceanography, marine chemistry and pollution, and marine biology of the Caspian Sea forms the basis of this book. It presents the principal characteristic features of the environmental conditions of the sea and their changes in the second half of the 20th century. At present, the principal problems of the Caspian Sea are related to the interannual sea level changes and their forecast and to the estimation of the intensity of the chemical pollution of the sea and its impact upon the biota. Special attention is paid to socio-economic, legal, and political issues in the Caspian Sea region. This publication is based on numerous observational data collected by the authors of the chapters during sea expeditions, on the archive data of several Russian oceanographic institutions, as well as on the broad scientific literature mainly published in Russian editions. This book is addressed to the specialists concerned with research in various fields of physical oceanography, marine chemistry, pollution studies, and biology; solving a wide scope of problems from the regional climate to the mesoscale processes; and using a variety of methods from remote sensing of the seas to numerical and laboratory modeling.

Stylish Academic Writing Springer

Legal regulations and manufacturers' monitoring practices have not been enough to prevent contamination of the national food supply and protect consumers from serious harm. In addressing food safety risks, regulators could perhaps better ensure the quality and safety of food by monitoring food production not just at a single point in production but all along the way, from farm to table. Recognizing the troubled state of food safety, the Institute of Medicine's (IOM) Food Forum met in Washington, DC, on September 9, 2008, to explore the management of food safety practices from the beginning of the supply chain to the marketplace.

Alps Adria Routledge

Abstract: For a large number of companies from different countries, the authors analyze how company corporate governance practices and country regulatory regimes interact in terms of company valuation. They confirm that corporate governance plays a crucial role in efficient company monitoring and shareholder protection, and consequently positively impacts valuation. They find substitution in valuation impact between corporate governance measures at the company and country level, with a possibility of over-regulation. Corporate governance appears more valuable for companies that rely heavily on external financing, consistent with the hypothesis that the main role of corporate governance is to protect external financiers.

The Road Less Travelled Springer Nature

With 2005's acclaimed and controversial *The New World*, one of cinema's most enigmatic filmmakers returned to the screen with only his fourth feature film in a career spanning thirty years. While Terrence Malick's work has always divided opinion, his poetic, transcendent filmic language has unquestionably redefined modern cinema, and with a new feature scheduled for 2008, contemporary cinema is finally catching up with his vision. This updated second edition of *The Cinema of Terrence Malick: Poetic Visions of America* charts the continuing growth of Malick's oeuvre, exploring identity, place, and existence in his films. Featuring two new original essays on his latest career landmark and extensive analysis of *The Thin Red Line*-Malick's haunting screen treatment of World War II-this is an essential study of a visionary poet of American cinema.

This title outlines different approaches to problem-based learning, suggests reasons for its growth

and details its use across all disciplines.

Handbook of Natural Language Processing Lulu.com

This manual describes methods and resources for practitioners and decision-makers to use for enacting new laws or regulations or amending existing ones as part of a comprehensive road safety strategy. The manual covers steps to be taken to address five main risk factors and post-crash care. It can therefore be used to: * develop an understanding of the framework of legislation and relevant processes that are applicable in a country * review current national legislation and regulations and identify gaps that hinder implementation and enforcement of effective road safety measures * identify available resources, including international agreements, evidence-based guidance and recommendations on effective measures, to improve legislation * prepare action plans to strengthen national legislation and regulations for the five main risk factors and for post-crash care, including advocating for improvement. Other important topics should also be addressed to achieve a comprehensive national system of road safety legislation and regulation; however, they are beyond the scope of this manual. They include: vehicle and helmet manufacturing standards and testing, third-party insurance, victim's rights and compensation, a graduated driver licensing system, road audits and design standards and driving hours for commercial drivers.

Forage Tree Legumes in Tropical Agriculture Springer

This illustrated survey of 600 years of fashion investigates its cultural and social meaning from medieval Europe to twentieth-century America. Breward's work provides the reader with a clear guide to the changes in style and taste and shows that clothes have always played a pivotal role in defining a sense of identity and society, especially when concerned with sexual and body politics.
