This island has been a place of deep spiritual significance since his early childhood. At the 2006 Sony Radio Academy Awards, the UK's most prestigious radio accolades, Kenneth won the Gold Award for Radio Features for his BBC Radio 4 programme, A Requiem for St Kilda's.

The Handbook of Polish, Czech, and Slovak Holocaust Fiction aims to increase the visibility and show the versatility of works from East-Central European countries. It is the first encyclopedic work to bridge the gap between the literary production of countries that are considered to be main sites of the Holocaust and their recognition in international academic and public discourse. It contains over 100 entries offering not only facts about the content and motifs but also pointing out the characteristic fictional features of each work and its meaning for academic discourse and wider reception in the country of origin and abroad. The publication will appeal to the academic and broader public interested in the representation of the Holocaust, anti-Semitism, and World War II in literature and the arts. Besides prose, it also considers poetry and theatrical plays from 1943 through 2018. An introduction to the historical events and cultural developments in Poland, Czechoslovakia, Czech, and Slovak Republic, and their impact on the artistic output helps to contextualise the motif changes and fictional strategies that authors have been applying for decades. The publication is the result of long-term scholarly cooperation of specialists from four countries and several dozen academic centres.

What is unique and essential about theater? What separates it from other arts? Do we need "theater" in some fundamental way? The art of theater, as Paul Woodruff says in this elegant and unique book, is as necessary - and as powerful - as language itself. Defining theater broadly, including sporting events and social rituals, he treats traditional theater as only one possibility in an art that - at its most powerful - can change lives and (as some peoples believe) bring a divine presence to earth. The Necessity of Theater analyzes the unique power of theater by separating it into the twin arts of watching and being watched, practiced together in harmony by watchers and the watched. Whereas performers practice the art of being watched - making their actions worth watching, and paying attention to action, choice, plot, character, mimesis, and the sacredness of performance space - audiences practice the art of watching: paying close attention. A good audience is emotionally engaged as spectators; their engagement takes a form of empathy that can lead to a special kind of human wisdom. As Plato implied, theater cannot teach us transcendent truths, but it can teach us about ourselves. Characteristically thoughtful, probing, and original, Paul Woodruff makes the case for theater as a unique form of expression connected to our most human instincts. The Necessity of Theater should appeal to anyone seriously interested or involved in theater or performance more broadly.

In *Consolations* David Whyte unpacks aspects of being human that many of us spend our lives trying vainly to avoid - loss, heartbreak, vulnerability, fear - boldly reinterpreting them, fully embracing their complexity, never shying away from paradox in his relentless search for meaning. Beginning with 'Alone' and closing with 'Withdrawal', each piece in this life-affirming book is a meditation on meaning and context, an invitation to shift and broaden our perspectives on life: pain and joy, honesty and anger, confession and vulnerability, the experience of feeling overwhelmed and the desire to run away from it all. Through this lens, procrastination may be a necessary ripening; hiding an act of freedom; and shyness something that accompanies the first stage of revelation. *Consolations* invites readers into a poetic and thoughtful consideration of words whose meaning and interpretation influence the paths we choose and the way we traverse them throughout our lives.

Life in Transit is the long-awaited sequel to Shimon Redlich's widely acclaimed *Together and Apart* in Brzezany, in which he discussed his childhood during the War and the Holocaust. Life in Transit tells the story of his adolescence in the city of Lodz in postwar Poland. Redlich's personal memories are placed within the wider historical context of Jewish life in Poland and in Lodz during the immediate postwar years. Lodz in the years 1945-1950 was the second-largest city in the country and the major urban center of the Jewish population. Redlich's research based on conventional sources and numerous interviews indicates that although the survivors still lived in the shadow of the Holocaust, postwar Jewish Lodz was permeated with a sense of vitality and hope.

Kenneth Steven's poems are inspired first and foremost by wildscape, by the places and people of Highland Perthshire and of the Celtic west - Iona and the Hebrides. But they are inspired by faith too, by the struggle to see God in the complexities of this world's turmoil and find light in the darkness.

The book is a gathering together of all of Kenneth Steven's poems concerning the island of Iona through the years. These comprise poems that have been published in journals both at home and abroad, and broadcast on BBC Radio. A lengthy introduction tells the story of the forging of those first links with Iona, and those that have come through adult years. This is a book both for those who know and love the island, and for those who may yearn to visit but have not yet had the chance. It's essentially a love song to a precious and an extraordinary place that has been the author's spiritual home from earliest childhood days.

Mama of ten Abbie Halberstadt helps women humbly and gracefully rise to the high calling of motherhood without settling for mediocrity or losing their minds in the process. Motherhood is a challenge. Unfortunately, our worldly culture offers moms little in the way of real help. Mamas only connect to celebrate surviving another day and to share in their misery rather than rejoice in what God has done and to build each other up in hard times. There has to be a better way, a biblical way, for mamas to grow and thrive. As a daughter of Christ, you have been called to be more than an average mama. Attaining excellence doesn't have to be unsettling but it will take committed focus and a desire to parent well according to God's grace and for His glory. M is for Mama offers advice, encouragement, and scripturally sound strategies seasoned with a little bit of humor to help you embrace the challenge of biblical motherhood and raise your children with love and wisdom. Mama, you are worthy of the awesome responsibility God has given you. Now it's time to start believing you can live up to it.

Handbook of Polish, Czech, and Slovak Holocaust Fiction Saint Hildegard

This book focuses on the fundamentals of the use of biologics in asthma, describing the rationale, principles, mechanisms of action, and indications. It offers an excellent balance between basic science and the analysis of clinical trials, updating readers with new developments that are changing the global scenario for targeted biological anti-asthma therapies, especially with regard

to more severe disease. A range of therapies are considered, from the humanized monoclonal anti-IgE antibody omalizumab, widely approved as add-on treatment for inadequately controlled disease, through to emerging biologics for which evidence supportive of efficacy is accumulating, including anti-IL-5, anti-IL-4, and anti-IL-13 therapies. One aspect to emerge is the variability in individual response, which suggests a need for characterization of different asthma subtypes to permit the effective implementation of phenotype-targeted treatments. This book will be of interest for pulmonologists, clinical immunologists, and physicians seeking sound information on these therapies, but also for scientists and pharmacologists wishing to enhance their knowledge of the therapeutic implications of the cellular and molecular mechanisms that underlie severe, uncontrolled asthma.

Pathophysiological Aspects of Proteases in Cancer provides a comprehensive overview of the multifaceted field of proteases in the cellular environment and focuses on the recently elucidated functions of complex proteolytic systems in physiology and pathophysiology. The book both gives insights on the general aspects of the role of proteases in cancer, their role as diagnostics and prognostics biomarkers, their impact on chemoresistance, and the future cutting-edge technologies like cocktail therapies and Cyber Knife technology. Given the breadth and depth of information covered in the respective contributions, the book will be immensely useful for researchers in oncology and working to identify targets for drug development. Multidisciplinary in scope, the book bridges the gap between fundamental and translational research, with applications in the biomedical and pharmaceutical industry, making it a thought-provoking read for basic and applied scientists engaged in biomedical research. - Gives insight into the spectrum of proteases, protease inhibitors, and protease interactors involved at the cellular and molecular level in cancer development - Gives a comprehensive overview of the role of proteases in modulating cellular metabolism and chemoresistance to better understand how proteases play in early to the end point in cancer development and metastasis - Provides a multidisciplinary approach demonstrating the biochemical and signal transduction mechanisms associated with dysregulation of proteases, leading to the manifestation of various diseases - Highlights the roles and regulation of different types of proteases, as well as their synthetic and endogenous inhibitors - Bridges the gap between fundamental and translational research, with applications in the biomedical and pharmaceutical industry
