Open Source Intelligence Training™ | OSINT Training Classes  
 Open Source Intelligence In A Open Source Intelligence (OSINT) is the collection and analysis of information that is gathered from public, or open, sources. OSINT is primarily used in national security, law enforcement, and business intelligence functions and is of value to analysts who use non-sensitive intelligence in answering classified, unclassified, or proprietary intelligence requirements across the previous disciplines. Open-source intelligence - Wikipedia Open source intelligence is derived from data and information that is available to the general public. It's not limited to what can be found using Google, although the so-called "surface web" is an important component. As valuable as open source intelligence can be, information overload is a real concern. What Is Open Source Intelligence and How Is it Used? INTelligence: Open Source Intelligence.
