The Microsoft Technology Associate MTA certification is an entry-level certification which serves as a good starting point for students and educators who may eventually progress to the higher programs. Simply put, it assesses the foundational knowledge necessary to pursue MCSE, MCSD and the like. The MTA certification focuses more on knowledge and a little less on skills. However, the knowledge areas are all based on MS products so you must know those products inside and out. Questions on the general knowledge are relatively easy. Product and technology specific technical questions, however, are way more difficult. This is why we developed this study product - we focus on those difficult topics that involve difficult technical skills. We want you to be able to answer these difficult questions and secure exam success accordingly. Exam 98-366: Networking Fundamentals deals with the basics of Windows networking. Exam 98-367: Security Fundamentals is designed to provide candidates with an assessment of their knowledge of fundamental security concepts. Both exams share many common knowledge topics so it makes sense to study both together.
