radically and globally. This book explores the benefits of continuously improving the relationship between the firm, its suppliers, and its customers to ensure the highest added value. This book identifies the state-of-the-art developments that contribute to the success of vertical tiers of suppliers and relates these developments to the capabilities that small and medium-sized manufacturers must have to

be viable participants in this system. Strategies for attaining these capabilities through manufacturing extension centers and other technical assistance providers at the national, state, and local level are suggested. This book identifies action steps for small and medium-sized manufacturers --the "seed corn" of business start-up and development-- to improve supply chain

management. The book examines supply chain models from consultant firms, universities, manufacturers, and associations. Topics include the roles of suppliers and other supply chain participants, the rise of outsourcing, the importance of information management, the natural tension between buyer and seller, sources of assistance to small and medium-sized firms, and a

host of other issues. Supply Chain Integration will be of interest to industry policymakers, economists, researchers, business leaders, and forward-thinking executives. On February 6, 1989, the Federal Home Loan Bank Board contacted Mid America Institute to inquire whether it would undertake an independent, academically oriented analysis of the insolvency resolution crisis in the thrift industry. The Senate

Banking Committee, during the course of hearings on the thrift crisis, had suggested to the Bank Board the desirability of an independent assessment of Bank: Board and FSLIC resolution methodology, specifically as it related to the controversy surrounding the December deals, the Southwest Plan, and the possibility that tax considerations were driving certain deals.

The Bank Board had already initiated studies from industry-oriented perspectives. Therefore, it felt that an academic perspective would provide both a valuable addition to the process, and by the nature of academia, perhaps the best prospect of a credible and independent viewpoint. The Bank Board was prepared to give an appropriately structured Task Force virtually

unlimited access to all personnel, documents and resources that the Task Force felt necessary to come to an uncompromising assessment. The only significant constraint imposed was that a report had to be available prior to the start of the next round of Senate Banking Committee hearings on March 1, 1989. The Task Force would be given complete discretion as

to the scope and coverage of the report, but it was requested that the topic of the December deals, particularly the associated tax considerations, be a significant part of the report.
