the engine has an electric primer, you can usually remove one of

the small fuel hoses that goes from it to the engine's intake or

carburetor, and have a helper operate the primer (usually pushing

the key in) while you watch to see if fuel squirts out. Avoid letting

Standard Motor Control Circuit Primer. Single-phase and 3-phase AC squirrel cage induction motors need some type of control circuit to initiate a start or stop function. The two types of ladder control circuits commonly used are the 2-wire control circuit and the 3-wire control circuit. The 2-wire control circuit uses maintained contact devices to control the magnetic motor starter.
