Building a Civilized Workplace and Surviving One That Isn't Simon and Schuster

Managing is hard. Managing for the first time is even harder. A new start-up comes on the scene filled with a team of talented people. The start-up grows, the team expands, and those early joiners all of a sudden are responsible for leading a team. Just a few years prior, these folks were barely able to figure out their own roles in their crazy, ever-changing company. Now, as managers, they are expected—often without any direction or role models—to know how to develop, coach, structure projects, review, and set expectations for a whole bunch of new, incredible people. First-timers want to quickly learn what it takes to be a successful manager—like they learned how to code, how to design, how to sell—and put those learnings into practice. But what does it mean to manage, and how do you teach someone to be a good manager? Enter Rachel Pacheco, an expert at helping start-ups solve their management and culture challenges. Pacheco, a former chief people officer and founding team executive at multiple start-ups, conducts research on management and works with CEOs and their managers to build the skills necessary to navigate a rapidly scaling organization. In *Bringing Up the Boss: Practical Lessons for New Managers*, Pacheco shares these skills, along with cutting-edge research, data, anecdotes, how-to exercises, and more, to help overwhelmed employees become expert managers.

How to Build Organizations Where Employees Love to Come to Work Red Wheel/Weiser

Use this helpful book to learn about the leadership tools to fuel success, grow your team, and become the visionary you were meant to be. True leadership isn't a matter of having a certain job or title. In fact, being chosen for a position is only the first of the five levels every effective leader achieves. To become more than

"the boss" people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2. Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. Through humor, in-depth insight, and examples, internationally recognized leadership expert John C. Maxwell describes each of these stages of leadership. He shows you how to master each level and rise up to the next to become a more influential, respected, and successful leader.

How Being Yourself Makes You a Better Leader Harvard Business Press

This volume focuses on the most critical strategic activity in any organization, namely, who gets chosen to sit in the top echelon of the pyramid. Friedman argues that it is the quality of corporate leadership that will determine corporate winners and losers in the global competitive game. The stakes in leadership succession are

high. The selection of key figures is the one human resource activity that no one belittles for being of secondary importance. Indeed, leadership succession is so important and central in many executive minds that it crowds out any other work. The succession process is often fraught with political intrigue, it lacks discipline, and excludes meaningful involvement of senior human resource executives. The contributors to this imaginative volume reveal a succession planning process that is frequently sloppy, superficial, and regularly sabotaged by senior management when they give it short shrift in terms of quality time. In addition, senior management often overrides sound decisions when it comes to filling key positions. The result is a lack of integrity throughout the human resource systems that eventually leads to a collapse of belief in the system and its governance. Noel M. Tichy, a leading figure in the studies of human resource management, has said, "Stewart Friedman is to be congratulated for a successful effort in providing a state of the art look at leadership succession. [He] provides us with an empirical database of what is happening in U.S. corporations, helpful prescriptions for future improvement of leadership succession, and a realistic assessment of the human resource executive challenges in this area."

Why Some Companies Make the Leap ... and Others Don't Berrett-Koehler Publishers

Your biggest asset in leadership is you. How can you expect people to trust and believe in you, if you aren't truthful and don't embrace your whole self at work? There is a need for a new kind of leadership; one that bleeds personality and rings true to employees and customers alike who crave authenticity. You Lead argues that business leaders deliver superior results, communities of engagement both inside and outside of the company and true values-driven success when they are themselves and come across as genuine. Bestselling author, Minter Dial, shows readers how embracing your whole self at work encourages people to also be themselves, seek true fulfillment at work and merge the personal and professional to become true examples of what you stand for. You Lead is a call to arms to leaders to stop pretending to be who they are not, and play on their uniqueness and strengths, to allow people to do the same and develop a culture of authenticity and purpose. With practical advice, real-life stories and a simple framework, this book shows you how you can: - Be yourself, lead by example and merge the professional and personal - Stand for something and allow people to develop true purpose at work - Allow a community to flourish through the right kind of governance model - Radiate your purpose through employees and customers alike for long-term performance

How Schools and Parents Around the World are Inspiring Greatness, One Child at a Time Random House

A Wall Street Journal Bestseller "For nearly thirty years, my life's work has been to help people like you find ways to bring the often warring aspects of life into greater harmony." — Stew Friedman, from *Leading the Life You Want* You're busy trying to lead a "full" life. But does it really feel full—or are you stretched too thin? Enter Stew Friedman, Wharton professor, adviser to leaders across the globe, and passionate advocate of replacing the misguided metaphor of "work/life balance" with something more realistic and sustainable. If you're seeking "balance" you'll never achieve it, argues Friedman. The idea that "work" competes with "life" ignores the more nuanced reality of our humanity—the interaction of four domains: work, home, community, and the private self. The goal is to create harmony among them instead of thinking only in terms of trade-offs. It can be done. Building on his national bestseller, *Total Leadership*, and on decades of research, teaching, and practice as both consultant and senior executive, Friedman identifies the critical skills for integrating work and the rest of life. He illustrates them through compelling original stories of these remarkable people: • former Bain & Company CEO and Bridgespan co-founder Tom Tierney • Facebook COO and bestselling author Sheryl Sandberg • nonprofit leader and US Navy SEAL Eric Greitens • US First Lady Michelle Obama • soccer champion-turned-broadcaster Julie Foudy • renowned artist Bruce Springsteen Each of these admirable (though surely imperfect) people exemplifies a set of skills—for being real, being whole, and being innovative—that produce a sense of purpose, coherence, and optimism. Based on interviews and research, their stories paint a vivid picture of how six very different leaders use these skills to act with authenticity, integrity, and creativity—and they

prove that significant public success is accomplished not at the expense of the rest of life, but as the result of meaningful engagement in all its parts. With dozens of practical exercises for strengthening these skills, curated from the latest research in organizational psychology and related fields, this book will inspire you, inform you, and instruct you on how to take realistic steps now toward leading the life you truly want.
