Fisher explores the process of migration chronologically and at levels varying from the migration of an individual community, to larger patterns of the collective movements of major ethnic groups, to the more abstract study of emigration, migration, and immigration.

How Migration Made Us Who We Are Duke University Press Examines the factors influencing human migration from the earliest people in Africa in search of homelands up to the modern era of forced migration due to war and poverty.

Migration John Wiley & Sons

With the railroad's arrival in the late nineteenth century, immigrants of all colors rushed to the U.S.-Mexico borderlands, transforming the region into a booming international hub of economic and human activity. Following the stream of Mexican, Chinese, and African American migration, Julian Lim presents a fresh study of the multiracial intersections of the borderlands, where diverse peoples crossed multiple boundaries in search of new economic opportunities and social relations. However, as these migrants came together in ways that blurred and confounded elite expectations of racial order, both the United States and Mexico resorted to increasingly exclusionary immigration policies in order to make the multiracial populations of the borderlands less visible within the body politic, and to remove them from the boundaries of national identity altogether. Using a variety of English- and Spanish-language primary sources from both sides of the border, Lim reveals how a borderlands region that has traditionally been defined by Mexican-Anglo relations was in fact shaped by a diverse population that came together dynamically through work and play, in the streets and in homes, through war and marriage, and in the very act of crossing the border.

Likely to prove prophetic in the coming months and years' OBSERVER 'A dazzling tour through 300 years of scientific history' PROSPECT 'A hugely entertaining, life-affirming and hopeful hymn to the glorious adaptability of life on earth' SCOTSMAN We are surrounded by stories of people on the move. Wild species, too, are escaping warming seas and desiccated lands in a mass exodus. Politicians and the media present this upheaval of migration patterns as unprecedented, blaming it for the spread of disease and conflict, and spreading anxiety across the world as a result. But the science and history

of migration in animals, plants, and humans tell a different story. Far from being a disruptive behaviour, migration is an ancient and lifesaving response to environmental change, a biological imperative as necessary as breathing. Climate changes triggered the first human migrations out of Africa. Falling sea levels allowed our passage across the Bering Sea. Unhampered by borders, migration allowed our ancestors to people the planet, into the highest reaches of the Himalayan Mountains and the most remote islands of the Pacific, disseminating the biological, cultural and social diversity that ecosystems and societies depend upon. In other words, migration is not the crisis - it is the solution. Tracking the history of misinformation from the 18th century through to today's anti-immigration policies, *The Next Great Migration* makes the case for a future in which migration is not a source of fear, but of hope.

Controlling a New Migration World explores the factors that drive recent migration control policies and, in turn, sheds light on the unintended consequences of policies for the new character of migration. This book asks how we can account for the immigration policies of liberal states. Is the recent linkage between migration and security a rhetorical invention of elites or a reflection of changing migrant profiles? Are states' control policies effectively containing or only redirecting unwanted migration flows? This increasingly relevant issue will be of great use to anyone working in comparative politics, sociology and studying ethnicity or international migration, as well as professionals working in the migrant/asylum and public law fields.

The History of Human Migration Harvard University Press Humanity has often found itself on the precipice. We've survived and thrived because we've never stopped moving... 'Stops you dead in your tracks ... An absolute revelation' Sue Black, bestselling author of *All That Remains* In this eye-opening book, Johannes Krause, Chair of the Max Planck Institute for the History of Humanity, offers a new way of understanding our past, present and future. Marshalling unique insights from archaeogenetics, an emerging new discipline that allows us to read our ancestors' DNA like journals chronicling personal stories of migration, Krause charts two millennia of adaption, movement and survival, culminating in the triumph of Homo Sapiens as we swept through Europe and beyond in successive waves of migration - developing everything from language, the patriarchy, disease, art and a love of pets as we did so. We also meet our ancestors, from those many of us have heard of - such as Homo Erectus and the

Neanderthals - to the wildly unfamiliar but no less real: the recently discovered Denisovans, who ranged across Asia and, like humans, interbred with Neanderthals; the Aurignacians, skilled artists who, 40,000 years ago, brought about an extraordinary transformation in what our species could invent and create; the Varna, who buried their loved ones with gold long before the Pharaohs of Egypt did; and the Gravettians, big game hunters who were Europe's most successful early settlers until they perished in the face of the toughest opponent humanity had ever faced: the ice age. As well as being a radical new telling of our shared story, this book is a reminder that the global problems that keep us awake at night - climate catastrophe; the sudden emergence of deadly epidemics; refugee crises; ethnic conflict; over-population - are all things we've faced, and overcome, before.

The History of the European Migration Regime John Wiley & Sons

How Chinese migration to the world's goldfields upended global power and economics and forged modern conceptions of race. In roughly five decades, between 1848 and 1899, more gold was removed from the earth than had been mined in the 3,000 preceding years, bringing untold wealth to individuals and nations. But friction between Chinese and white settlers on the goldfields of California, Australia, and South Africa catalyzed a global battle over "the Chinese Question": would the United States and the British Empire outlaw Chinese immigration? This distinguished history of the Chinese diaspora and global capitalism chronicles how a feverish alchemy of race and money brought Chinese people to the West and reshaped the nineteenth-century world. Drawing on ten years of research across five continents, prize-winning historian Mae Ngai narrates the story of the thousands of Chinese who left their homeland in pursuit of gold, and how they formed communities and organizations to help navigate their perilous new world. Out of their encounters with whites, and the emigrants' assertion of autonomy and humanity, arose the pernicious western myth of the "coolie" laborer, a racist stereotype used to drive anti-Chinese sentiment. By the turn of the twentieth century, the United States and the British Empire had answered "the Chinese Question" with laws that excluded Chinese people from immigration and citizenship. Ngai explains how this happened and argues that Chinese exclusion was not extraneous to the emergent global economy but an integral part of it. The Chinese Question masterfully links important themes in world history and economics, from Europe's subjugation of China to the rise of the international gold standard and the invention of racist, anti-Chinese stereotypes that persist to this day.

England's seventeenth-century colonial empire in North America and the Caribbean was created by migration. The quickening pace

of this essential migration is captured in the London port register of 1635, the largest extant port register for any single year in the colonial period and unique in its record of migration to America and to the European continent. Alison Games analyzes the 7,500 people who traveled from London in that year, recreating individual careers, exploring colonial societies at a time of emerging viability, and delineating a world sustained and defined by migration. The colonial travelers were bound for the major regions of English settlement--New England, the Chesapeake, the West Indies, and Bermuda--and included ministers, governors, soldiers, planters, merchants, and members of some major colonial dynasties--Winthrops, Saltonstalls, and Eliots. Many of these passengers were indentured servants. Games shows that however much they tried, the travelers from London were unable to recreate England in their overseas outposts. They dwelled in chaotic, precarious, and hybrid societies where New World exigencies overpowered the force of custom. Patterns of repeat and return migration cemented these inchoate colonial outposts into a larger Atlantic community. Together, the migrants' stories offer a new social history of the seventeenth century. For the origins and integration of the English Atlantic world, Games illustrates the primary importance of the first half of the seventeenth century.

Since the fall of the Iron Curtain, migration has become a major cause for concern in many European countries, but migrations to, from and within Europe are nothing new, as Klaus Bade reminds us in this timely history. A history of migration to, from and within Europe over a range of eras, countries and migration types. Examines the driving forces and currents of migration, their effects on the cultures of both migrants and host populations, including migration policies. Focuses on the nineteenth and twentieth centuries, particularly the period from the Second World War to the present. Illuminates concerns about migration in Europe today. Acts as a corrective to the alarmist reactions of host populations in twenty-first century Europe.

The Epic Story of America's Great Migration John Wiley & Sons

A powerful illustrated history of the Great Migration and its sweeping impact on Black and American culture, from Reconstruction to the rise of hip hop. Over the course of six decades, an unprecedented wave of Black Americans left the South and spread across the nation in search of a better life--a migration that sparked stunning demographic and cultural changes in twentieth-century America. Through gripping and accessible historical narrative paired with illustrations, author and activist Blair Imani examines the largely overlooked impact of The Great Migration and how it affected--and continues to affect--Black identity and America as a whole. Making Our Way Home explores issues like voting rights, domestic terrorism, discrimination, and segregation alongside the flourishing of arts and culture, activism, and civil rights. Imani shows how these influences shaped America's workforce and wealth distribution by featuring the stories of notable people and events, relevant data, and family histories. The experiences of prominent figures such as James Baldwin, Fannie Lou Hamer, El Hajj Malik El Shabazz (Malcolm X), Ella Baker, and others are woven into the larger historical and cultural narratives of the Great Migration to create a truly singular record of this powerful journey.

The Great Migration and the Black American Dream Routledge

"Zahra handles this immensely complicated and multidimensional history with remarkable clarity and feeling." —Robert Levgold, *Foreign Affairs* Between 1846 and 1940, more than 50 million Europeans moved to the Americas in one of the largest migrations of human history, emptying out villages and irrevocably changing both their new homes and the ones they left behind. With a keen historical perspective on the most consequential social phenomenon of the twentieth century, Tara Zahra shows how the policies that gave shape to this migration provided the precedent for future events such as the Holocaust, the closing of the Iron Curtain, and the tragedies of ethnic cleansing. In the epilogue, she places the current refugee crisis within the longer history of migration.

Millions of Mexican men crossed into the United States to find work. They took low-level positions that few Americans wanted and sent money back to communities that depended on their support. They periodically returned to Mexico, living their lives in both countries. After 1986, however, US authorities disrupted this back-and-forth movement by strengthening border controls. Many Mexican men chose to remain in the United States permanently for fear of not being able to come back north if they returned to Mexico. For them, the United States became a *jaula de oro*—a cage of gold. *Undocumented Lives* tells the story of Mexican migrants who were compelled to bring their families across the border and raise a generation of undocumented children.

After the Second World War, the international migration regime in Europe took a course different from the global migration regime and the migration regimes in other regions of the world. From the bureaucratic and restrictive practices that prevailed in the late 1940s in most parts of Europe, the European migration regime was deeply transformed by the gradual implementation of the free movement of people within the European Community, of European citizenship, and of the Schengen agreements in their internal and external dimensions. They have produced a regional regime in Europe with an unparalleled degree of intra-regional openness and an unparalleled degree of closure towards migrants from outside Europe. On the basis of relevant national and international archives, this book explains how German geopolitical and geo-economic strategies during the Cold War shaped the openness of that original regime. The History of the European Migration Regime highlights how the regime was instrumental for Germany to create a stable international order in Western Europe after the war, conducive to German reunification, the rollback of Russian influence from Central Europe, and German economic expansion. The book embraces a large time frame, mostly between 1947 and 1992, and deals with all types of migration between and towards European countries: the movements of unskilled labourers, skilled professionals, and self-employed workers, along with the migrants' family members, examining both their access to economic activity and their social and political rights.

Migration and Colonialism in Late Second Millennium BCE Levant and Its Environs W. W. Norton & Company

In this sweeping work, Elliott Young traces the pivotal century of Chinese migration to the Americas, beginning with the 1840s at the start of the "coolie" trade and ending during World War II. The Chinese came as laborers, streaming across borders legally and illegally and working jobs few others wanted, from constructing railroads in California to harvesting sugar cane in Cuba. Though nations were built in part from their labor, Young argues that they were the first group of migrants to bear the stigma of being "alien." Being neither black nor white and existing outside of the nineteenth century Western norms of sexuality and gender, the Chinese were viewed as permanent outsiders, culturally and legally. It was their presence that hastened the creation of immigration bureaucracies charged with capture, imprisonment, and deportation. This book is the first transnational history of Chinese migration to the Americas. By focusing on the fluidity and complexity of border crossings throughout the Western Hemisphere, Young shows us how Chinese migrants constructed alternative communities and identities through these transnational pathways.

Humans have been on the move for millennia. They have done so slowly as well as quickly, sometimes involuntarily, sometimes transported by force, often relocated at great cost in lives, but they have always moved. Over the centuries, improved transportation has eased the movement, even in the face of man-made or natural obstacles. But in modern times, migration has accelerated and its reach has become truly global. Whether it is Turkish *gastarbeiter* in Germany, Japanese Nisei in Seattle, Filipinos in Kuwait, or Haitians in Brooklyn, the costs and benefits of human mobility on such a wide and rapid scale are hotly debated. *Global History and Migrations*, the second volume of the *Global History Series*, explores the historical background of this issue by focusing on recent history, a time when human movements have been at their most dynamic. This book provides a rich, cross-cultural foundation for a more enlightened understanding of migration and its role in the unfolding shape of global history.

[Ahmad's] "introduction is fiery and charismatic... This book encompasses the diversity of experience, with beautiful variations and stories that bicker back and forth." --Parul Sehgal, *The New York Times* The first global anthology of migration literature featuring works by Mohsin Hamid, Zadie Smith, Marjane Satrapi, Salman Rushdie, and Warsan Shire, with a foreword by Edwidge Danticat, author of *Everything Inside* A Penguin Classic Every year, three to four million people move to a new country. From war refugees to corporate expats, migrants constantly reshape their places of origin and arrival. This selection of works collected together for the first time brings together the most compelling literary depictions of migration. Organized in four parts (Departures, Arrivals, Generations, and Returns), *The Penguin Book of Migration Literature* conveys the intricacy of worldwide migration patterns, the diversity of immigrant experiences, and the commonalities among many of those diverse experiences. Ranging widely across the eighteenth through twenty-first centuries, across every continent of the earth, and across multiple literary genres, the anthology gives readers an understanding of our rapidly changing world, through the eyes of those at the center of that change. With thirty carefully selected poems, short stories, and excerpts spanning three hundred years and twenty-five countries, the collection brings together luminaries, emerging writers, and others who have earned a wide following in their home countries but have been less recognized in the Anglophone world. Editor of the volume Dohra Ahmad provides a contextual introduction, notes, and suggestions for further exploration.

Translated by Carl Ipsen. This short book provides a succinct and masterly overview of the history of migration, from the earliest movements of human beings out of Africa into Asia and Europe to the present day, exploring along the way those factors that contribute to the successes and failures of migratory groups. Separate chapters deal with the migration flows between Europe and the rest of the world in the 19th and 20th centuries and with the turbulent and complex migratory history of the Americas. Livi Bacci shows that, over the centuries, migration has been a fundamental human prerogative and has been an essential element in economic development and the achievement of improved standards of living. The impact of state policies has been mixed, however, as states have each established their own rules of entry and departure - rules that today accentuate the differences between the interests of the sending countries, the receiving countries, and the migrants themselves. Lacking international agreement on migration rules owing to the refusal of states to surrender any of their sovereignty in this regard, the positive role that migration has always played in social development is at risk. This concise history of migration by one of the world's leading demographers will be an indispensable text for students and for anyone interested in understanding how the movement of people has shaped the modern world.
