largely forgotten activist and teacher named Louise Brigham became a pioneer of sustainable furniture design. With her ingenious system for building inexpensive but sturdy “box furniture” out of recycled materials, she aimed to bring good design to the urban working class. As Antoinette LaFarge shows, Brigham forged a singular career for herself that embraced working in the American and European settlement movements, publishing a book of box furniture designs, running carpentry workshops in New York, and founding a company that offered some of the earliest ready-to-assemble furniture in the United States. Her work was a resounding

critique of capitalism’s waste and an assertion of new values in design—values that stand at the heart of today’s open and green design movements.

 Night photographers have one big thing in common: a true love of the dark. Rather than looking at night photography as an extension of daytime shooting with added complications, they embrace the unique challenges of nocturnal photography for the tremendous wealth of creative opportunities it offers. That's just

what this book does. But if the idea of setting out into the deep, dark night with just your camera (and maybe a cup of coffee) gets your creative juices flowing, dive right in. Lance Keimig, one of the premier experts on night photography, has put together a comprehensive reference that will show you ways to capture images you never thought possible. If you have some experience with photography and have always wanted to try shooting at night, you'll learn the basics for film or digital shooting. If you're already a seasoned pro, you'll learn to use sophisticated techniques such as light painting and drawing, stacking

images to create long star trails, and more. A chapter on the history of night photography describes the materials and processes that made night photography possible, and introduces the photographers who have defined night photography as an artistic medium. A chapter on how to use popular software packages such as Lightroom and Photoshop specifically with night time shots shows you how to make the final adjustments to your nocturnal creations. In this book you'll find history, theory, and lots of practical instruction on technique, all illustrated with clear, concise examples, diagrams and charts that reinforce the text,

and inspiring color and black and white images from the author and other luminaries in the field, including Scott Martin, Dan Burkholder, Tom Paiva, Troy Paiva, Christian Waeber, Jens Warnecke and Cenci Goepel, with Foreword by Steve Harper.

YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who

was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . .
. GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . .
. MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and

courtroom gaffes proves hands down that truth is dumber than fiction!
