Proceedings of the 6th International Conference on Marine Structures (MARSTRUCT 2017), May 8-10, 2017, Lisbon, Portugal Progress in the Analysis and Design of Marine Structures Proceedings of the 6th International Conference on Marine Structures (MARSTRUCT 2017), May 8-10, 2017, Lisbon, Portugal

This book moves beyond superficial generalizations about Cairo as a chaotic metropolis in the developing world into an analysis of the ways the city's eighteen million inhabitants have, in the face of a largely neglectful government, built and shaped their own city. Using a wealth of recent studies on Greater Cairo and a deep reading of informal urban processes, the city and its recent history are portrayed and mapped: the huge, spontaneous neighborhoods; housing; traffic and transport; city government; and its people and their enterprises. The book argues that understanding a city such as Cairo is not a daunting task as long as pre-conceived notions are discarded and care is taken to apprehend available information and to assess it with a critical eye. In the case of Cairo, this approach leads to a conclusion that the city can be considered a kind of success story, in spite of everything.

The Logic of a City Out of Control CRC Press

'Analysis and Design of Marine Structures' explores recent developments in methods and modelling procedures for structural assessment of marine structures: - Methods and tools for establishing loads and load effects; - Methods and tools for strength assessment; - Materials and fabrication of structures; - Methods and tools for structural design and optimisation; - Structural reliability, safety and environment protection. The book is a valuable reference source for academics, engineers and professionals involved in marine structures and design of ship and offshore structures.

Progress in the Analysis and Design of Marine Structures American University in Cairo Press Progress in the Analysis and Design of Marine Structures collects the contributions presented at MARSTRUCT 2017, the 6th International Conference on Marine Structures (Lisbon, Portugal, 8-10 May 2017). The MARSTRUCT series of Conferences started in Glasgow, UK in 2007, the second event of the series having taken place in Lisbon, Portugal in March 2009, the third in Hamburg, Germany in March 2011, the fourth in Espoo, Finland in March 2013, and the fifth in Southampton, UK in March 2015. This Conference series deals with Ship and Offshore Structures, addressing topics in the areas of: - Methods and Tools for Loads and Load Effects - Methods and Tools for Strength Assessment - Experimental Analysis of Structures - Materials and Fabrication of Structures - Methods and Tools for Structural Design and Optimisation, and - Structural Reliability, Safety and Environmental Protection Progress in the Analysis and Design of Marine Structures is essential reading for academics, engineers and all professionals involved in the design of marine and offshore structures.
