#### Categories - Materials Classification for the Grid Method. ...

When using the Grid Method for designing a 35-glaze grid it is necessary to classify your glaze materials into several categories: Flux material Alumina material Silica material

The first three make up the base glaze. Then any others can go into:

#### Categories - Materials Classification for the Grid Method

#### Types of Grid-connected Inverters.

Aside from the modes of operation, grid-connected inverters are also classified according to

configuration topology. There are four different categories under this classification. Central inverters, which are usually around several kW to 100 MW range. This paper proposes a rational classification of Islamic Geometric Patterns (IGP) based on the Minimum Number of Grids (MNG) and Lowest Geometric Shape (LGS) used in the construction of the symmetric elements. The existing classification of repeating patterns by their symmetric groups is in many cases not appropriate or prudent [Joy97].
