John Wiley & Sons
Government and Not-for-Profit Accounting: Concepts and Practices, 9th Edition delivers a comprehensive exploration of accounting and reporting standards and practices. Fully compliant with the latest changes in the GASB, FASB, and AICPA, this practical text encourages critical thinking about the rationale behind the rules and regulations. Issues of critical importance to the public and not-for-profit sectors are discussed at length.

National Academies Press
This text is an unbound, three hole punched version. Government and Not-for-Profit Accounting, 7th Edition by Michael Granof, Saleha Khumawala, Thad Calabrese, and Daniel Smith makes students aware of the dynamism of government and not-for-profit accounting and of the intellectual challenges that it presents. Not only

does the 7th edition keep students informed of current accounting and reporting standards and practices, but it also ensures that they are aware of the reasons behind them, their strengths and limitations, and possible alternatives.

Psychology Press
Covering the essentials of fund accounting, this flexible book introduces the reader to the basic accounting principles at work in both governmental and not-for-profit organizations. This brief book divides most of the chapters into independent sections, which may be covered as separate units. The information on state and local government financial reporting has been updated for coverage of the new financial reporting model, the reporting entity, and financial condition analysis. New examples have been added to more clearly describe the nature of lease accounting. The module on pension trust funds has been rewritten to reflect

new GASB pronouncements in a simpler format. New material was added on the measurement of pension costs and other post-employment benefits. For accountants wishing to increase or refresh their knowledge of government and not-for-profit accounting or public budgeting.

Reflecting recent changes in accounting standards, this Sixth Edition of *Financial Management for Public, Health, and Not-for-Profit Organizations*, by Steven A. Finkler, Daniel L. Smith, and Thad D. Calabrese, provides a comprehensive yet practical introduction to the financial decision-making and management skills required of students and practitioners in the public, health, and not-for-profit sectors.

Assuming that you have no prior training in financial management, the authors artfully combine the principles, theory, and analytics of accounting and finance. In every chapter, a wide range of exercises, case studies, and problems help you develop strong financial assessment and judgment proficiencies while reinforcing the essential mechanics of accounting.

Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice.

Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and

instructors time while improving performance over a variety of critical outcomes.

Accounting for Governmental and Nonprofit Entities

McGraw-Hill Education
For more than 60 years, *Accounting for Governmental & Nonprofit Entities* has been the leader in the market. It is a comprehensive governmental and not-for-profit accounting text written for students who will be auditing and working in public and not-for-profit sector entities. Originally published in 1951 and written by Professor R. M. Mikesell, this book and the many subsequent editions revised by Professors Leon Hay, Earl Wilson, Susan Kattelus, Jacqueline Reck, and Suzanne Lowensohn have given generations of instructors and students a comprehensive knowledge of the specialized accounting and financial reporting practices of governmental and not-for-profit organizations, as well as an understanding of how those organizations can better meet the information needs of a diverse set of financial statement users and decision makers. The

vision of these original authors continues to be reflected in this 18th edition, and their strategy of providing a large and innovative set of instructional support materials prepared and tested in the classroom by the authors continues to be a guiding principle today. The current author team brings to this edition their extensive experience teaching government and not-for-profit courses as well as insights gained from their professional experience, scholarly writing, and professional activities. The result is a relevant and accurate text that includes the most effective instructional tools.

The Simplified Guide to Not-for-Profit Accounting, Formation, and Reporting

The Urban Insite Governmental and Nonprofit Accounting, Revised Sixth Edition provides a better balance between theory and practice than other texts, with the most up-to-date coverage. It provides readers with a thorough basis for understanding the logic for and nature of all of the funds and account groups of a government, with a unique approach that enables readers to grasp

the entire accounting and reporting framework for a government before focusing on specific individual fund types and account groups. Includes coverage of the new reporting model standard: GASB Statement 34. Includes illustrations of government-wide financial statements and fund-based financial statements presented using the major fund approach. Points out the major changes required from the current guidance and explains and illustrates the requirements of the new model. Explains and illustrates the GASB Statement 31. Contains the latest revision of OMB Circular A-133 on single audits. Appropriate for undergraduate Accounting courses, such as Governmental Accounting, Public Sector accounting, Government and Nonprofit Accounting, and Fund Accounting. Starting a Non-Benefit Organization John Wiley & Sons

The national income and product accounts that underlie gross domestic product (GDP), together with other key economic data—price and employment statistics—are widely used as indicators of how well the

nation is doing. GDP, however, is focused on the production of goods and services sold in markets and reveals relatively little about important production in the home and other areas outside of markets. A set of satellite accounts—in areas such as health, education, volunteer and home production, and environmental improvement or pollution—would contribute to a better understanding of major issues related to economic growth and societal well-being. Beyond the Market: Designing Nonmarket Accounts for the United States hopes to encourage social scientists to make further efforts and contributions in the analysis of nonmarket activities and in corresponding data collection and accounting systems. The book illustrates new data sources and new ideas that have improved the prospects for progress. **Introduction to Governmental and Not-for-profit Accounting** McGraw-Hill Education "[This book is] the most authoritative assessment of the advantages and disadvantages of recent trends toward the

commercialization of health care," says Robert Pear of The New York Times. This major study by the Institute of Medicine examines virtually all aspects of for-profit health care in the United States, including the quality and availability of health care, the cost of medical care, access to financial capital, implications for education and research, and the fiduciary role of the physician. In addition to the report, the book contains 15 papers by experts in the field of for-profit health care covering a broad range of topics--from trends in the growth of major investor-owned hospital companies to the ethical issues in for-profit health care. "The report makes a lasting contribution to the health policy literature."--Journal of Health Politics, Policy and Law.

Essentials of Accounting for Governmental and Not-for-Profit Organizations
Non-profit Organizations (NPOs) are the fastest growing organizations in modern society. They exist in a liminal realm between public and private organizations, and because of this, new jurisdictions are created for NPOs. The existence of NPOs is contingent upon their adequacy, and

management is a key determining factor as to whether an organization survives. The Handbook of Research on Managerial Solutions in Non-Profit Organizations provides relevant theoretical frameworks and the latest empirical research findings related to the successful management of nonprofits. Providing insights into the best practices and valuable comparisons between strategies in different contexts, this book gives invaluable support for nonprofit managers, policy makers, students, and researchers.

The past several decades have seen unprecedented growth in the scope and complexity of relationships between government and nonprofit organizations. These relationships have been more fruitful than many critics had feared and more problematic than many advocates had hoped. *Nonprofits and Government* is the first comprehensive, multidisciplinary exploration of nonprofit-government relations. The second edition of this important book is fully updated and includes two new chapters. The authors address a host of important issues, including nonprofit advocacy, direct regulatory and tax policy, the conversion of nonprofits to for-profits, clashes in government interaction with religion and the arts, and international nonprofit-government relationships. Practitioners, researchers, and policymakers alike will benefit from the authors' wide-ranging discussion.
