Computers are just for playing games, right? Many of your pupils will think so. It may be a cultural shift for both the pupils and their parents to change that perception of computing. However, the learning gained from the 'games' played on computers in the primary classroom is paramount. The teaching ideas in this book use mostly free tools, which operate across the many platforms that primary schools use. Based on the National Curriculum, the book is split into year groups, and each chapter offers practitioners an essential summary of all the information and vocabulary they need to successfully implement the activity in the classroom.

*Men of Mathematics* HarperCollins UK

Improving Maths and English in Further Education provides a strategic, practical and easily applied toolkit for teachers and leaders as they work with students to gain core skills. The book highlights the unique challenges that are faced within the sector and the value of embedding college-wide literacy and numeracy for success, providing a range of strategies to resolve challenges. Structured to make sure that there is always an alternative approach, method or suggestion, the book allows the reader to choose the steps that suit their context best. Each chapter looks at the key priorities:

- Identifies a range of potential solutions to a challenge faced in FE
- Acknowledges potential

implementation pitfalls and remedies •Suggests practical takeaways, key considerations and next steps Teachers and staff within further and Post-16 education will find this an essential resource for supporting students studying maths and English. "Teachers and leaders from curriculum areas across the sector will find scenarios and anecdotes that resonate in this book; timetabling, accountability, motivation... a must read." Catherine Sezen, Senior Policy Manager - FE "This is an interesting and engaging read from Jonny, who has produced a book that brings together contemporary educational literature, with a personal and honest take on leading and teaching English and Maths in FE." Steven Wallis, Executive Director Quality, NCG "This book caters for the many different voices, people and characters in FE - it does exactly what it says on the tin... It will give you all the tools for a great job with an evidence base to boot." Julia Smith, @tessmaths Jonathan Kay has managed and led English and maths departments in Further Education since 2017, as well as working as consultant for the Association of Colleges and Lead English Expert and examiner for a leading exam board. Jonathan has also previously worked as an English teacher, 2nd in Department and Head of English in a range of Secondary schools.

Synopsis Palmariorum Matheseos Canada : MGR Pub. & Promotions

Lucifer and his army triumphed at Armageddon, leaving humans and demons living in uncertain peace based on sacrifice and strict laws. It is up to those with mixed demon and human blood, the Host, to prevent society from falling into anarchy. Noon Onyx is the first female Host in memory to wield the destructive waning magic that is used to maintain order among the demons. Her unique abilities, along with a lack of control and a reluctance to kill, have branded her as an outsider among her peers. Only her powerful lover, Ari Carmine, and a roguish and mysterious Angel, Rafe Sinclair, support her unconventional ways. When Noon is shipped off to a remote outpost to investigate several unusual disappearances, a task that will most likely involve trying and killing the patron demon of that area, it seems Luck is not on her side. But when the outpost settlers claim that an ancient and evil foe has stepped out of legend to commit the crimes, Noon realizes that she could be facing something much worse than she ever imagined...

FE and other post-16 tutors are increasingly being asked to embed and develop English and maths skills in their lessons, and the revised common inspection framework from Ofsted places an increased emphasis on this. You may lack confidence or the required background knowledge to do this, or be struggling to find ideas that will engage and motivate your learners. Specifically written for use within vocational contexts, this text provides you with a theoretical understanding of the issues involved, including barriers to learning and how to overcome these. In addition it offers a range of practical strategies and ideas to get you started and build confidence and competence in your students. Each activity is accompanied by detailed notes that highlight key learning points, the development of vocational skills and extension opportunities.
