Militari of Vegetius The  
Reception, Transmission  
and Legacy of a Roman  
Text in the Middle Ages  
Sometime around 1446  
A.D., Cardinal Prospero  
Colonna commissioned  
engineer Battista Alberti  
to raise two immense  
Roman vessels from the  
bottom of the lago di  
Nemi, just south of Rome.  
By that time, local  
fishermen had been  
fouling their nets and  
occasionally recovering  
stray objects from the  
sunken ships for 800  
years. Having no idea of

the size of the objects he  
was attempting to  
recover, Alberti failed. For  
most of the next 500  
years, various attempts  
were made to recover the  
vessels. Finally, in 1928,  
Mussolini ordered the  
draining of the lake to  
remove the vessels and  
place them on the lake  
shore. In 1944, the ships  
burned in a fire that was  
generally blamed on the  
Germans. John M.  
McManamon connects  
these attempts at  
underwater archaeology  
with the Renaissance  
interest in reconstructing  
the past in order to affect  
the present. Nautical and  
marine archaeologists, as  
well as students and  
scholars of Renaissance  
history and  
historiography, will  
appreciate this  
masterfully researched  
and gracefully written  
work.

Vegetius' late Roman text became a well-known and highly respected 'classic' in the Middle Ages, transformed by its readers into the authority on the waging of war. Christopher Allmand analyses the medieval afterlife of the *De Re Militari*, tracing the growing interest in the text from the Carolingian world to the late Middle Ages, suggesting how the written word may have influenced the development of military practice in that period. While emphasising that success depended on a commander's ability to outwit the enemy with a carefully selected, well-trained and disciplined army, the *De Re Militari* inspired other unexpected developments, such as that of the 'national' army, and helped create a context in which the role of the soldier assumed greater social and political importance. Allmand explores the significance of the text and the changes it brought for those who accepted the

implications of its central messages.

Flavius Vegetius Renatus was a Roman of high rank who collected and synthesized from ancient manuscripts and regulations the military customs and wisdom that made ancient Rome great.

[Flavii Vegetii Renati De re militari libri quinque](#) BRILL  
An annotated translation of the only text on war to survive from the late Roman era. Vegetius discusses recruiting and training, suggests strategies to use against the barbarian raids of the time, and addresses the fragmentation of the empire's forces, the barbarism of officers and soldiers, and the substitution of mercenaries for standing armies. Distributed by the U. of Pennsylvania Press. Annotation copyright by Book News, Inc., Portland, OR
