Beautiful, Calming Pictures to

Complete Yourself Springer Science & Business Media

The international conference on Advances in Computing and Information technology (ACITY 2012) provides an excellent international forum for both academics and professionals for sharing knowledge and results in theory, methodology and applications of Computer Science and Information Technology. The Second International Conference on Advances in Computing and Information technology (ACITY 2012), held in Chennai, India, during July 13-15, 2012, covered a number of topics in all major fields of Computer

Science and Information Technology including: networking and communications, network security and applications, web and internet computing, ubiquitous computing, algorithms, bioinformatics, digital image processing and pattern recognition, artificial intelligence, soft computing and applications. Upon a strength review process, a number of high-quality, presenting not only innovative ideas but also a founded evaluation and a strong argumentation of the same, were selected and collected in the present proceedings, that is composed of three different volumes.

 From the star of Discovery Channel's Naked and Marooned comes a riveting, adventurous account of one man's history-making journey along the entire length of the Amazon—and through the most bio-diverse habitat on Earth. Fans of Turn Right at Machu Piccu and readers of Jon Krakauer and Bill Bryson and will revel in Ed Stafford's extraordinary prose and lush descriptions. In April 2008, Ed Stafford set off to become the first man ever to walk the entire length of the Amazon. He started on the Pacific coast of Peru, crossed the Andes Mountain range to find the official source of the river. His journey lead on through parts of Colombia and right across Brazil; all while outwitting

dangerous animals, machete wielding indigenous people as well as negotiating injuries, weather and his own fears and doubts. Yet, Stafford was undeterred. On his grueling 860-day, 4,000-plus mile journey, Stafford witnessed the devastation of deforestation firsthand, the pressure on tribes due to loss of habitats as well as nature in its true-raw form. Jaw-dropping from start to finish, *Walking the Amazon* is the unforgettable and gripping story of an unprecedented adventure. *Walking the Amazon* is also available as a Spanish edition entitled *Caminado El Amazonas*.

Gardening Illustrated Harper Collins

This book investigates formal characteristics and discourse functions of linguistic creativity at the level of idioms in spoken ELF as represented in the Vienna-Oxford International Corpus of English (VOICE). Building on the findings of previous ELF research, the book proposes that creativity might serve as a fundamental concept in accounting for the variation that seems to be central to describing and understanding English as a lingua franca.

Recommender Systems Handbook

Cambridge University Press

Blake Taylor's mother first suspected he had ADHD when he, at only three years of age, tried to push his infant sister in her carrier off the kitchen table. As time went by, Blake developed a reputation for being hyperactive and impulsive. He launched rockets (accidentally) into neighbor's swimming pools and set off alarms in museums. Blake was diagnosed formally with ADHD when he was five years old. In *ADHD and Me*, he tells about the next twelve years as he learns to live with both the good and bad sides of life with ADHD.

Biomedical Natural Language Processing

Springer Nature

This book presents 29 revised invited and selected lectures given by top-researchers at the First International Workshop on Intercultural Collaboration, IWIC 2007, held in Kyoto, Japan. This state-of-the-art survey increases mutual understanding in our multicultural world by featuring collaboration support, social psychological analyses of intercultural interaction, and case studies from field workers.

Underwater Electroacoustic

Measurements John Benjamins

Publishing Company

A sophisticated and beautiful dot-to-dot illustration book. Relax and focus your mind with these beautiful dot-to-dot pictures. Emily Milne Wallis provides a book of sophisticated dot-to-dot illustrations for you to complete yourself. Featuring majestic animals, elegant buildings and

gorgeous scenes from nature, this book is a window to a few minutes of peace and calm. De-stress and lose yourself to the task of joining the dots and revealing the stunning drawings within them.

Musical News Young Dreamers Press

This two-volume set (CCIS 1229 and CCIS 1230) constitutes the refereed proceedings of the 5th International Conference on Recent Developments in Science, Engineering and Technology, REDSET 2019, held in Gurugram, India, in November 2019. The 74 revised full papers presented were carefully reviewed and selected from total 353 submissions.

The papers are organized in topical

sections on data centric programming;

next generation computing; social and

web analytics; security in data science

analytics; big data analytics.

Power Maths Year 5 Pupil Practice Book 5B

Springer

With the growing use of information technology and the recent advances in web systems, the amount of data available to users has increased exponentially.

Thus, there is a critical need to understand

the content of the data. As a result, data-

mining has become a popular research

topic in recent years for the treatment of

the "data rich and information poor"

syndrome. In this carefully edited volume

a theoretical foundation as well as

important new directions for data-mining

research are presented. It brings together

a set of well respected data mining

theoreticians and researchers with

practical data mining experiences. The

presented theories will give data mining

practitioners a scientific perspective in

data mining and thus provide more insight

into their problems, and the provided new

data mining topics can be expected to

stimulate further research in these

important directions.

Creativity in English as a Lingua Franca

Penguin

This second edition of a well-received text,

with 20 new chapters, presents a coherent

and unified repository of recommender

systems' major concepts, theories,

methodologies, trends, and challenges. A

variety of real-world applications and

detailed case studies are included. In

addition to wholesale revision of the

existing chapters, this edition includes

new topics including: decision making and

recommender systems, reciprocal

recommender systems, recommender

systems in social networks, mobile

recommender systems, explanations for

recommender systems, music

recommender systems, cross-domain

recommendations, privacy in

recommender systems, and semantic-

based recommender systems. This multi-disciplinary handbook involves world-wide experts from diverse fields such as artificial intelligence, human-computer interaction, information retrieval, data mining, mathematics, statistics, adaptive user interfaces, decision support systems, psychology, marketing, and consumer behavior. Theoreticians and practitioners from these fields will find this reference to be an invaluable source of ideas, methods and techniques for developing more efficient, cost-effective and accurate recommender systems.

Masculinity and Sexuality in High School.

With a New Preface Springer

This book presents the peer-reviewed

proceedings of the 5th International

Conference on Intelligent Computing and

Applications (ICICA 2019), held in

Ghaziabad, India, on December 6-8, 2019.

The contributions reflect the latest

research on advanced computational

methodologies such as neural networks,

fuzzy systems, evolutionary algorithms,

hybrid intelligent systems, uncertain

reasoning techniques, and other machine

learning methods and their applications to

decision-making and problem-solving in

mobile and wireless communication

networks.

A Handbook for Developing and

Implementing Individual Education Plans

(IEPs) Springer

The multiverse is a concept that

acknowledges the existence of a

multiplicity of worlds or universes. The

designs of these universes do not have to

be the same as our universe, but we have

no clear view of what the "other" designs

might be. It is suspected that they can

obey different laws of physics and

different constants of physics, which

further implies different chemistry,

biology, and life. Some say that the

universes within the multiverse allow for

different mathematics or even for different

metamathematical logic. This book

discusses most of the above aspects of the

multiverse concept starting with the

philosophy, through all the mathematical

and physical subtleties, finally exploring

the origin of life and consciousness. This

book provides a satisfying intellectual

exploration of front-edge advances in

contemporary cosmology.

The London Journal: and Weekly Record of Literature, Science, and Art Transportation Research Board

This Special Report is a greatly expanded edition of a previous report on landslides (Special Report 176, "Landslides: Analysis and Control") published in 1978. The new report, which has been designed with an even broader international scope, contains comprehensive, practical discussions of field investigations, laboratory testing, and stability analysis procedures and technologies; comprehensive references to the literature; and discussions of case studies, state-of-the-art techniques, and research directions. The report is presented in five sections: (1) Principles, Definitions, and Assessment; (2) Investigation; (3) Strength and Stability Analysis; (4) Mitigation; and (5) Special Cases and Materials.

Dude, You're a Fag Springer Science & Business Media

High school and the difficult terrain of sexuality and gender identity are brilliantly explored in this smart, incisive ethnography. Based on eighteen months of fieldwork in a racially diverse working-class high school, *Dude, You're a Fag* sheds new light on masculinity both as a field of meaning and as a set of social practices. C. J. Pascoe's unorthodox approach analyzes masculinity as not only a gendered process but also a sexual one. She demonstrates how the "specter of the fag" becomes a disciplinary mechanism for regulating heterosexual as well as homosexual boys and how the "fag discourse" is as much tied to gender as it is to sexuality.

Idiom and Metaphor Cengage Learning
The whole-class mastery approach that works for every child. Underpinned by the most effective teaching practices, and created by a team of mastery experts led by Series Editor Tony Staneff, *Power Maths* is designed to make the whole-class mastery teaching approach work for you, your children and your school. The Practice Books provide just the right amount of intelligent practice for children to complete independently in the final section of the lesson. The practice questions are for everyone - each question

varies one small element to move children on in their thinking. All practice questions are carefully developed to reveal misconceptions. 'Reflect' questions help children to reason and show how deep their understanding is before moving on. *Power Maths* characters encourage and challenge children to develop growth mindsets and work flexibly. Calculations are connected so that children think about the underlying concept.

The Anger Gap Univ of California Press
Biomedical Natural Language Processing is a comprehensive tour through the classic and current work in the field. It discusses all subjects from both a rule-based and a machine learning approach, and also describes each subject from the perspective of both biological science and clinical medicine. The intended audience is readers who already have a background in natural language processing, but a clear introduction makes it accessible to readers from the fields of bioinformatics and computational biology, as well. The book is suitable as a reference, as well as a text for advanced courses in biomedical natural language processing and text mining.

Introduction to Sports Medicine and Athletic Training (Book Only) Walter de Gruyter GmbH & Co KG

Anger is a powerful mobilizing force in American politics on both sides of the political aisle, but does it motivate all groups equally? This book offers a new conceptualization of anger as a political resource that mobilizes black and white Americans differentially to exacerbate political inequality. Drawing on survey data from the last forty years, experiments, and rhetoric analysis, Phoenix finds that - from Reagan to Trump - black Americans register significantly less anger than their white counterparts and that anger (in contrast to pride) has a weaker mobilizing effect on their political participation. The book examines both the causes of this and the consequences. Pointing to black Americans' tempered expectations of politics and the stigmas associated with black anger, it shows how race and lived experience moderate the emergence of emotions and their impact

on behavior. The book makes multiple theoretical contributions and offers important practical insights for political strategy.
