have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix

as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Phil Edmonston,
Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and

mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300,

including an \$80 "handling" charge for \$25 worth of urea. Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's

automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up."

These flash cards were developed with the aim of helping health profession students prepare for a practical exam in a typical medical gross anatomy and/or neuroanatomy course. The images on these cards are photographs of cadaver dissections. The front of each card typically has structures to identify. The correct answers are identified on the back of the card including details about important anatomical characteristics of that structure. Also, material was added that will be useful in preparation for the "written" component of the gross anatomy exams.

 January 6th was a day that will go down in infamy in American History. Insurrection Day lays out a graphic timeline of events that lead up to that day. Angry at what happened that day? Confused? Want to know more about how it happened, and how you can prevent it from happening again? Insurrection Day can help turn anger and confusion into action as it graphically shows the events leading up to that day, and describes actions that all of us can take to prevent it from happening again. Democracy is in danger, and it is up to each of us to defend it! As much of America did that day, the authors including their resources, watched,

live, in horror January 6th as it unfolded. Angered by that day, and also afraid for democracy, they decided to turn fear into action. At the beginning of June 2021, they saw winter coming. This book is the result. This story behind January 6th is still very much publicly unfolding. This is the first chapter in the Insurrection Saga, the next chapter is up to all of us. To the Congressional Committee Carpe Diem!

 Just as pilots and doctors improve by studying crash reports and postmortems, experience designers can improve by learning how customer experience failures cause products to fail in the marketplace.

Rather than proselytizing a particular approach to design, *Why We Fail* holistically explores what teams actually built, why the products failed, and how we can learn from the past to avoid failure ourselves. *The Economist* HarperCollins Publishers Offers advice for prospective buyers of cars and trucks, reveals information on secret warranties and confidential service bulletins, and tells how to complain and get results.
