 Based on his extensive experience in international librarianship, Peter Johan Lor, South Africa's first National Librarian and a former Secretary General of the IFLA, has written the first comprehensive and systematic overview of international and comparative librarianship. His book provides a conceptual framework and methodological guidelines for the field and covers the full range of international

relations among libraries and information services, with particular attention to the international political economy of information, the international diffusion of innovations and policy in library and information services, LIS development and international aid. It concludes with a discussion of the practical relevance and future of international and comparative studies in LIS. See a short interview with Peter Lor on his work

 STARRED FORWARD REVIEW STARRED SCHOOL LIBRARY JOURNAL REVIEW The little blue house in this lovely, lyrical book could be overlooking any ocean, and the narrator could be any child anywhere, gazing out over the waters, thinking about all the places she could go and imagining other little blue houses on other shores, with other children gazing back. What

child doesn't love walking in the surf, feeling the water steal the sand from beneath her toes as a wave retreats? Who doesn't love the salty smell of the air and the sight of ships far out on the horizon? What happens in the oceans is critically important to life on Earth. That's why the girl in her little blue house wants to believe that the children gazing back from far over the horizon love the oceans as she does and wants to keep them safe, alive, and beautiful.

Essential tools for implementing right-sized prospect research techniques that help nonprofit organizations reach their fundraising goals Written especially for front-line fundraisers, Prospect Research for Fundraisers presents a practical understanding of prospect research, prospect management, and fundraising analytics, demonstrating how research can be used to raise more money. Filled with examples, case studies, interviews, and stories, this unique book is structured around the fundraising cycle and illustrates the myriad of current and ever-changing prospect research tools and techniques available to boost an organization's fundraising effectiveness. From essential overviews to how-to-search skills, this practical book gives development officers the tools to understand how to use prospect research in ways that best fit their goals for each stage of the fundraising cycle. Provides practical insight to understand the best use of each prospect research tool and technique Features a companion website with a variety of online tools to help readers implement key concepts Part of the AFP Fund Development Series Prospect Research for Fundraisers provides fundraisers with an understanding of what prospect research is and which resources are available to small organizations that have limited internal capacity, medium-sized organizations building capacity, and large organizations wanting to maximize their strengths. It offers a practical understanding of the relevant tools at the disposal of development officers and managers responsible for hiring, outsourcing, purchasing, managing, and implementing prospect research within their organizations.

Union List of Serials in Libraries of the United States and Canada HarperCollins

The story of the fascinating, fraught alliance among Frederick Douglass, William Lloyd Garrison, and Maria Weston Chapman—and how its breakup led to the success of America's most important social movement. "Fresh, provocative and engrossing." —New York Times In the crucial early years of the Abolition movement, the Boston branch of the cause seized upon the star power of the eloquent ex-slave Frederick Douglass to make its case for slaves' freedom. Journalist William Lloyd Garrison promoted emancipation while Garrison loyalist Maria Weston Chapman, known as "the

Contessa," raised money and managed Douglass's speaking tour from her Boston townhouse. Conventional histories have seen Douglass's departure for the New York wing of the Abolition party as a result of a rift between Douglass and Garrison. But, as acclaimed historian Linda Hirshman reveals, this completely misses the woman in power. Weston Chapman wrote cutting letters to Douglass, doubting his loyalty; the Bostonian abolitionists were shot through with racist prejudice, even aiming the N-word at Douglass among themselves. Through incisive, original analysis, Hirshman convinces that the inevitable breakup was in fact a successful failure. Eventually, as the most sought-after Black activist in America, Douglass was able to dangle the prize of his endorsement over the Republican Party's candidate for president, Abraham Lincoln. Two years later the abolition of slavery—if not the abolition of racism—became immutable law.

Significant questions about Nazi Germany are examined from the point of view of the public library: Was national socialism an aberration from traditional German values or was it a logical development of those traditions? Did the Nazi state carry through a true revolution or did revolutionary rhetoric merely camouflage a power grab? What relationships existed between local governments and the central government? What role did the party play? The book also provides a detailed analysis of the administrative organization, policies, and programs of German public libraries between 1933 and 1945, treating the subject on its own terms. The Nazi period was dramatic and destructive, yet was a critical phase in the development of German public libraries. To serve the ends of national socialism, the new regime brought an institution adrift in a backwater into the mainstream. *The Library Catalogs of the Hoover*

Winner of the 2021 National Jewish Book Award for Contemporary Jewish Life and Practice Finalist for the 2021 Kirkus Prize in Nonfiction A New York Times Notable Book of the Year A Wall Street Journal, Chicago Public Library, Publishers Weekly, and Kirkus Reviews Best Book of the Year A startling and profound exploration of how Jewish history is exploited to comfort the living. Renowned and beloved as a prizewinning novelist, Dara Horn has also been publishing penetrating essays since she was a teenager. Often asked by major publications to write on subjects related to Jewish culture—and increasingly in response to a recent wave of deadly antisemitic attacks—Horn was troubled to realize what all of these assignments had in common: she was being asked to write about dead Jews, never about living ones. In these essays, Horn reflects on subjects as far-flung as the international veneration of Anne Frank, the mythology that Jewish family names were changed at Ellis Island, the blockbuster traveling exhibition Auschwitz, the marketing of the Jewish history of Harbin, China, and the little-known life of the "righteous Gentile" Varian Fry. Throughout, she challenges us to confront the reasons why there might be so much fascination with Jewish deaths, and so little respect for Jewish lives unfolding in the present. Horn draws upon her travels, her research, and also her own family life—trying to explain Shakespeare's Shylock to a curious ten-year-old, her anger when swastikas are drawn on desks in her children's school, the profound perspective offered by traditional religious practice and study—to assert the vitality, complexity, and depth of Jewish life against an antisemitism that, far from being disarmed by the mantra of "Never forget," is on the rise. As Horn explores the (not so) shocking attacks on the American Jewish community in recent years, she reveals the subtler dehumanization built into the public piety that surrounds the Jewish past—making the radical argument that the benign reverence we give to past horrors is itself a profound affront to human dignity. Now including a reading group guide.

Philanthropy is everywhere. In 2013, in the United States alone, some \$330 billion was recorded in giving, from large donations by the wealthy all the way down to informal giving circles. We tend to think of philanthropy as unequivocally good, but as the contributors to this book show, philanthropy is also an exercise of power. And like all forms of power, especially in a democratic society, it deserves scrutiny. Yet it rarely has been given serious attention. This book fills that gap, bringing together expert philosophers, sociologists, political scientists, historians, and legal scholars to ask fundamental and pressing questions about philanthropy's role in democratic societies. The contributors balance empirical and normative approaches, exploring both the roles philanthropy has actually played in societies and the roles it should play. They ask a multitude of questions: When is philanthropy good or bad for democracy? How does, and should, philanthropic power interact with expectations of equal citizenship and democratic political voice? What makes the exercise of philanthropic power legitimate? What forms of private activity in the public interest should democracy promote, and what forms should it resist? Examining these and many other topics, the contributors offer a vital assessment of philanthropy at a time when its power to affect public outcomes has never been greater.

### Philanthropy in Democratic Societies

Providing a compelling look at veterans' policy, this book describes why the Republican party is considered the party for veterans despite the fact that Congressional Democrats are responsible for a greater number of policy initiatives. The United States is home to 21 million veterans, and Veterans' Affairs is the second-largest federal department, with a

budget exceeding \$119 billion. Many veterans, however, remain under-served. Republicans are seen as veterans' champions, and they send the majority of Congressional constituent communications on veterans' issues, yet they are lead sponsors on only 37 percent of bills considered by the Senate Veterans' Affairs Committee. What accounts for this discrepancy? Drawing on thousands of e-newsletters sent from Congress to constituents, Congress and U.S. Veterans: From the GI Bill to the VA Crisis argues that the distribution of veterans across districts and the Republican Party is based on government spending, which pulls Republican legislators in opposite directions. This eye-opening book offers a history of veterans' programs, highlights legislative leaders and the most pressing policy areas for reform, identifies the issues most often discussed by members of Congress from each party, points out which Congresspeople have acted on veterans' issues and which have not, and offers an analysis of veteran population distribution and legislative policy preferences.

### *Library Literature*

In resource poor, cost saving times, this book provides practical advice on new methods and technologies involved in systematic searching and explores the role of information professionals in delivering these changes. The editors bring together expert international practitioners and researchers to highlight the latest thinking on systematic searching. Beginning by looking at the methods and techniques underlying systematic searching, the book then examines the current challenges and the potential solutions to more effective searching in detail, before considering the role of the information specialist as an

expert searcher. Systematic Searching blends theory and practice and takes into account different approaches to information retrieval with a special focus being given to searching for complex topics in a health-related environment. The book does not presume an in-depth prior knowledge or experience of systematic searching and includes case studies, practical examples and ideas for further research and reading. The book is divided into three parts: Methods covers theoretical approaches to evidence synthesis and the implications that these have for the search process, including searching for complex topics and choosing the right sources. Technology examines new technologies for retrieving evidence and how these are leading to new directions in information retrieval and evidence synthesis. People considers the future of the information specialist as an expert searcher and explores how information professionals can develop their skills in searching, communication and collaboration to ensure that information retrieval practice is, and remains, evidence-based. Systematic Searching will be essential reading for library and information service providers and information specialists, particularly those in a health-related environment. It will also be of interest to students of library and information science, systematic reviewers, researchers and practitioners conducting complex searches in settings including social care, education and criminal justice.
