Manusia Dalam Pandangan Psikologi W. W. Norton & Company
 While the midlife crisis has been thoroughly explored by experts, there is another landmine period in our adult development, called the quarterlife crisis, which can be just as devastating. When young adults emerge at graduation from almost two decades of schooling, during which each step to take is clearly marked, they encounter an overwhelming number of choices regarding their careers, finances, homes, and social networks. Confronted by an often shattering whirlwind of new responsibilities, new

liberties, and new options, they feel helpless, panicked, indecisive, and apprehensive. Quarterlife Crisis is the first book to document this phenomenon and offer insightful advice on smoothly navigating the challenging transition from childhood to adulthood, from school to the world beyond. It includes the personal stories of more than one hundred twentysomethings who describe their struggles to carve out personal identities; to cope with their fears of failure; to face making choices rather than avoiding them; and to balance all the demanding aspects of personal and professional life. From "What do all my doubts mean?" to "How do I know if the decisions I'm making are right?" this book compellingly addresses the hardest questions facing young adults

today.

Perspective Routledge

Now in its fourth edition, Communication and Human Behavior continues to offer students a broad introduction to the study of communication which is expansive yet integrated, that links theory to practice, and that is rigorous yet readable. Neither a watered-down treatment of the subject nor a how-to text, this volume presumes that the study of communication in human affairs is a complex phenomenon with important and far-reaching effects. Employing a thorough description of a variety of approaches and using the cohering insights of systems theory, the text presents to students the broad and colorful landscape of the field, outlines the history of communication study, and focuses on communication as a basic life process. Further, it develops an awareness of verbal and nonverbal codes used in sending and receiving messages, and examines the role of media in multiple contexts of human life.

In the last few decades, literary critics have increasingly drawn insights from cognitive neuroscience to deepen and clarify our understanding of literary representations of mind. This cognitive turn has been equally generative and contentious. While cognitive literary studies has reinforced how central the concept of mind is to aesthetic practice from the classical period to the present, critics have questioned its literalism and selective borrowing of scientific authority. Mindful Aesthetics presents both these perspectives as part of a broader consideration of the ongoing and vital importance of shifting concepts of mind to both literary and critical practice. This collection contributes to the forging of a new interdisciplinarity,' to paraphrase Alan Richardson's recent preface to the Neural Sublime, that is more concerned with addressing how, rather than why, we should navigate the increasingly narrow gap between the humanities and the sciences.

Experience is vital for a leader's success, but merely having an experience (such as a challenging new job, a stretch assignment, or an unexpected hardship) isn't enough. The best leaders know not just how to seek out developmental experiences, but how to extract the essential lessons within each experience and apply them to future situations. This book will walk you through a four step process for making the most out of your experiences. You will learn how to seek out beneficial experiences, make sense out of both old and new experiences, internalize the most useful lessons from each experience, and apply those lessons to new, unfamiliar, and challenging situations. By becoming learning agile, you'll be able to use the lessons of experience to meet the challenges headed your way.

'I handed my school photograph to my mother. She stared from the photograph to me. "Lord, sweet Lord, how come she so ugly. Ugly. Ugly." These cruel words are just the beginning. Constance's mother systematically abused her daughter, both physically and emotionally, throughout her childhood. Regularly beaten and starved, the child was so desperate she took herself off to Social Services and tried to get taken into care. When Constance was thirteen, her mother simply moved out, leaving her daughter to fend for herself: there was no gas, no electricity and no food. But somehow Constance found the courage to survive her terrible start in life. This is her heartbreaking - and ultimately triumphant story.

Relational maintenance provides a rallying point for those seeking to discover the behaviors that individuals utilize to sustain their personal relationships. Theoretical

models, research programs, and specific studies have examined how people in a variety of close relationships choose to define and maintain those relationships. In addition, relational maintenance turns our attention to communicative processes that help people sustain their close relationships. In this collection, editors Daniel J. Canary and Marianne Dainton focus on the communicative processes critical to the maintenance and enhancement of personal relationships. The volume considers variations in maintaining different types of personal relationships; structural constraints on relationship maintenance; and cultural variations in relational maintenance. Contributions to the volume cover a broad range of relational types, including romantic relationships, family relationships, long-distance relationships, workplace relationships, and Gay and Lesbian relationships, among others. *Maintaining Relationships Through Communication: Relational, Contextual, and Cultural Variations* synthesizes current research in relationship maintenance, emphasizes the ways that behaviors vary in their maintenance functions across relational contexts, discusses alternative explanations for maintaining relationships, and presents avenues for future research. As such, it is intended for students and scholars studying interpersonal communication and personal relationships.
