"Modern English course for real practice online or in the real world. Our first review said 21st century vocabulary and situations. Twenty three-hour lesson plans with attractive and photocopiable student worksheets. Our materials: [Are specially designed to be used in the real world (English speaking countries) and online (non-English speaking countries) using Skype, language teaching websites and online language exchange websites for real practice of the target language [Have been taught hundreds of times by many teachers and work incredibly well [Have been re-written and edited by experienced writers and editors after six years of teaching and testing development [Will save you hours of lesson planning time and are ready to teach [Will inspire your students, boost their confidence and maintain their motivation levels as they prove to themselves Out There that they can 'do it' [Enable you to actually teach and not worry about planning, timings, materials and fillers"

The Oxford Encyclopedia of British Literature Simon and Schuster

The definitive story of the making of 2001: A Space Odyssey, acclaimed today as one of the greatest films ever made, and of director Stanley Kubrick and writer Arthur C. Clarke—"a tremendous explication of a tremendous film....Breathtaking" (The Washington Post). Fifty years ago a strikingly original film had its premiere. Still acclaimed as one of the most remarkable and important motion pictures ever made, 2001: A Space Odyssey

depicted the first contacts between humanity and extraterrestrial intelligence. The movie was the product of a singular collaboration between Stanley Kubrick and science fiction visionary Arthur C. Clarke. Fresh off the success of his cold war satire Dr. Strangelove, Kubrick wanted to make the first truly first-rate science fiction film. Drawing from Clarke's ideas and with one of the author's short stories as the initial inspiration, their bold vision benefited from pioneering special effects that still look extraordinary today, even in an age of computer-generated images. In Space Odyssey, author, artist, and award-winning filmmaker Michael Benson "delivers expert inside stuff" (San Francisco Chronicle) from his extensive research of Kubrick's and Clarke's archives. He has had the cooperation of Kubrick's widow, Christiane, and interviewed most of the key people still alive who worked on the film. Drawing also from other previously unpublished interviews, Space Odyssey provides a 360-degree view of the film from its genesis to its legacy, including many previously untold stories. And it features dozens of photos from the making of the film, most never previously published. "At last! The dense, intense, detailed, and authoritative saga of the making of the greatest motion picture I've ever seen...Michael Benson has done the Cosmos a great service" (Academy Award-winning actor Tom Hanks).

Rescued by the Space Pirate HarperCollins UK

Part of the premise of the online discussion transcribed in this book is how Gerry Anderson's television series 'Space: 1999' can be understood in relation to Stanley Kubrick's '2001: A Space Odyssey' by looking at both narratives through the perspective of systems theory. As a result of doing so, an engaged debate concerned with the political and philosophical subtext of both stories developed. This book gives a full account of the debate with summaries of ideas and insights. The book has been developed on an idealistic basis. It is sold at the lowest price the publisher was willing to accept.

The Secret of the Island Modern Library

An imposing black structure provides a connection between the past and the future in this enigmatic adaptation of a short story by revered sci-fi author Arthur C. Clarke. When Dr. Dave Bowman (Keir Dullea) and other astronauts are sent on a mysterious mission, their ship's computer system, HAL, begins to display increasingly strange behavior, leading up to a tense showdown between man and machine that results in a mind-bending trek through space and time.

The Daily Show (The Book) Destiny Image Publishers

The classic science fiction novel that captures and expands on the vision of Stanley Kubrick's immortal film—and changed the way we look at the stars and ourselves. From the savannas of Africa at the dawn of mankind to the rings of Saturn as man ventures to the outer rim of our solar system, 2001: A Space Odyssey is a journey unlike any other. This allegory about humanity's exploration of the universe—and the universe's reaction to humanity—is a hallmark achievement in storytelling that follows the crew of the spacecraft Discovery as they embark on a mission to Saturn. Their vessel is controlled by HAL 9000, an artificially intelligent supercomputer capable of the highest level of cognitive functioning that rivals—and perhaps threatens—the human mind. Grappling with space exploration, the perils of technology, and the limits of human power, 2001: A Space Odyssey continues to be an enduring classic of cinematic scope.

Space Odyssey Grand Central Publishing

NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning The Daily Show with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, The Daily Show with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of The Daily Show's most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, The Daily Show has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

BearCity Routledge

Almost all students have seen 2001, but virtually none understand its inheritance, its complexities, and certainly not its ironies. The essays in this collection, commissioned from a wide variety of scholars, examine in detail various possible readings of the film and its historical context. They also examine the film as a genre piece--as the summa of science fiction that simultaneously looks back on the science fiction conventions of the past (Kubrick began thinking of making a science fiction film during the genre's heyday in the fifties), rethinks the convention in light of the time of the film's creation, and in turn changes the look and meaning of the genre that it revived--which now remains as prominent as it was almost four decades ago. Constructed out of its director's particular intellectual curiosity, his visual style, and his particular notions of the place of human agency in the world and, in this case, the universe, 2001 is, like all of his films, more than it appears, and it keeps revealing more the more it is seen. Though their backgrounds and disciplines differ, the authors of this essay collection are united by a talent for vigorous yet incisive writing that cleaves closely to the text--to the film itself, with its contextual and intrinsic complexities--granting readers privileged access to Kubrick's formidable, intricate classic work of science fiction.

Project Hail Mary Simon & Schuster

Stanley Kubrick's epic mind-expanding adventure traces man's journey from prehistory into the uncharted universe of the future, inviting us to rethink everything we thought we knew. Each set in the Making of a Masterpiece series comes in a deluxe LP-sized folio and includes a DVD of the remastered film, the original poster, interviews, and...

2001 A Space Odyssey Gateway

This set of eight volumes presents the reader with selected primary texts in the genre now generally known as future fiction. The chosen texts are designed to explore the dominant characteristics of the genre and examine how it changed over the 18th and 19th centuries.

Space Odyssey Entangled: Scorched

The year 1866 was signalised by a remarkable incident, a mysterious and puzzling phenomenon, which doubtless no one has yet forgotten. Not to mention rumours which agitated the maritime population and excited the public mind, even in the interior of continents, seafaring men were particularly excited. Merchants, common sailors, captains of vessels, skippers, both of Europe and America, naval officers of all countries, and the Governments of several States on the two continents, were deeply interested in the matter. For some time past vessels had been met by "an enormous thing," a long object, spindle-shaped, occasionally phosphorescent, and infinitely larger and more rapid in its movements than a whale. The facts relating to this apparition (entered in various log-books) agreed in most respects as to the shape of the object or creature in question, the

untiring rapidity of its movements, its surprising power of locomotion, and the peculiar life with which it seemed endowed. If it was a whale, it surpassed in size all those hitherto classified in science. Taking into consideration the mean of observations made at divers times—rejecting the timid estimate of those who assigned to this object a length of two hundred feet, equally with the exaggerated opinions which set it down as a mile in width and three in length—we might fairly conclude that this mysterious being surpassed greatly all dimensions admitted by the learned ones of the day, if it existed at all. And that it DID exist was an undeniable fact; and, with that tendency which disposes the human mind in favour of the marvellous, we can understand the excitement produced in the entire world by this supernatural apparition. As to classing it in the list of fables, the idea was out of the question. On the 20th of July, 1866, the steamer Governor Higginson, of the Calcutta and Burnach Steam Navigation Company, had met this moving mass five miles off the east coast of Australia. Captain Baker thought at first that he was in the presence of an unknown sandbank; he even prepared to determine its exact position when two columns of water, projected by the mysterious object, shot with a hissing noise a hundred and fifty feet up into the air. Now, unless the sandbank had been submitted to the intermittent eruption of a geyser, the Governor Higginson had to do neither more nor less than with an aquatic mammal, unknown till then, which threw up from its blow-holes columns of water mixed with air and vapour. Similar facts were observed on the 23rd of July in the same year, in the Pacific Ocean, by the Columbus, of the West India and Pacific Steam Navigation Company. But this extraordinary creature could transport itself from one place to another with surprising velocity; as, in an interval of three days, the Governor Higginson and the Columbus had observed it at two different points of the chart, separated by a distance of more than seven hundred nautical leagues.

The Lost Worlds of 2001 Lulu.com

From "America's nerviest journalist" (Newsweek)--a breath-taking epic, a magnificent adventure story, and an investigation into the true heroism and courage of the first Americans to conquer space. "Tom Wolfe at his very best" (The New York Times Book Review) Millions of words have poured forth about man's trip to the moon, but until now few people have had a sense of the most engrossing side of the adventure; namely, what went on in the minds of the astronauts themselves - in space, on the moon, and even during certain odysseys on earth. It is this, the inner life of the astronauts, that Tom Wolfe describes with his almost uncanny empathetic powers, that made The Right Stuff a classic.

Xenophon gives us an alternative to Plato's accounts of the lessons of Socrates. As you probably know if you are reading this, Socrates left nothing behind by way of written teachings. All we know of the great philosopher's teachings come from the accounts of his students. Xenophon's version (Memorabilia of Socrates) is stylistically different from Plato's dialogues(e.g. Euthyphro, Apology, Crito, and Phaedo), though Socrates' wisdom and method (questioning) remain consistent.

Book2 English - French for Beginners Penguin

BRITISH TRASH CINEMA is the first overview of the wilder shores of British exploitation and cult paracinema from the 1950s onwards. From obscure horror, science fiction and sexploitation, to art-house camp, Hammer's prehistoric fantasies and the worst British films ever made, author I.Q. Hunter draws on rare archival material and new primary research to take us through the weird and wonderful world of British trash cinema. Beginning by outlining the definitions of trash films and their place in British film history, Hunter explores topics including: Hammer's overlooked fantasy films, the emergence of the sexploitation film in the 1950s and 60s, the sex industry in the 1970s, Ken Russell's high camp Gothic and erotic adaptations since the 1980s, gross-out comedies, revenge films, and contemporary straight-to-DVD horror and erotica.

Kubrick's 2001: A Space Odyssey. Book & DVD Set Bloomsbury Publishing

Pulitzer Prize-winning author and astronomer Carl Sagan imagines the greatest adventure of all—the discovery of an advanced civilization in the depths of space. In December of 1999, a multinational team journeys out to the stars, to the most awesome encounter in human history. Who—or what—is out there? In *Cosmos*, Carl Sagan explained the universe. In *Contact*, he predicts its future—and our own.

Collects twelve essays that look at how teams of technical service workers in academic libraries function, discussing performance evaluation, rewards, recognition, and work load.

Typeset in the Future 2001: A Space Odyssey

A comprehensive reference presents over five hundred full essays on authors and a variety of topics, including censorship, genre, patronage, and dictionaries.

British Future Fiction, 1700-1914, Volume 1 Taschen

Cinema has had a hugely influential role on global culture in the 20th century at multiple levels: social, political, and educational. The part of British cinema in this has been controversial - often derided as a whole, but also vigorously celebrated, especially in terms of specific films and film-makers. In this Very Short Introduction, Charles Barr considers films and filmmakers, and studios and sponsorship, against the wider view of changing artistic, socio-political, and industrial climates over the decades of the 20th Century. Considering British cinema in the wake of one of the most familiar of cinematic reference points - Alfred Hitchcock - Barr traces how British cinema has developed its own unique path, and has since been celebrated for its innovative approaches and distinctive artistic language. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Oxford Dictionary of English Cambridge University Press

The trouble from which great events were to come began when Everard Dominey, who had been fighting his way through the scrub for the last three quarters of an hour towards those thin, spiral wisps of smoke, urged his pony to a last despairing effort and came crashing through the great oleander shrub to pitch forward on his head in the little clearing. It developed the next morning, when he found himself for the first time for many months on the trundle bed, between linen sheets, with a cool, bamboo-twisted roof between him and the relentless sun. He raised himself a little in the bed. "Where the mischief am I?" he demanded. A black boy, seated cross-legged in the entrance of the banda, rose to his feet, mumbled something and

disappeared. In a few moments the tall, slim figure of a European, in spotless white riding clothes, stooped down and came over to Dominey's side.
