WATSON KARTER

The Bail Book John Wiley & Sons

What is the criminal law for? One influential answer is that the criminal law vindicates pre-political rights and condemns wrongdoing. On this account, the criminal law has an intrinsic subject matter-certain types of moral wrongdoing-and it provides a distinctive response to that wrongdoing, namely condemnatory punishment. In *Criminal Law in the Age of the Administrative State*, Vincent Chiao offers an alternative, public law account. What the criminal law is for, Chiao suggests, is sustaining social cooperation with public institutions. Consequently, we only have reason to support the use of the criminal law insofar as its use is consistent

with our reasons for valuing the social order established by those institutions. By starting with the political morality of public institutions rather than the interpersonal morality of private relationships, this account shows how the criminal law is continuous with the modern administrative and welfare state, and why it is answerable to the same political virtues. Chiao sketches a democratic egalitarian account of those virtues, one that is loosely consequentialist, egalitarian but not equalizing, and centered on a form of freedom-effective access to central capabilities-as its currency of evaluation. From this point of view, the role of the criminal law is to help public institutions create a society in which each person can lead a life as a peer among peers. Chiao shows how a democratic egalitarian approach to criminal justice provides a

fresh perspective on a range of contemporary problems, from mass incarceration to overcriminalization, due process and the collateral consequences of a criminal conviction.

Research Methods in Crime and Justice, 2nd Edition, is an innovative text/online hybrid for undergraduate Criminal Justice Research Methods courses. This material uniquely addresses the fundamental

teaching issue for this course: how to show students that success as criminal justice practitioners is linked to their acquisition of research skills. Brian Withrow, a widely published academic researcher and former Texas State Trooper, developed this approach for his own undergraduate Research Methods class. He persuasively demonstrates that research skills aren't just essential to university academic researchers but to successful criminal justice practitioners as well. More than 80 short, sharply focused examples throughout the text rely on research that is conducted by, on behalf of, or relevant to criminal justice practitioners to engage students' interest like no other text of its kind. Extensive web materials all written by the author provide an array of instructor support material, including a Researcher's Notebook that provides students (and their instructors) with a series of structured exercises leading to the development of a valid research project. Withrow systematically walks students through defining a question, conducting a literature review, and designing a research method that provides the data necessary to answer the research question—all online, with minimal instructor supervision. The second edition features expanded coverage of measurement, qualitative research methods, and evaluation research methods, as well as additional downloadable journal articles to ensure students begin to think critically about research and can read scholarly literature.

Should prostitution be legalized? Are stalking laws effective? Is medical treatment a useful way to deal with criminal offenders? Are restorative justice processes too lenient toward offenders? These are some of the most hotly debated questions in the field of criminology, often sparking discomfort and anger among those who wish to know more about these issues. Now, *Controversial Issues in Criminology* attempts to provide factual information and a much-needed forum for discussion, utilizing a unique debate format to discuss controversial issues in the field of criminology. **KEY TOPICS:** Topics addressed in this book were chosen with a conscious effort to include those that are the most controversial. The contributing authors, each solicited because of their expertise in this area, come from a variety of backgrounds, academic disciplines and perspectives. In addition to such hot topics as prostitution, stalking, and the rehabilitation of

criminals, the book also covers issues such as the "supersizing" of murder, government research on terrorism, stricter law enforcement for "techno-crimes," and the role of "community corrections." Law enforcement officers, corrections officers, educators, students of law enforcement, and anyone interested in issues of criminal justice and the correctional process.

This book presents a collection of essays on key topics and new perspectives on the EU's Area of Freedom, Security and Justice (AFSJ) and has a Foreword by the President of the Court of Justice of the European Union, Prof. Dr. Koen Lenaerts. Europe's area of freedom, security and justice is of increasing importance in contemporary EU law and legislation. It is worthy of special research attention because of its high-stakes content (particularly from an individual and a state perspective) and because its development to date has tangentially thrown up some of the most important and contentious constitutional questions in EU law. As the AFSJ becomes more and more intertwined with 'mainstream' EU law, this edited collection provides a timely analysis of the merger between the two. Showcasing a selection of work from key thinkers in this field, the book is organised around the major AFSJ themes of crime, security, border control, civil law cooperation and important 'meta' issues of governance and constitutional law. It also analyses the major constitutional and governance challenges such as variable geometry, institutional dynamics, and interface with rights around data protection/secretcy/spying. In the concluding section of the book the editors consider the extent to which the different facets of the AFSJ can be construed in a coherent and systematic manner within the EU legal system, as well as identifying potential future research agendas. The European Union as an Area of Freedom, Security and Justice will be of great interest to students and scholars of European law and politics.

The SAGE Guide to Writing in Criminal Justice Research Methods equips students with transferable writing skills that can be applied across the field of criminal justice—both academically and professionally. Authors Jennifer M. Allen and Steven Hougland interweave professional and applied writing, academic writing, and information literacy, with the result being a stronger, more confident writer, researcher, and student in criminal

justice. Focused on teaching students how to write in the academic setting while introducing them to a number of other writing tools specific to research methods, such as writing literature reviews, abstracts, proposals, and more. The perfect companion for any criminal justice research methods course, this brief text focuses on key topics that will benefit students in their classes and in the field.

Transnational Legal Ordering of Criminal Justice Routledge

In today's globalized society, an international exchange of ideas and views is indispensable within the field of social sciences, including criminology and criminal justice studies. The research group Governance of Security (GofS) fosters contemporary international discourses on issues of crime and crime control. In 2008, GofS started a research paper series, combining theoretical and empirical articles on issues reflecting the research activities of GofS. This research group is a collaboration between Ghent University and Ghent University College in Belgium. GofS concentrates its research around the study of administrative and judicial policy that have been developed with respect to new issues of crime and insecurity. The GofS series *Governance of Security Research Papers (GofS)* is published by Maklu Publishing (Belgium). Readings on Criminal Justice, Criminal Law and Policing Volume 2 of GofS's series *Governance of Security Research Papers* includes the following: Punishment across Borders: The Rationales behind International Execution of Sentences *Interpreting the Concept of 'Discretionary Power' within the Execution of Sentences: A Comparison between the Belgian and French Situation* *Esperanto for EU Crime Statistics: Towards Common European Offense Definitions in an EU-level Offense Classification System* *Developing a Framework for the Legal Rights of Victims and Witnesses* *What Can European Institutions and the International Criminal Court Learn from Each Other?* *Purpose Limitation in EU-US Data Exchange in Criminal Matters: The Remains of the Day* *Some Criminal Law Reflections on the Sexual Transmission of HIV* *Reading about Crime in Post-Intervention Societies: A Critical Assessment* *Policing and Leadership: The Case of the Belgian Chiefs of the Local Police* *Reflections on the*

The European Approach Cambridge University Press

In this Advanced Introduction, Christopher Slobogin covers every significant aspect of U.S. criminal procedure. Focusing on Supreme Court cases and the most important statutory rules that provide the framework for the criminal justice system, he illuminates the nuances of American criminal procedure doctrine and offers factual examples of how it is applied. Chapters cover police practices such as search and seizure, interrogation, and identification procedures, as well as the pretrial, trial and post-conviction process.
Papers on Crime Policy Routledge

This report describes some of the National Institute of Justice's (NIJ) successful research projects, summarizes their findings, and discusses their influence on criminal justice policy and practice. The study considers whether the research has (1) addressed issues and problems that are central and critical to criminal justice policy and practice, (2) affected law enforcement and other functions of the system, and (3) ultimately helped improve the system's effectiveness in dealing with crime and criminals. The author asked NIJ staff to nominate research efforts that, in their opinion, had influenced policy and practice in the last two decades and then interviewed high-level managers and policymakers about their knowledge and use of the research. Finally, she reviewed the relevant criminal justice literature to see whether the changes in the field reflected or paralleled directions suggested by the research. The study

indicates that research has indeed helped shape the way criminal justice policymakers and practitioners think about issues, how they identify problems that need attention, which alternatives they consider for dealing with their problems, and their sense of what can be accomplished.

Workshop Summary The European Union as an Area of Freedom, Security and Justice

Examines the causes for mass incarceration of Americans and calls for the reform of the bail system. Traces the history of bail, how it has come to be an oppressive tool of the courts, and makes recommendations for reforming the bail system and alleviating the mass incarceration problem.

Designed to help law students write and publish articles, *Academic Legal Writing* provides detailed instructions for every aspect of the law school writing, research, and publication process. Topics covered include law review articles and student notes, seminar term papers, how to shift from research to writing, cite-checking others work, publishing, and publicizing written works. With supporting documents available on <http://volokh.com/writing>, the book helps law students and everyone else involved in academic legal writing: professors save time and effort communicating basic points to students; law schools satisfy the American Bar Association's second- and third-year writing requirements; and law reviews receive better notes from their staff.

Two centuries ago, American criminal justice was run primarily by laymen. Jury trials passed moral judgment on crimes, vindicated victims and innocent defendants, and denounced the guilty. But since then, lawyers have gradually taken over the process, silencing victims and

defendants and, in many cases, substituting plea bargaining for the voice of the jury. The public sees little of how this assembly-line justice works, and victims and defendants have largely lost their day in court. As a result, victims rarely hear defendants express remorse and apologize, and defendants rarely receive forgiveness. This lawyerized machinery has purchased efficient, speedy processing of many cases at the price of sacrificing softer values, such as reforming defendants and healing wounded victims and relationships. In other words, the U.S. legal system has bought quantity at the price of quality, without recognizing either the trade-off or the great gulf separating lawyers' and laymen's incentives, values, and powers. In *The Machinery of Criminal Justice*, author Stephanos Bibas surveys the developments over the last two centuries, considers what we have lost in our quest for efficient punishment, and suggests ways to include victims, defendants, and the public once again. Ideas range from requiring convicts to work or serve in the military, to moving power from prosecutors to restorative sentencing juries. Bibas argues that doing so might cost more, but it would better serve criminal procedure's interests in denouncing crime, vindicating victims, reforming wrongdoers, and healing the relationships torn by crime.

This volume presents a leading contribution to the substantive arena relating to homicide in the criminal law. In broad terms, the ambit of homicide standardisations in extant law is contestable and opaque. This book provides a logical template to focus the debate. The overall concept addresses three specific elements within this arena, embracing an overarching synergy

between them. This edifice engages in an examination of UK provisions, and in contrasting these provisions against alternative domestic jurisdictions as well as comparative contributions addressing a particularised research grid for content. The comparative chapters provide a wider background of how other legal systems treat a variety of specialised issues relating to homicide in the context of the criminal law. The debate in relation to homicide continues apace for academics, practitioners and within the criminal justice system. Having expert descriptions of the wider issues surrounding the particular discussion and of other legal systems' approaches serves to stimulate and inform that debate. This collection will be a major source of reference for future discussion.

Policing the Open Road examines how the rise of the car, that symbol of American personal freedom, inadvertently led to ever more intrusive policing--with disastrous consequences for racial equality in our criminal justice system. When Americans think of freedom, they often picture the open road. Yet nowhere are we more likely to encounter the long arm of the law than in our cars. Sarah Seo reveals how the rise of the automobile transformed American freedom in radical ways, leading us to accept--and expect--pervasive police power. As *Policing the Open Road* makes clear, this expectation has had far-reaching political and legal consequences.--

While the Nordic countries are listed at the top in most international rankings of gender equality and citizens' feelings of security, studies on the prevalence of sexual victimisation present a different picture, suggesting that the very countries that have invested much in establishing gender equality actually see a high prevalence of sexual violence. This book sheds light on the phenomenon and construction of rape and other forms of sexual violence within the Nordic region, exploring the ways in which rape and sexual violence are dealt with through criminal law and considering governmental policies aimed at combatting it, with a special focus on legal regulations and developments.

Thematically organised, it offers new research on perpetrators, victimhood, criminal justice and prevention. Multi-disciplinary in approach, it brings together the latest work from a range of scholars to offer insights into the situation in the five Nordic countries, asking how and why rape and other forms of sexual violence occur, whilst also addressing the timely issues of online sexual cultures, BDSM and the grey areas of sexual offences. As such, it will appeal to scholars of sociology, criminology and law with interests in gender and sexual violence.
