**Realist Constructivism** Cambridge University Press  
 After half a century of occupation and tremendous costs of the conflict, Israel is still struggling with the idea of a Palestinian state in what is often perceived as the Biblical Eretz Israel. Mapping Zionism, enemy images, peace and war policies, as well as democracy within the Jewish State, the present study offers original insights into Israel's role in this conflict. By analyzing Israeli history, politics and security-oriented political culture as it has been evolving from 1948 on, this book reveals the ideological and political structures of a Zionist-oriented state and society. In doing so, it uncovers the abyss between the Zionist vision of

Eretz Israel on the one hand and the aspiration to achieve normalization, peace and security on the other. In view of this conflict-laden bi-national reality, the Palestinian question is identified as the Achilles' heel of Jewish statehood in the Land of Israel. Thus, Zionist Israel and the Question of Palestine provides a fresh, innovative, critical and yet accessible perspective on one of the most controversial issues in contemporary history.

 Classics of International Relations

introduces, contextualises and assesses 24 of the most important works on international relations of the last 100 years. Providing an indispensable guide for all students of IR theory, from advanced undergraduates to academic specialists, it asks why are these works considered classics? Is their status deserved? Will it endure? It takes as its starting point Norman Angell's best-selling *The Great Illusion* (1909) and concludes with Daniel Deudney's award winning *Bounding Power* (2006). The volume does not ignore established classics such as Morgenthau's *Politics Among Nations* and Waltz's *Theory of International Politics*, but seeks to expand the 'IR canon' beyond its core realist and liberal texts. It thus considers emerging classics such as Linklater's critical sociology of moral boundaries, *Men and Citizens in the Theory of International Relations*, and Enloe's pioneering gender

analysis, Bananas, Beaches and Bases. It also innovatively considers certain 'alternative format' classics such as Kubrick's satire on the nuclear arms race, Dr Strangelove, and Errol Morris's powerful documentary on war and US foreign policy, The Fog of War. With an international cast of contributors, many of them leading authorities on their subject, Classics of International Relations will become a standard reference for all those wishing to make sense of a rapidly developing and diversifying field. Classics of International Relations is designed to become a standard reference text for advanced undergraduates, post-graduates and lecturers in the field of IR.

*Foreign Policy: From Conception to Diplomatic Practice* represents an original and important contribution to the study of foreign policy, uniquely framed by the experiences of small and new countries. Ambassador Ernest Petri artfully brings together academic expertise and years of diplomatic experience to provide a thorough treatment of national and international environments, the foreign policy decision making process and an original analysis of the means of foreign policy and diplomacy. The role of the United Nations, the EU, strategic actors and the role of foreign policy as a diplomatic instrument are examined. Finally a reflection of the foreign policy concerns of small and new countries, with special attention to Slovenia and legal aspects are offered.

"Often considered a secularizing force in the rise of the nation state, natural law was called upon in the defence of the early-modern confessional states. The fourteen chapters of this volume show how religious and legal thought around natural and biblical law interacted and combined in the new Christian states of Lutheranism, Calvinism and Catholicism. The volume addresses also questions of political legitimacy, civic and ecclesiastical authority, societal stability, conceptions of common good, liberalism's value pluralism (and its pretence), toleration and the lingering humanist project of determining "who are we", issues that were then important as they are now. Contributors are: Dominique Bauer, Thomas Behme, Hans Blom, Jiří Chotaš, Alberto Clerici, Stefanie Ertz, Arthur Eyffinger, Heikki Haara, Mads Langballe Jensen, Adriana Luna-Fabritius, Denis Ramelet, József Simon, and Markus M. Totzeck"--  
History of European Political  
Hans Morgenthau's Politics Among Nations

is a classic of political science, built on the firm foundation of Morgenthau's watertight reasoning skills. The central aim of reasoning is to construct a logical and persuasive argument that carefully organizes and supports its conclusions - often around a central concept or scheme of argumentation. Morgenthau's subject was international relations - the way in which the world's nations interact, and come into conflict or peace - a topic which was of vital importance during the unstable wake of the Second World War. To the complex problem of understanding the ways in which the post-war nations were jostling for power, Morgenthau brought a comprehensive schema: the concept of "realism" - or, in other words, the idea that every nation will act so as to maximise its own interests. From this basis, Morgenthau builds a systematic argument for a pragmatic approach to international relations in which nations seeking consensus should aim for a balance of power, grounding relations between states in understandings of how the interests of individual nations can be maximized. Though seismic shifts in international politics after the Cold War undeniably altered the landscape of international relations, Morgenthau's dispassionate reasoning about the nature of our world remains influential to this day.

This book explores how America's national leadership, mesmerized by the mythology of monolithic communism, failed the American people. It demonstrates with detailed archival sources how three administrations refused to consider the arguments of the central critic of the war who proved that the war should never have been fought because Vietnam was never a vital American security interest. That critic, Hans J. Morgenthau, is the centerpiece of this study who participated in the teach-in movement, wrote articles, engaged in public debate in the attempt to prevent the impending tragedy in Vietnam.

**The Tragedy of Great Power Politics (Updated Edition)** Washington, Public Affairs P

"A superb book...Mearsheimer has made a significant contribution to our understanding of the behavior of great powers."—Barry R. Posen, *The National Interest* The updated edition of this classic treatise on the behavior of great powers takes a penetrating look at the question likely to dominate international relations in

the twenty-first century: Can China rise peacefully? In clear, eloquent prose, John Mearsheimer explains why the answer is no: a rising China will seek to dominate Asia, while the United States, determined to remain the world's sole regional hegemon, will go to great lengths to prevent that from happening. The tragedy of great power politics is inescapable.

One of the theological classics of the twentieth century, Niebuhr's *Moral Man and Immoral Society* argues that using moral persuasion and shaming to affect the behavior of such collectives as corporations and nation states is fruitless, as these groups will inevitably seek to promote only their self-interest. He calls for a realistic assessment of group behavior and enumerates how individual morality can mitigate social immorality. This edition includes a foreword by Cornel West that explores the continued interest in Niebuhr's thought and its contemporary relevance.

*The Struggle for Power and Peace Between December 1953 and June 1954*, the elite think-tank the Council on Foreign Relations (CFR) joined prominent figures in International Relations, including Pennsylvania's Robert Strausz-Hupé, Yale's Arnold Wolfers, the Rockefeller Foundation's William Thompson, government adviser Dorothy Fosdick, and nuclear strategist William Kaufmann. They spent seven meetings assessing approaches to world politics—from the "realist" theory of Hans Morgenthau to theories of imperialism of Karl Marx and V.I. Lenin—to discern basic elements of a theory of international relations. The study group's materials are an indispensable window to the development of IR theory, illuminating the seeds of the theory-practice nexus in Cold War U.S. foreign policy. Historians of International Relations recently revised the standard narrative of the field's origins, showing that IR witnessed a sharp turn to theoretical consideration of international politics beginning around 1950, and remained preoccupied with theory. Taking place in 1953-54, the CFR study group represents a vital snapshot of this shift. This book situates the CFR study group in its historical and historiographical contexts, and offers a biographical analysis of the participants. It includes seven preparatory papers on diverse theoretical approaches, penned by former Berkeley political scientist George A. Lipsky, followed by the digest of discussions from the study group

meetings. *American Power and International Theory* at the Council on Foreign Relations, 1953–54 offers new insights into the early development of IR as well as the thinking of prominent elites in the early years of the Cold War.

Hans Morgenthau's classic text established realism as the fundamental way of thinking about international relations. Although it has had its critics, the fact that it continues to be the most long lived text for courses in international relations attests to its enduring value. Someone has said the study of international relations has for half a century been nothing so much as a dialogue between Morgenthau, those who embrace his approach, and those who turn elsewhere for enlightenment. After 50 years, the dialogue between Morgenthau and scholars from around the world continues more or less as in the past something with more intensity even in an "age of terror." The new edition preserves intact Morgenthau's original work while adding a 40 page introduction by the editors who explore its relevance for a new era. What follows the introduction are the perspectives of a dozen statesmen, scholars, and observers each offering insights on Morgenthau's concepts and ideas as they relate to current crises on every continent. They bring up to date the dialogue that began in 1948.

Realism remains the most important and controversial vision of international politics. But what does it mean to be a realist? This collection addresses this key question by returning to the thinking of

perhaps the most influential realist of modern times: Hans J. Morgenthau. In analyses of issues ranging from political philosophy, to international law, to the impact of nuclear weapons and the challenges of American foreign policy, the authors demonstrate that Morgenthau's thinking exemplifies a rich realist tradition that is often lacking in contemporary analyses of international relations and foreign policy. At a time when realism is once again at the centre of both scholarly and political debates, this book shows that the legacy of classical realism can enrich our understanding of world politics and contribute to its future direction.

**Realism Reconsidered** Lexington Books  
The balance of power has been a central concept in the theory and practice of international relations for the past five hundred years. It has also played a key role in some of the most important attempts to develop a theory of international politics in the contemporary study of international relations. In this 2007 book, Richard Little establishes a framework that treats the balance of power as a metaphor, a myth and a model. He then uses this framework to reassess four major texts that use the balance of power to promote a theoretical understanding of international relations: Hans J. Morgenthau's *Politics Among Nations* (1948), Hedley Bull's *The Anarchical Society* (1977), Kenneth N. Waltz's *Theory of International Politics* (1979) and John J. Mearsheimer's *The Tragedy of Great Power Politics* (2001). These reassessments allow the author to develop a more comprehensive model of the balance of power.

It was also about ideas, in the broadest sense—economic and political, artistic and personal. In *The Free World*, the acclaimed Pulitzer

Prize-winning scholar and critic Louis Menand tells the story of American culture in the pivotal years from the end of World War II to Vietnam and shows how changing economic, technological, and social forces put their mark on creations of the mind. How did elitism and an anti-totalitarian skepticism of passion and ideology give way to a new sensibility defined by freewheeling experimentation and loving the Beatles? How was the ideal of "freedom" applied to causes that ranged from anti-communism and civil rights to radical acts of self-creation via art and even crime? With the wit and insight familiar to readers of *The Metaphysical Club* and his *New Yorker* essays, Menand takes us inside Hannah Arendt's Manhattan, the Paris of Jean-Paul Sartre and Simone de Beauvoir, Merce Cunningham and John Cage's residencies at North Carolina's Black Mountain College, and the Memphis studio where Sam Phillips and Elvis Presley created a new music for the American teenager. He examines the post war vogue for French existentialism, structuralism and post-structuralism, the rise of abstract expressionism and pop art, Allen Ginsberg's friendship with Lionel Trilling, James Baldwin's transformation into a Civil Right spokesman, Susan Sontag's challenges to the New York Intellectuals, the defeat of obscenity laws, and the rise of the New Hollywood. Stressing the rich flow of ideas across the Atlantic, he also shows how Europeans played a vital role in promoting and influencing American art and entertainment. By the end of the Vietnam era, the American government had lost the moral prestige it enjoyed at the end of the Second World War, but America's once-despised culture had become respected and adored. With unprecedented verve and range, this book explains how that happened.

A growing interest in the oeuvre of Hans J. Morgenthau and in re-readings of 'classical realism' increases the significance of his European, pre-emigration writings in order

to understand the work of one of the founding figures of IR. This book is the first English translation of Morgenthau's French monograph *La notion du politique* from 1933 (translated by Maeva Vidal).
