### DUDLEY STEIN

*The Girl and the Moon Man* Houghton Mifflin Harcourt

Patrick McDonnell-beloved, bestselling author-artist and creator of the Mutts syndicated comic strip--shares the inspiring story of young Jane Goodall, the legendary and inspiring conservationist featured in the hit documentary film Jane. In his characteristic heartwarming style, Patrick McDonnell tells the story of the young Jane Goodall and her special childhood toy chimpanzee named Jubilee. As the young Jane observes the natural world around her with wonder, she dreams of "a life living with and helping all animals," until one day she finds that her dream has come true. With anecdotes taken directly from Jane Goodall's autobiography, McDonnell makes this very true story accessible for the very young--and young at heart. One of the world's most inspiring women, Dr. Jane Goodall is a renowned humanitarian, conservationist, animal activist, environmentalist, and United Nations Messenger of Peace. In 1977 she founded the Jane Goodall Institute (JGI), a global nonprofit organization that empowers people to make a difference for all living things.

*Little People, BIG DREAMS: Earth Heroes* National Geographic Children's Books

Every day, Angelina dreams of her home in Jamaica and imagines she is there, until her mother finds a wonderful way to convince her that New York is now their home.

**Follow the Drinking Gourd** Simon and Schuster

"This biography for children will trace Goodall's life, but each chapter will also focus on two or more the chimpanzees that she observed, with information in sidebars about these particular animals. Along with biographical details, the book will explore the ethical issues that surround Goodall's work and show what has changed in our understanding of Great Apes. What do we know today about these animals in terms of language, speech, tool use, and DNA? How has sophisticated technology - GPS systems, Satellite imagery, portable digital microphones - been used to gain new information about animal populations."--

*Kali's Song* The Watcher

The curiosity, drive, and perseverance of the nineteenth-century woman scientist who pioneered the use of aquariums to study ocean life are celebrated in this gorgeous, empowering picture book. How did a nineteenth-century dressmaker revolutionize science? Jeanne Power was creative: she wanted to learn about the creatures that swim beneath the ocean waves, so she built glass tanks and changed the way we study underwater life forever. Jeanne Power was groundbreaking: she solved mysteries of sea animals and published her findings at a time when few of women's contributions to science were acknowledged. Jeanne Power was persistent: when records of her research were lost, she set to work repeating her studies. And when men tried to take credit for her achievements, she stood firm and insisted on the recognition due to her. Jeanne Power was inspiring, and the legacy of this pioneering marine scientist lives on in every aquarium.

*My Name Is Georgia* Schwartz & Wade

A retelling of a traditional Siberian tale in which a lonely moon unsuccessfully tries to carry a young girl off into the sky and then must offer many timeless gifts to win her forgiveness.

This beginner biography takes a look into the life and career of Jane Goodall and her groundbreaking discoveries of apes. Complete with full-bleed relevant and historical photographs, timeline, glossary, and index. Aligned to Common Core Standards and correlated to state standards. Abdo Kids is a division of ABDO.

**Nanuk the Ice Bear** Anne Schwartz Books

A life in the wild! Jane Goodall, born in London, England, always loved animals and wanted to study them in their natural habitats. So at age twenty-six, off she went to Africa! Goodall's up-close observations of chimpanzees changed what we know about them and paved the way for many female scientists who came after her. Now her story comes to life in this biography with black-and-white illustrations throughout.

[Dinosaur Lady](#) Dragonfly Books

This is the story of a woman who dared to dig, explore, and discover. This is the story of Dinosaur Lady. Mary Anning loved scouring the beach near her home in England for shells and fossils. She fearlessly climbed over crumbling cliffs and rocky peaks, searching for new specimens. One day, something caught Mary's eye. Bones. Dinosaur Bones. Mary's discoveries rocked the world of science and helped create a brand-new field of study: paleontology. But many people believed women couldn't be scientists, so Mary wasn't given the credit she deserved. Nevertheless, Mary kept looking and learning more, making discoveries that reshaped scientific beliefs about the natural world. Dinosaur Lady is a beautiful and brilliant picture book that will enlighten children about the discovery of the dinosaurs and the importance of female scientists. It also includes a timeline of Mary Anning's life and lots of fantastic fossil facts!

A biography of the pioneering scientist and environmentalist, Rachel Carson, author of *Silent Spring*. "Once you are aware of the wonder and beauty of earth, you will want to learn about it," wrote Rachel Carson. Determined and curious even as a child, Rachel Carson's fascination with the natural world led her to study biology, and pursue a career in science at a time when very few women worked in the field. This lyrical, illustrated biography follows Carson's journey—from a girl exploring the woods, to a woman working to help support her family during the Great Depression, to a journalist and pioneering researcher, investigating and exposing the harmful effects of pesticide overuse. Best known for writing *Silent Spring*, Rachel Carson was a major figure in the early environmental movement, and her work brought a greater understanding of the impact humans have on our planet. *Rachel Carson and Her Book That Changed the World* offers a glimpse at the early life that shaped her interest in nature, and the way one person's determination can inspire others to fight for real change. An author's note delves into how *Silent Spring* helped shape the modern environmental movement and inspired a generation of readers to get involved in conservation. Detailed source notes and a list of recommended reading are included. A National Science Teachers Association Outstanding Science Trade Book A Bank Street Best Children's Book of the Year

**I Am Jane Goodall** Astra Publishing House

The author of *Mesmerized* delivers another fascinating glimpse into history, this time the story of two brave suffragists on a trek across America to spread the word: Votes for Women! In April 1916, Nell Richardson and Alice Burke set out from New York City in a little yellow car, embarking on a bumpy, muddy, unmapped journey ten thousand miles long. They took with them a teeny typewriter, a tiny sewing machine, a wee black kitten, and a message for Americans all across the country: Votes for Women! The women's suffrage movement was in full swing, and Nell and Alice would not let anything keep them from spreading the word about equal voting rights for women. Braving blizzards, deserts, and naysayers—not to mention a whole lot of tires stuck in the mud—the two courageous friends made their way through the cities and towns of America to further their cause. One hundred years after Nell and Alice set off on their trip, Mara Rockliff revives their spirit in a lively and whimsical picture book, with exuberant illustrations by Hadley Hooper bringing their inspiring historical trek to life.

Children young and old will delight in the artistic splendor of this illustrated nonfiction tale about artist Joseph Cornell, from celebrated picture book biographer Jeanette Winter. Joseph Cornell loved to draw and paint and collect things. With these drawings and paintings and collected treasures, he made marvelous shadowboxes—wonderlands covered in glass. And who did he most like to share them with? Children, of course. For they noticed all the details and took in all the magic Mr. Cornell had created. In this inspiring nonfiction picture book, Jeanette Winter has painted a moving portrait of

Matter: Physical Science for Kids from the Picture Book Science series gets kids excited about science! What's the matter? Everything is matter! Everything you can touch and hold is made up of matter—including you, your dog, and this book! Matter is stuff that you can weigh and that takes up space, which means pretty much everything in the world is made of matter. In Matter: Physical Science for Kids, kids ages 5 to 8 explore the definition of matter and the different states of matter, plus the stuff in our world that isn't matter, such as sound and light! In this nonfiction picture book, children are introduced to physical science through detailed illustrations paired with a compelling narrative that uses fun language to convey familiar examples of real-world science connections. By recognizing the basic physics concept of matter and identifying the different ways matter appears in real life, kids develop a fundamental understanding of physical science and are impressed with the idea that science is a constant part of our lives and not limited to classrooms and laboratories. Simple vocabulary, detailed illustrations, easy science experiments, and a glossary all support exciting learning for kids ages 5 to 8. Perfect for beginner readers or as a read aloud nonfiction picture book! Part of a set of four books in a series called Picture Book Science that tackles different kinds of physical science (waves, forces, energy, and matter), Matter offers beautiful pictures and simple observations and explanations. Quick STEM activities such as weighing two balloons to test if air is matter help readers cross the bridge from conceptual to experiential learning and provide a foundation of knowledge that will prove invaluable as kids progress in their science education. Perfect for children who love to ask, "Why?" about the world around them, Matter satisfies curiosity while encouraging continual student-led learning.

Discover the life and work of Jane Goodall. This book explores her amazing research on chimpanzees and the advances she has made in human-animal relationships. Readers will be provided with important vocabulary related to animals, scientific research, and African culture.

**The Watcher** Penguin

One of New York Times' Twelve Books for Feminist Boys and Girls! This is the story of a woman who dared to dive, defy, discover, and inspire. This is the story of Shark Lady. One of the best science picture books for children, Shark Lady is a must for both teachers and parents alike! An Amazon Best Book of the Month Named a Best Children's Book of 2017 by Parents magazine Eugenie Clark fell in love with sharks from the first moment she saw them at the aquarium. She couldn't imagine anything more exciting than studying these graceful creatures. But Eugenie quickly discovered that many people believed sharks to be ugly and scary—and they didn't think women should be scientists. Determined to prove them wrong, Eugenie devoted her life to learning about sharks. After earning several college degrees and making countless discoveries, Eugenie wrote herself into the history of science, earning the nickname "Shark Lady." Through her accomplishments, she taught the world that sharks were to be admired rather than feared and that women can do anything they set their minds to. An inspiring story by critically acclaimed zoologist Jess Keating about finding the strength to discover truths that others aren't daring enough to see. Includes a timeline of Eugenie's life and many fin-tastic shark facts! The perfect choice for parents looking for: Books about sharks Inspiring nonfiction narrative books Role model books for girls and boys Kids STEM books
