 Suppose you could communicate with a visitor who was not from this place, time-space or even this dimension? What would you want to ask them? The answers probably lie in what our own response would be if we were them. This book is based on a collection of interviews I have had with a few individuals who may have actually had such an experience. The idea is that if enough of us are ready to ask the questions and gain the answers, then our collective knowledge and understanding of the "multiverse" about us can only continue to be enhanced. Sometimes the responses that you will read here are

similar; often they are diametrically opposed to each other. An open but highly skeptical mind is extremely necessary if you are going to sift through the data that is presented in this book. The intent is that it should peak your curiosity to learn more about "visitors." In this way, we may be better informed and prepared, and thus in some sort of coherent shape to deal with their arrival. If you read this book, you must be well prepared to choose for yourself what you will or will not believe. *Outlook* Pabitra Banerjee
 'The Evangelist' takes you through the epic life story of André Albertus Coetzee from the arid landscape of the Northern Cape, South Africa. An array of pictorial evidence grabs the reader cementing the authenticity of the story. This unique and authentic story is written in a simplistic style and provides a clear chronological account of the journey through the life of

one man who experienced a miraculous healing from God. André Coetzee blindly pursues the call of God. He becomes a preacher in the mould of John the Baptist who preached the Gospel of Jesus Christ unashamedly. The rhythmic unfolding of the life-long drama remains true to the factual content. A wealth of wisdom can be extracted from his character delineated indirectly through the thoughts, actions, and expressions so candidly documented. The prolific life of 'The Evangelist' has a happy ending and promises the reader a change of heart.

An unwitting tumble through a magical gateway lands her in a new world called Alitheia, and Darcy must convince five other teenagers at the camp to not only befriend her but follow her on a journey beyond their world and their wildest dreams to save Alitheia from an ancient, shadowy foe.

An astronomer "who writes like a poet" (Wall Street Journal) gives a sweeping, "beautifully written" (Nature) inquiry into how the night sky has shaped human history. For as long as humans have lived, we have lived beneath the stars. But under the glow of today's artificial lighting, we have lost the intimacy our ancestors once shared with the cosmos. In *Starborn*, cosmologist Roberto Trotta reveals how stargazing has shaped the course of human civilization. The stars have served as our timekeepers, our navigators, our muses—they were once even our gods. How radically different would we be, Trotta also asks, if our ancestors had looked up to the night sky and seen... nothing? He pairs the history of our starstruck species with a dramatic alternate version, a world without stars where our understanding of science, art, and ourselves would have been radically altered. Revealing the

hidden connections between astronomy and civilization, *Starborn* summons us to the marvelous sight that awaits us on a dark, clear night—to lose ourselves in the immeasurable vastness above.

A Tapestry of Time Samantha Jane
IT ALL HAPPENED SO FAST One minute the two space Hab astronauts were scooping the atmosphere, the next they'd been shot down over the North Dakota Glacier and were the object of a massive manhunt by the United States government. That government, dedicated to saving the environment from the evils of technology, had been voted into power because everybody knew that the Green House Effect had to be controlled, whatever the cost. But who would have thought that the cost of ending pollution would include not only total government control of day-to-day life, but the onset of a new Ice Age. Stranded in the anti-technological heartland of America, paralyzed by Earth's gravity, the "Angels" had no way back to the Space Habs, the last bastions of high technology and intellectual freedom on or over the Earth. But help was on its way, help from the most unlikely sources Join # 1 national bestsellers Larry Niven and Jerry Pournelle and Michael Flynn in a world where civilization is on the ropes, and the environmentalists have created their own worst nightmare: A world of Fallen Angels. At the publisher's request, this title is sold without DRM (Digital Rights Management).

First Steps in the Origin of Life in the Universe Adventures Unlimited Press
Rosemary O'Neal lived for eight years with William, in a rambling country house in Maine. Then William committed suicide on a trip to London, leaving her with questions, anger, and no way to say goodbye. When her zany family descends on the house, bringing a tidal wave of casseroles and their own petty problems, Rosemary retreats with her cat from the

chaos of the world around them. (Her cat understands human nature better than *Homo sapiens* anyway.) It takes an unsettling turn of events to shock her back into the pitfalls of living and realize that life is a fleeting experience to be carefully savored. Award-winning author Cathie Pelletier has been called "a bitingly funny, highly original novelist". In *The Bubble Reputation*, she redefines "dysfunctional" in this bittersweet, life-affirming story about the idiosyncrasies of family, the anguish of grief, and finding peace after chaos.

The Lives of Stars Light Technology Publishing

Every night, a pageant of Greek mythology circles overhead. Perseus flies to the rescue of Andromeda, Orion faces the charge of the snorting Bull, and the ship of the Argonauts sails in search of the Golden Fleece. Constellations are the invention of human imagination, not of nature. They are an expression of the human desire to impress its own order upon the apparent chaos of the night sky. Modern science tells us that these twinkling points of light are glowing balls of gas, but the ancient Greeks, to whom we owe many of our constellations, knew nothing of this. Ian Ridpath, award-winning astronomy writer and popularizer, has been intrigued by the myths of the stars for many years. *Star Tales* is the first modern guide to combine all the fascinating myths in one book,

illustrated with the beautiful and evocative engravings from two of the leading star atlases: Johann Bode's Uranographia of 1801 and John Flamsteed's Atlas Coelestis of 1729. This classic book, now in a revised and expanded edition, presents additional information on the constellations with new and enchanting illustrations. For anyone interested in the stars and classical mythology, for anyone who is an armchair astronomer, this is the perfect gift.

From the vaults of the SF Gateway, the most comprehensive digital library of classic SFF titles ever assembled, comes an ideal introduction to one of the unique voices of British science fiction, John Middleton Murry, Jr, who wrote his best work under the pen name Richard Cowper. The son of the famous critic John Middleton Murry, Cowper announced himself to the science fiction world in 1967 with *BREAKTHROUGH*, which found favour for a subtlety and richness of characterisation not seen in most contemporary SF. The idea of a transformed future England became his signature leitmotif and it is this theme that informs the Corlay tales contained in this omnibus. This is the complete Corlay sequence, featuring introductory novella 'PIPER AT THE GATES OF DAWN' and novels *THE ROAD TO CORLAY*, *A DREAM OF KINSHIP* and *A TAPESTRY OF TIME*. *THE ROAD TO CORLAY*: On the Eve of the Fourth Millennium a slowly-building civilization, struggling out of the rubble of the Drowning, was crushed beneath the sceptre of a powerful and repressive Church. But on the Eve of the Fourth Millennium the sound of a magical pipe was heard, and the air was filled with songs of freedom and enlightenment. And on the Eve of the Fourth Millennium the Boy appeared, bringing the gift of sacrilege, a harbinger of the future, heralding the arrival of the White Bird of Dawning. It is the coming of a New Age. A glorious future bearing the presents of the past! *A DREAM OF KINSHIP*: They came to destroy! The treacherous Falcons, uniformed in the black leather tunics of the fanatic Secular Arm, descended on Corlay to burn and kill. Commanded by Lord Constant, ruler of the Seven Kingdoms, they were determined to crush the religious heresy of Kinship. But a new dream rose from the ashes... When four Kinsmen escaped the carnage of their beloved land, each helped to fulfill the miracle that had been foretold: the coming of the Child of the Bride of Time. *A TAPESTRY OF TIME*: Twenty years have passed since the martyrdom of the Boy-

piper at York, twenty years in which his legacy, the movement of Kinship, has challenged the tyranny of the Church Militant in Britain's seven island kingdoms. Now his namesake, Tom, bearing the Boy's own pipes and perhaps himself imbued with the spirit of the White Bird, is wandering Europe in company with the girl, Witchet. But disaster overtakes them and Tom, in a flurry of vengeance, breaks his vow of Kinship. A terrible path lies before him, one that transcends his own world. As he travels it, Tom must come to understand the true nature of the wild White Bird, of The Bride of Time and her Child, and of the Song the Star Born sang. *The Westminster Review* BoD - Books on Demand

The concert draws to a close for the rulers of rock, Fiorinda, Ax and Sage, as they face the darkness spreading across the world despite their best efforts. They've fought against collapsed economies, environmental meltdowns, energy crises, dark magic cults, and the complexities and struggles of their relationship. They've explored alternate states of being, embraced parenthood, raged against the machine, and then taken over running it. But has this been enough? Or was Earth and humanity always doomed to fall apart? Will this modern-day Arthur, Guinevere and Lancelot see a brighter tomorrow? This is book five in Gwyneth Jones' critically-acclaimed *BOLD AS LOVE* series.

True Disbelievers Sourcebooks, Inc.

Anyone who doubts that astronomy is enjoying a golden age has only to browse the pages of *Organizations and Strategies in Astronomy*, Vol. 5. Our golden age is defined not only by the enormity of new discoveries of dark energy, dark matter, extra-solar planets, and the evolution of Mars, but also by the breadth, diversity, and creativity within our community. This volume records our history, in a period of such rapid change and growth that individual astronomers are hard-pressed to keep abreast of their own fields and neighborhoods, much less of developments world-wide. Since the 1950's, changes in the landscape of astronomy are manifold. We have witnessed two epochs of big telescope construction, the 4-meter class telescopes of the '60s and '70s and the 8-to 10-meter class telescopes of the '90s, continuing through today. We accomplished the transition from photographic to digital data, and we continue to improve the size and sensitivity of astronomical detectors. We have witnessed the flowering of radio astronomy and the opening of the full electromagnetic spectrum through space astronomy. We have seen the growth of national and international astronomy facilities, and a dramatic broadening of the

accessibility of data, both through observing facilities available through open competition based on scientific merit and through deep, rich archives of data.

- Examines myths of the chintamani from East and West, including from China, India, and South America; in legends of the Holy Grail and Atlantis; and in Nicholas Roerich's real-life quest for Shambhala
 - Explains the chintamani matrix--the multidimensional field of light, energy, and consciousness that forms networks of gems on the etheric and physical levels
 - Provides simple and advanced practices with crystal grids and meditation to help you access the chintamani matrix and realize your innermost heart's desires
- Space, time, intention, matter, and

consciousness all entangle in crystals. Nowhere is this more evident than in the ancient gem archetype of the chintamani, the wish-fulfilling jewel known in legends around the world as the stone that grants your heart's desires. As authors Johndennis Govert and Hapi Hara reveal, the chintamani's "tachyolithic" technology of wish-granting and spiritual enlightenment creates a vehicle for positive transformation. They show how the chintamani energy matrix can be accessed using tangible crystals and gemstones, meditation, yoga, and the powerful science of intention. Exploring the many chintamani myths and legends from East and West, the authors explain how there are three types of chintamani: the mythical gemstone; the power crystals of history, such as the Koh-i-Noor diamond; and the multidimensional field of

light, energy, and consciousness that forms a network of all gems in what is known as "the jewel net of Indra" in Hinduism and Buddhism. Activating this crystal energy matrix provides a way to manifest your intentions and help you create the subtle diamond body. The authors detail specific gems and crystal spiritual technology that can affect material reality and trigger profound spiritual growth. They provide a number of simple practices with crystal grids and meditation to help you access the chintamani matrix and become aware of the interconnected jewel net of consciousness. They examine the science of intention, which provides a basis for connecting to gemstones and crystals, and share advanced meditations to realize and activate your innermost heart's desires.
