### Information Security Policies Made Easy Version 10 Simon and Schuster

In *Modern Nature*, Lynn K. Nyhart traces the emergence of a "biological perspective" in late nineteenth-century Germany that emphasized the dynamic relationships among organisms, and between organisms and their environment. Examining this approach to nature in light of Germany's fraught urbanization and industrialization, as well the opportunities presented by new and reforming institutions, she argues that rapid social change drew attention to the role of social relationships and physical environments in rendering a society—and nature—whole, functional, and healthy. This quintessentially modern view of nature, Nyhart shows, stood in stark contrast to the standard naturalist's orientation toward classification. While this new biological perspective would eventually grow into the academic discipline of ecology, *Modern Nature* locates its roots outside the universities, in a vibrant realm of populist natural history inhabited by taxidermists and zookeepers, schoolteachers and museum reformers, amateur enthusiasts and nature protectionists. Probing the populist beginnings of animal ecology in Germany, Nyhart unites the history of popular natural history with that of elite science in a new way. In doing so, she brings to light a major orientation in late nineteenth-century biology that has long been eclipsed by Darwinism.

From sixteenth-century cabinets of wonders to contemporary animal art, *The Breathless Zoo: Taxidermy and the Cultures of Longing* examines the cultural and poetic history of preserving animals in lively postures. But why would anyone want to preserve an animal, and what is this animal-thing now? Rachel Poliquin suggests that taxidermy is entwined with the enduring human longing to find meaning with and within the natural world. Her study draws out the longings at the heart of taxidermy—the longing for wonder, beauty, spectacle, order, narrative, allegory, and remembrance. In so doing, *The Breathless Zoo* explores the animal spectacles desired by particular communities, human assumptions of superiority, the yearnings for hidden truths within animal form, and the loneliness and longing that haunt our strange human existence, being both within and apart from nature.

"Whom the gods wish to destroy," writes Cyril Connolly, "they first call promising." First published in 1938 and long out of print, *Enemies of Promise*, an "inquiry into the problem of how to write a book that lasts ten years," tests the boundaries of criticism, journalism, and autobiography with the blistering prose that became Connolly's trademark. Connolly here confronts the evils of domesticity, politics, drink, and advertising as well as novelists such as Joyce, Proust, Hemingway, and Faulkner in essays that remain fresh and penetrating to this day. "A fine critic, compulsive traveler, and candid autobiographer. . . . [Connolly] lays down the law for all writers who wanted to count. . . . He had imagination and decisive images flashed with the speed of wit in his mind."—V. S. Pritchett, *New York Review of Books* "Anyone who writes, or wants to write, will find something on just about every single page that either endorses a long-held prejudice or outrages, and that makes it a pretty compelling read. . . . You end up muttering back at just about every ornately constructed pensée that Connolly utters, but that's one of the joys of this book."—Nick Hornby, *The Believer* "A remarkable book."—Anthony Powell

Why do we feel bad at the zoo? In a fascinating counterhistory of American zoos in the 1960s and 1970s, Lisa Uddin revisits the familiar narrative of zoo reform, from naked cages to more naturalistic enclosures. She argues that reform belongs to the story of cities and feelings toward many of their human inhabitants. In *Zoo Renewal*, Uddin demonstrates how efforts to make the zoo more natural and a haven for particular species reflected white fears about the American city—and, pointedly, how the shame many visitors felt in observing confined animals drew on broader anxieties about race and urban life. Examining the campaign against cages, renovations at the National Zoo in Washington, D.C. and the San Diego Zoo, and the cases of a rare female white Bengal tiger and a collection of southern white rhinoceroses, Uddin unpacks episodes that challenge assumptions that zoos are about other worlds and other creatures and expand the history of U.S. urbanism. Uddin shows how the drive to protect endangered species and to ensure larger, safer zoos was shaped by struggles over urban decay, suburban growth, and the dilemmas of postwar American whiteness. In so doing, *Zoo Renewal* ultimately reveals how feeling bad, or good, at the zoo is connected to our feelings about American cities and their residents.

Environmental harm is commonly associated with companies that extract, consume, and pollute our shared natural resources. Rarely are the 'unseen polluters,' the financiers that sponsor and profit from eco-damaging corporations, placed at the forefront of the environmental debate. By focusing on these unseen polluters, Benjamin Richardson provides a comprehensive examination of socially responsible investment (SRI), and offers a guide to possible reform. Richardson proposes that greater regulatory supervision of SRI will help ensure that the financial sector prioritizes ethically-based investments. In *Socially Responsible Investment Law*, he suggests that new governmental reforms should encourage companies to participate in socially responsible investments by providing a better mix of standards and incentives for SRI through measures that include redefining the fiduciary responsibilities of institutional investors to incorporate environmental concerns. By doing so, Richardson posits that corporate financiers, including banks, hedge funds, and pension plans, will become more accountable to the goals of ensuring sustainable development.

He finds himself plunged into a fight for control of his work against powerful international forces, and caught in the middle, Lucia is swept into that battle . . . Despite centuries of campaigning, women still earn less and have less power than men. Equality remains a goal not yet reached. In this incisive account of why this is the case, Mary Evans argues that optimistic narratives of progress and emancipation have served to obscure long-term structural inequalities between women and men, structural inequalities which are not only about gender but also about general social inequality. In widening the lenses on the persistence of gender inequality, Evans shows how in contemporary debates about social inequality gender is often ignored, implicitly side-lining critical aspects of relations between women and men. This engaging short book attempts to join up some of the dots in the ways that we think about both social and gender inequality, and offers a new perspective on a problem that still demands society's full attention.
