Klaus Urner has discovered proof that Hitler wanted to "rub out" Switzerland. The planned occupation of the country was, however, postponed for a short time and in the end did not materialize. Switzerland was the only country in Western Europe that did not suffer military invasion in World War II. It made itself indispensable to both sides and survived in the eye of the hurricane that was Nazi aggression. "Let's Swallow Switzerland", including archival photographs, original color maps, and reprints of secret documents, sets new standards for the investigation of

this important chapter of twentieth-century history.

Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of

trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. *World Development Report 2020: Trading for Development in the Age of Global Value Chains* examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation. *World Development Report 2020* Elex Media Komputindo

This pioneering volume traces the history of the region which became Indonesia, from early times to the present day, in over three hundred specially drawn full-colour maps with detailed accompanying text. In doing so, the Atlas brings fresh life to the fascinating and tangled history of this immense archipelago. Beginning with the geographical and ecological forces which have shaped the physical form of the archipelago, the *Historical Atlas of Indonesia* goes on to chart early human migration and the changing distribution of ethnic groups. It traces the kaleidoscopic pattern of states in early Indonesia and their gradual incorporation into the Netherlands Indies and eventually into the Republic of Indonesia.

Soil erosion is a major environmental issue with a worldwide impact and direct and indirect effects on soil productivity and consequently on human survival. Although a natural process, soil erosion has increased significantly due to human intervention, especially in the last centuries, through diverse activities such as intensive agriculture, overgrazing, urban sprawl, deforestation, and industrial and mining activities. Presently, soil erosion and degradation promoted by human action have reached extreme levels, necessitating urgent measures to promote soil conservation and rehabilitation. This book presents perspectives on soil erosion occurring in different parts of the world as well as some successful initiatives and strategies for soil conservation and rehabilitation.

Corporate governance principles provide guidance on how corporations should operate. Adoption of international corporate governance best practices leads to long-term sustainability and

resilience, and can be a competitive tool to attract foreign investments. The Asian Development Bank, in partnership with the ASEAN Capital Markets Forum, have jointly developed the ASEAN Corporate Governance Scorecard, an assessment based on publicly available information and benchmarked against international best practices that encourage publicly listed companies to go beyond national legislative requirements. This report can be used by capital market regulators and other stakeholders as a reference to understand the current corporate governance standards across the region. It is also a useful diagnostic tool to guide improvement of corporate governance standards.

Kekuasaan kehakiman di Indonesia merupakan kekuasaan yang merdeka untuk menyelenggarakan peradilan guna menegakkan hukum dan keadilan. Kekuasaan kehakiman dilakukan oleh sebuah Mahkamah Agung dan badan peradilan yang berada di bawahnya dalam lingkungan peradilan umum, lingkungan peradilan agama, lingkungan peradilan militer, lingkungan peradilan tata usaha negara, dan oleh sebuah Mahkamah Konstitusi (Pasal 24 UUD Tahun 1945). Di dalam Kekuasaan Kehakiman terdapat jabatan Hakim sebagai unsur pelaksana dari Kekuasaan Kehakiman itu sendiri. Jabatan Hakim saat ini mengalami berbagai permasalahan dalam implementasinya. Buku ini mengupas berbagai permasalahan yang dihadapi oleh hakim dalam menjalankan fungsi, tugas, dan tanggung jawabnya. Pengulasan dalam berbagai sub-tansi yang terdapat dalam buku ini dapat memberikan sebuah gambaran bahwa ada perbedaan yang signifikan antara pengaturan bagi seorang hakim dengan

aturan yang melekat bagi anggota eksekutif dan legislatif. Padahal, pembagian kekuasaan antara eksekutif, legislatif, dan yudikatif sudah secara jelas diatur dalam UUD Tahun 1945. Pengaturan jabatan hakim saat ini tidak sesuai dengan kenyataan yang didapat oleh seorang hakim. Hakim saat ini masih berdiri di antara 2 (dua) kaki atau dapat dikatakan ada sebuah dualisme pengaturan terkait dengan profesi hakim. Hal ini kemudian yang menyebabkan seorang hakim sulit untuk melakukan fungsi, tugas, dan kewajibannya sesuai dengan kemandirian hakim. Penyebutan hakim sebagai pejabat negara tidak sesuai implementasinya baik itu dari sisi kesejahteraan maupun kepada sistem protokoler yang didapatkan seorang hakim. Hak dan kewajiban yang diperoleh seorang hakim pun menjadi sama dengan pegawai ASN karena masih adanya status hakim yang berada pada grey area. Selain itu, buku ini juga mengupas bagaimana seorang hakim diperlakukan tidak layak dari sisi keamanan sampai kelayakan rumah dinas dan bagaimana pembinaan dan konsep pendidikan serta pelatihan hakim yang terbatas anggarannya. Pada gilirannya, buku ini mengupas pula bagaimana pengawasan kepada seorang hakim yang dilakukan oleh 2 (dua) lembaga, yaitu MA dan KY. Buku ini dibuat dalam rangka memberikan gambaran secara utuh kepada para pembaca terhadap permasalahan-permasalahan yang dihadapi oleh seorang hakim dalam menjalankan fungsi, tugas, dan kewenangannya. Diharapkan para pembacara mengerti dan memahami kondisi hakim baik dilihat dari sisi struktur organisasi, perekonomian, manajemen, pendidikan, sampai dengan pengawasan. Yang terakhir, buku ini juga diharapkan dapat memberikan masukan dalam mengatur sebuah jabatan hakim

dalam peraturan perundang-undangan.

Every year, the World Bank's World Development Report (WDR)

features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education’s Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education’s promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions.

Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.

Over the last decade, many local students have preferred to study overseas. This has caused governments to announce the creation of programs and developments in the higher education sector to upgrade South-East Asia to a leading education hub. Moreover, many governments declared that they would work on the insurance of learning to increase the quality of the degrees and the teaching itself. This has led many to question the results of these declarations. Higher Education Challenges in South-East Asia provides an overview of what has been happening over the last ten years in higher education in South-East Asia. It also works to solve the challenges in modern education such as the impacts of digitalization, globalization, and Generation Y and Z learning styles. Covering topics that include globalization, educational technologies, and comparative teaching, this book impacts academic institutions, policymakers, government officials, university and college administrators and leaders, academicians, researchers, and students.
