the 'best player' in your market - but this is wrong. The Impossible Advantage reveals that success can be achieved by changing the market in which you operate, rather than trying to beat the competition. The authors illustrate that the biggest, most spectacular and groundbreaking business success stories feature companies that make the rules - instead of just following them. The best companies seem to know how to break, change, or reinvent the rules of the market that everyone else follows. This book: Will help you to break through to an entirely new level of thinking: winning the game by changing the rules in your own favour. Explains that

you don't need a technological breakthrough, product innovation or a massive marketing budget to change the rules of the competition. Shows you that you can become a 'game changer' and gain a seemingly 'impossible' advantage even over far larger competitors, no matter how large your market or how small your segment is. Introduces you to four compelling 'Game Changing Strategies' that work for managers from any industry or business sector. Wilhelm Bleek was fascinated by African languages and set out to make sense of a complex and alien Bushman tongue. At first Lucy Lloyd worked as his assistant, but soon proved to be so gifted a linguist and empathetic a listener that she created a monumental record of Bushman culture. Their informants were a colorful cast. The teenager, /A!kunta, taught Bleek and Lloyd their first Bushman words and sentences. The wise old man and masterful storyteller, //Kabbo, opened their eyes to a richly imaginative world of myth and legend. The young man, Dia!kwain, explained traditional beliefs about sorcery, while his friend #Kasin spoke of Bushman medicines and poisons.

The treasures of Bushman culture were most fully revealed in conversations with a middle-aged man known as /Han=kass'o, who told of dances, songs and the meaning of images on rocks. The human histories and relationships involved in this unique collaboration across cultures are explored in full for the first time in this remarkable narrative.

The Mirror for Magistrates, the collection of de casibus complaint poems in the voices of medieval rulers and rebels compiled by William Baldwin in the 1550s, was central to the development of

imaginative literature in the sixteenth and early seventeenth centuries. Additions by John Higgins, Thomas Blenerhasset, and Richard Niccols between 1574 and 1610 extended the Mirror's scope, shifted its focus, and prolonged its popularity; in particular, the texts' later manifestations profoundly influenced the work of Spenser and Shakespeare. Unperfect Histories is the first monograph to consider the text's early modern transmission history as a whole. In chapters on Baldwin, Higgins, Blenerhasset, and Niccols's complaint collections, it demonstrates that the Mirror is an invaluable witness to how verse history was

conceptualized, written, and read across the period, and explores the ways in which it was repeatedly reinterpreted and redeployed in response to changing contemporary concerns. The Mirror corpus encompasses topical allegory, nationalist polemic, and historiographical skepticism, as well as the macabre humour and metatextual play which have come to be known as hallmarks of Baldwin's mid-Tudor writings. What has not been recognised is the complex interaction of these themes and techniques right across the Mirror's history. Higgins, Blenerhasset, and Niccols's contributions are analysed for the first time here, both within

their own literary and historiographical contexts, and in dialogue with Baldwin's early editions. This new reading offers a lively account of the texts' depth and variety, and provides insight into the extent of the Mirror's influence and ubiquity in early modern literary culture.

Ukrainian Erotomaniac Fictions explores the aggressive sexualization of the Ukrainian cultural mainstream after the collapse of the USSR as a counter-reaction to the Soviet state's totalitarian, repressive politics of the body. While the book's introduction includes concise sections on such pornified cultural forms as advertising,

mass media, visual art, and film, its major focus is on textual production that has contributed significantly to the literary explosion in Ukraine, which began in the 1990s. Drawing on cultural, postcolonial, feminist, and gender theories, the book examines transgressive potentials of the erotic under postcolonial, postcommunist, and post-totalitarian conditions. It offers insight into the convoluted dialectics between the imported conventions of Western "porno-chic" and the received oppressive Soviet gender and sexual ideologies. Within a broad historical and cultural framework, the study considers writers' engagements in

dialogues with their own tradition and colonial legacy, as well as with a variety of transcultural flows. By bringing together diverse erotomaniac fictions, Maryna Romanets charts the ways in which they are embedded in the processes of Ukraine's cultural decolonization.

For many years anthropologists have speculated about primitive warfare, its place in a particular culture, its form, and its consequences on other tribes. This full-scale ethnography of the Dugum Dani centers on the issue of hostility between groups of human beings and the place and function of violence. Warfare, like rituals and kinship alliances, is part of a total culture, and for this reason Professor Heider has approached the Dani from a holistic point of view. Other aspects of Dani life and organization are shown in interrelationship with the institution of warfare, such as the social, ecological, and technological elements in the Dani way of life.

Professor Heider examines particularly the role of warfare itself in terms of the particular needs, and lack of them. The first section of this book documents the Dani and their warfare and provides one of the most detailed accounts of tribal life available. The second section focuses on the material aspects of Dani culture, to explore the interrelationships of the material objects with the other aspects of Dani culture; this analysis is especially interesting since the Dani moved from a stone-age culture to steel tools during the period of study itself. Professor Heider also notes the distinctive aspects of Dani culture; the paucity of color, number, and other attribute terms,

the near absence of art; their five-year post-partum sexual abstinence, and other traits that seem to suggest that the Dani have little interest in intellectual elaboration or sex, and that despite their warfare, they are not a particularly aggressive people. Including previously unpublished photographs and descriptions of tribal life and warfare, this book provides anthropologists with a full and vivid account of Dani culture and with new insights into the general problems of human aggression.
