 "Friends and Enemies"  
 delivers a  
 lucid and

provocative history of one of the world's largest and most successful political organizations, the Chinese Communist Party (CCP). Grounding his

account in the origins of the CCP, Brown charts its early struggles and the emergence of the leadership of Mao Zedong in the 1930s, before unravelling the role of the Party during the Second World War and the vicious internecine struggle that culminated in the CCP's ascent to power in 1949. The narrative tackles the successes and failures of the CCP in the post-war era,

analysing this chequered period with a close eye to the internal machinations of the Party, and then boldly considers the prospects of the CCP in the future. Brown produces a forthright analysis of where the Party stands in the 21st century, and assesses its three greatest challenges - energy, the environment and the economy - before culminating in a discussion of the potential for democratic

reform, and the risks the Party faces while it attempts to become a modern party in charge of a globally important economy. "Friends and Enemies" is based on a combination of research and Brown's own experiences as a business person and diplomat in China, where he lived for seven years. It has also benefited from the input of analysts of the Party from the UK and US, and from talks

with Party officials at senior and working level in China. ""  
*Chinese Socialism After Mao*  
 Rowman & Littlefield  
 China is now poised to take a key role on the world stage, but in the early twentieth century the situation could not have been more different. Rana Mitter goes back to this pivotal moment in Chinese history to uncover the origins of the painful transition from

a premodern past into a modern world. By the 1920s the seemingly civilized world shaped over the last two thousand years by the legacy of the great philosopher Confucius was falling apart in the face of western imperialism and internal warfare. Chinese cities still bore the imprints of its ancient past with narrow, lanes and temples to long-worshipped gods, but these were starting to

change with the influx of foreign traders, teachers, and missionaries, all eager to shape China's ancient past into a modern present. Mitter takes us through the resulting social turmoil and political promise, the devastating war against Japan in the 1940s, Communism and the Cultural Revolution of the 1960s, and the new era of hope in the 1980s ended by the Tian'anmen uprising. He

reveals the impetus behind the dramatic changes in Chinese culture and politics as being China's "New Culture" - a strain of thought which celebrated youth, individualism, and the heady mixture of strange and seductive new cultures from places as far apart as America, India, and Japan. China without Mao Greenwood Publishing Group Revised and updated, this

thoughtful, balanced and highly readable work provides a succinct, yet comprehensive and cohesive overview of China's path to modernization, preparing readers to understand the complex interaction between the Chinese cultural traditional and the internal and external pressures for change that led China onto the path of revolution and Communism. Evaluating the impact of Mao

Ze-dong's thought and action on China's development, it explores the nature of Deng Xiao-ping's "second revolution" that reversed many of Maoist policies that put the country on the road to economic prosperity but which also created serious economic and political imbalances that will continue to plague China in the near future. Develops and sustains a narrative line

not usually available in survey histories of China, presenting an internal coherence within each chapter that provides not only an integrated picture of political, cultural, and economic developments but also a convenient foundation to grasp the sequence of fundamental changes in China. Provides a brief summary of China's past history, focusing on the ideology

and institutions that molded Chinese political culture. Covers critical transition periods, such as the collapse of the Manchu dynasty and the establishment of the first republic; the shift of power from the Nationalists to the Communists; and the rise of Deng Xiao-ping after the passing away of Mao Ze-dong. Expands coverage on many areas, including Tibet, PRC in

Taiwan, and Hong Kong; the Sino-Indian war of 1962, and the Sino-Vietnamese war of 1979; plus social, economic, and cultural topics in various periods. *A Historical Review from 1800 to the Present* Springer Science & Business Media One hundred years before Columbus and his fellow Europeans began their voyages of discovery, fleets of giant junks commanded

by the eunuch admiral Zheng He and filled with the empire's finest porcelains, lacquerware, and silk ventured to the world's "four corners." Seven epic expeditions brought China's treasure ships across the China Seas and Indian Ocean, from Japan to the spice island of Indonesia and the Malabar Coast of India, on to the rich ports of the Persian Gulf and down the East African coast, to

China's "El Dorado," and perhaps even to Australia, three hundred years before Captain Cook's landing. It was a time of exploration and expansion, but it ended in a retrenchment so complete that less than a century later, it was a crime to go to sea in a multimasted ship. In *When China Ruled the Seas*, Louise Levathes takes a fascinating and unprecedented look at this

dynamic period in China's enigmatic history, focusing on the country's rise as a naval power that briefly brought half the world under its nominal authority. Drawing on eyewitness accounts, official Ming histories, and African, Arab, and Indian sources, many translated for the first time, *Levathes* brings readers inside China's most illustrious scientific and technological era. She sheds

new light on the historical and cultural context in which this great civilization thrived, as well as the perception of China by other contemporary cultures. Beautifully illustrated and engagingly written, *When China Ruled the Seas* is the fullest picture yet of the early Ming dynasty—the last flowering of Chinese culture before the Manchu invasion. Edward Elgar Publishing's *The August Sleepwalker* introduces to American readers the compelling and remarkable poetry of China's foremost modern poet. Bei Dao (Zhao Zhenkai). One of the most gifted and controversial writers to emerge from the massive upheavals of contemporary China. Bei Dao both reflects and criticizes the conflicts of the Cultural Revolution of the late '60s and '70s. A

youthful Red Guard whose early disillusionment with the destructiveness of the times made him an outsider. Bei Dao joined with other underground poets attempting to create an alternative literature that challenged the received orthodoxies of Maoist China. The author now lives in exile. Book jacket. popular culture in twentieth-century China, and of its political impact during the Sino-Japanese War of 1937-1945 (known in China as "The War of Resistance against Japan"). Chang-tai Hung shows in compelling detail how Chinese resisters used a variety of popular cultural forms--especially dramas, cartoons, and newspapers--to reach out to the rural audience and

galvanize support for the war cause. While the Nationalists used popular culture as a patriotic tool, the Communists refashioned it into a socialist propaganda instrument, creating lively symbols of peasant heroes and joyful images of village life under their rule. In the end, Hung argues, the Communists' use of popular culture contributed to their victory in revolution. Economic Sentiments

Klaus Mühlhahn situates modern China in the nation's long, dynamic tradition of overcoming adversity and weakness through creative adaptation--a legacy of crisis and recovery that is apparent today in China's triumphs but also in its most worrisome trends. Mühlhahn's

Shanghai Splendor is an important and captivating work of scholarship." —David Strand, author of *Rickshaw Beijing: City People and Politics in the 1920s* "This in an outstanding work.

Although Shanghai has been among the most popular subjects for scholars in modern Chinese studies, one has yet to see a project as impressive as this. violence erupted among Uyghurs, Chinese state police, and Han residents of Ürümqi, the capital city of Xinjiang, in northwest China, making international headlines, and introducing many to tensions in the area. But conflict in the region has deep roots. Now available in paperback, *Holy War in China* remains the first comprehensive and balanced history of a late nineteenth-

century Muslim rebellion in Xinjiang, which led to the establishment of an independent Islamic state under Ya'qub Beg. That independence was lost in 1877, when the Qing army recaptured the region and incorporated it into the Chinese state, known today as the Xinjiang Uyghur Autonomous Region. Hodong Kim offers readers the first English-language history of the

rebellion since 1878 to be based on primary sources in Islamic languages as well as Chinese, complemented by British and Ottoman archival documents and secondary sources in Russian, English, Japanese, Chinese, French, German, and Turkish. His pioneering account of past events offers much insight into current relations.

After ten years, John Bryan Starr has thoroughly revised and updated his classic introduction to the background of, the data about, and the issues at stake in China's present and future. In the new edition, Starr seamlessly weaves in additional material on the 2008 Olympics in Beijing, the Chinese government's ongoing efforts to curb the influence

of the Internet, and the intensifying trade disputes between the United States and China. Succinct, modest, and refreshingly forthright, *Understanding China* remains a necessary guide for the uninitiated to everything from the Chinese economy and political system, to its intellectual freedoms and human rights, to its relationship with the rest of the world. *The Rise of Modern China*

 Given the increasing global interest in Chinese culture, this book uses case studies to describe and interpret Chinese cultivation in contemporary Taiwanese schools. Cultivation is a concept unique to Chinese culture and is characterized by different attitudes towards teaching and learning compared to Western models of education. The book starts with a discussion of human nature in Chinese schools of philosophy and levels of goodness. Following the philosophical background is a presentation of how cultivation is practiced in Chinese culture from prenatal through high school education. The case studies focus both on how students are cultivated as they become members of Chinese society, and on what role teachers play in cultivating the children in school. In addition, supports from Chinese educational institutions, including public schools, families, and organizations such as private cram schools, are introduced and explained. In closing, the book presents a critique of the modern school reform movement and the conflicts between the reform proposals and traditional practices. Based on the collective work of

Taiwanese researchers in the fields of education, history and anthropology, the book identifies the purpose of education as cultivating virtue in a process of creating an ideal person who serves society, and describes the way teachers have carried on this tradition despite its faltering status in contemporary educational discourse and in the face of reform movements. *Policy, Law,*

### **Bringing the World Home**

University of California Press  
Bringing the World Home sheds new light on China's vibrant cultural life between 1895 and 1919—a crucial period that marks a watershed between the conservative old regime and the ostensibly iconoclastic New Culture of the 1920s. Although

generally overlooked in the effort to understand modern Chinese history, the era has much to teach us about cultural accommodation and is characterized by its own unique intellectual life. This original and probing work traces the most significant strands of the new post-1895 discourse, concentrating on the anxieties inherent in a complicated process of

cultural transformation . It focuses principally on how the need to accommodate the West was reflected in such landmark novels of the period as Wu Jianren's *Strange Events Eyewitnessed in the Past Twenty Years* and Zhu Shouju's *Tides of the Huangpu*, which began serial publication in Shanghai in 1916. The negative tone of these narratives contrasts sharply with

the facile optimism that characterizes the many essays on the "New Novel" appearing in the popular press of the time. Neither iconoclasm nor the wholesale embrace of the new could square the contradicting intellectual demands imposed by the momentous alternatives presenting themselves. **When China Ruled the Seas** Open Road Media Andy Kirkpatrick and Zhichang Xu offer a response to the argument that Chinese students' academic writing in English is influenced by "culturally nuanced rhetorical baggage that is uniquely Chinese and

hard to eradicate." Noting that this argument draws from "an essentially monolingual and Anglo-centric view of writing," they point out that the rapid growth in the use of English worldwide calls for "a radical reassessment of what English is in today's world." The result is a book that provides teachers of writing, and in particular those involved in the teaching of

English academic writing to Chinese students, an introduction to key stages in the development of Chinese rhetoric, a wide-ranging field with a history of several thousand years. Understanding this important rhetorical tradition provides a strong foundation for assessing and responding to the writing of this growing group of students.
