In each state of matter, there are many molecules acting together. The motion and interactions of these molecules can largely be explained by considering the intermolecular forces acting between them. Below is a summary of the shape, volume and strength of the intermolecular forces in each state of matter. States of Matter and Thermo Chemistry Almost all substances can be classified into three states of matter - solids, liquids and gases. Each state has different properties. Heating and cooling a substance can cause it to change state. States of matter - States of matter - GCSE Chemistry ... chemical changes and properties chemistry a states of matter packet name hour page 2 worksheet 1 states of matter in this packet we will discuss three general states of matter solid liquid and gas in each state of matter there are
