The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

In the first section of the book Isaiah Berlin studies the philosophical ideas of Giovanni Battisti Vico (1668-1744), a profound and original thinker, who, after being overshadowed by Montesquieu, has been rediscovered at intervals ever since, but has probably even more to say to the present age than to his own.

Varia Historia is a miscellany of anecdotes, lists, apophthegms, biographical sketches, and descriptions of natural wonders. The present volume presents Aelian in such a way that his program for selection and compilation of information becomes apparent.

The young hero of *The Speed of Light* is an aspiring writer in provincial Spain in the 1980s,

dreaming of burning success, searching for a real story to tell. Out of the blue he is offered the chance to work in a in a Midwestern university and soon he is in the United States, living a happy, carefree life, working and writing. Little does he know that his burgeoning friendship with the Vietnam Vet Rodney Falk, a man of few friends and strange ways, will influence the course of his entire life, or that he will become obsessed with unravelling the mystery at the heart of Rodney's life. Why do people sometimes ridicule and sometimes fear Rodney? Why does he shun the world? Why does he accept and befriend the narrator? What really happened at My Khe? When the young writer's own life takes a terrible twist many years later, Rodney may be the only person in the world who can save him.

The history of Pythagoreanism is littered with different and incompatible interpretations, to the point that Kahn (1974) suggested that, instead of another thesis on Pythagoreanism, it would be preferable to assess traditions with the aim of producing a good historiographical presentation. This almost forty-year-old observation by Kahn, directs the author of this book towards a fundamentally historiographical rather than philological brand of work, that is, one neither exclusively devoted to the exegesis of sources such as Philolaus, Archytas or even of one of the

Hellenistic Lives nor even to the theoretical approach of one of the themes that received specific contributions from Pythagoreanism, such as mathematics, cosmology, politics or theories of the soul. Instead, this monograph sets out to reconstruct the way in which the tradition established Pythagoreanism's image, facing one of the central problems that characterizes Pythagoreanism more than other ancient philosophical movements: the drastically shifting terrain of the criticism of the sources. The goal of this historiographical approach is to embrace Pythagoreanism in its entirety, through - and not in spite of - its complex articulation across more than a millennium.

The Loves of Chærcas and Callirrhoe. Written Originally in Greek, by Chariton of Aphrodisios. Now First Translated Into English ... Good Press

From an award-winning anthropologist, a lively, accessible, and irreverent introduction to the field What is anthropology? What can it tell us about the world? Why, in short, does it matter? For well over a century, cultural anthropologists have circled the globe, from Papua New Guinea to California, uncovering surprising insights about how humans organize their lives and articulate their values. In the process, anthropology has done more than any other discipline to reveal what

culture means and why it matters. By weaving together examples and theories from around the world, Matthew Engelke provides a lively, accessible, and at times irreverent introduction to anthropology, covering a wide range of classic and contemporary approaches, subjects, and anthropologists. Presenting memorable cases, he encourages readers to think deeply about key concepts that anthropologists use to make sense of the world. Along the way, he shows how anthropology helps us understand other cultures and points of view—but also how, in doing so, it reveals something about ourselves and our own cultures, too.

The author of *The Mental Load* returns with more "visual essays which are transformative agents of change." After the success of *The Mental Load*, Emma continues in her new book to tangle with issues pertinent to women's experiences, from consent to the "power of love," from the care and attentiveness that women place on others' wellbeing and social cohesion, and how it constitutes another burden on women, to contraception, to the true nature of gallantry, from the culture of rape to diets, from safety in public spaces to retirement, along with social issues such as police

violence, women's rights, and green capitalism. And, once more, she hits the mark.
